SPERRY ANDREWS

As founder of the Human Connection Institute, I orchestrate a large-scale, spiritually-inspired, multinational, scientifically-based, media project, designed to facilitate humanity's imminent leap into collective enlightenment. HCI is an internationally-based institute exploring how every man, woman, and child is linked by our innate capacity for being collectively conscious. We have found that how we pay attention to ourselves, to one another and to nature determines the quality of our relationships in concrete

tangible ways. Our research spans all the branches of science exploring inter-subjectively as well as objectively why we have avoided sharing a common sense, how we have been designed by nature to unlearn this habit, and how our interconnectedness can be felt and thought intuitively by every human being. Forty years of trial and error research with hundreds of multicultural groups has shown how to live in harmony. As millions of us learn to pay attention together this promises to eliminate poverty, pollution, disease, crime and war.

Awakening of Awareness

**Nature has apparently designed us to evolve into a
more unified, awake state of consciousness.**

Many religious teachings for millennia have pointed to the realization of this unity as the highest attainment of a human life.

Mutual devotion to this level of realization on the part of countless individuals has led, over thousands of years, to our current process of awakening together.

There is a growing interest today in the potential of cultivating a common sense – intersubjectively and socially. A commonly sensed consciousness may be the next step in human and cultural evolution, an integral element in the maturation of the universe, and even essential to our survival as a species.

Over the last hundred years, the realizations described in ancient texts are being explored by western scientists.

**Y/Our Awakened Imagination is
Unlimited and All Encompassing.**

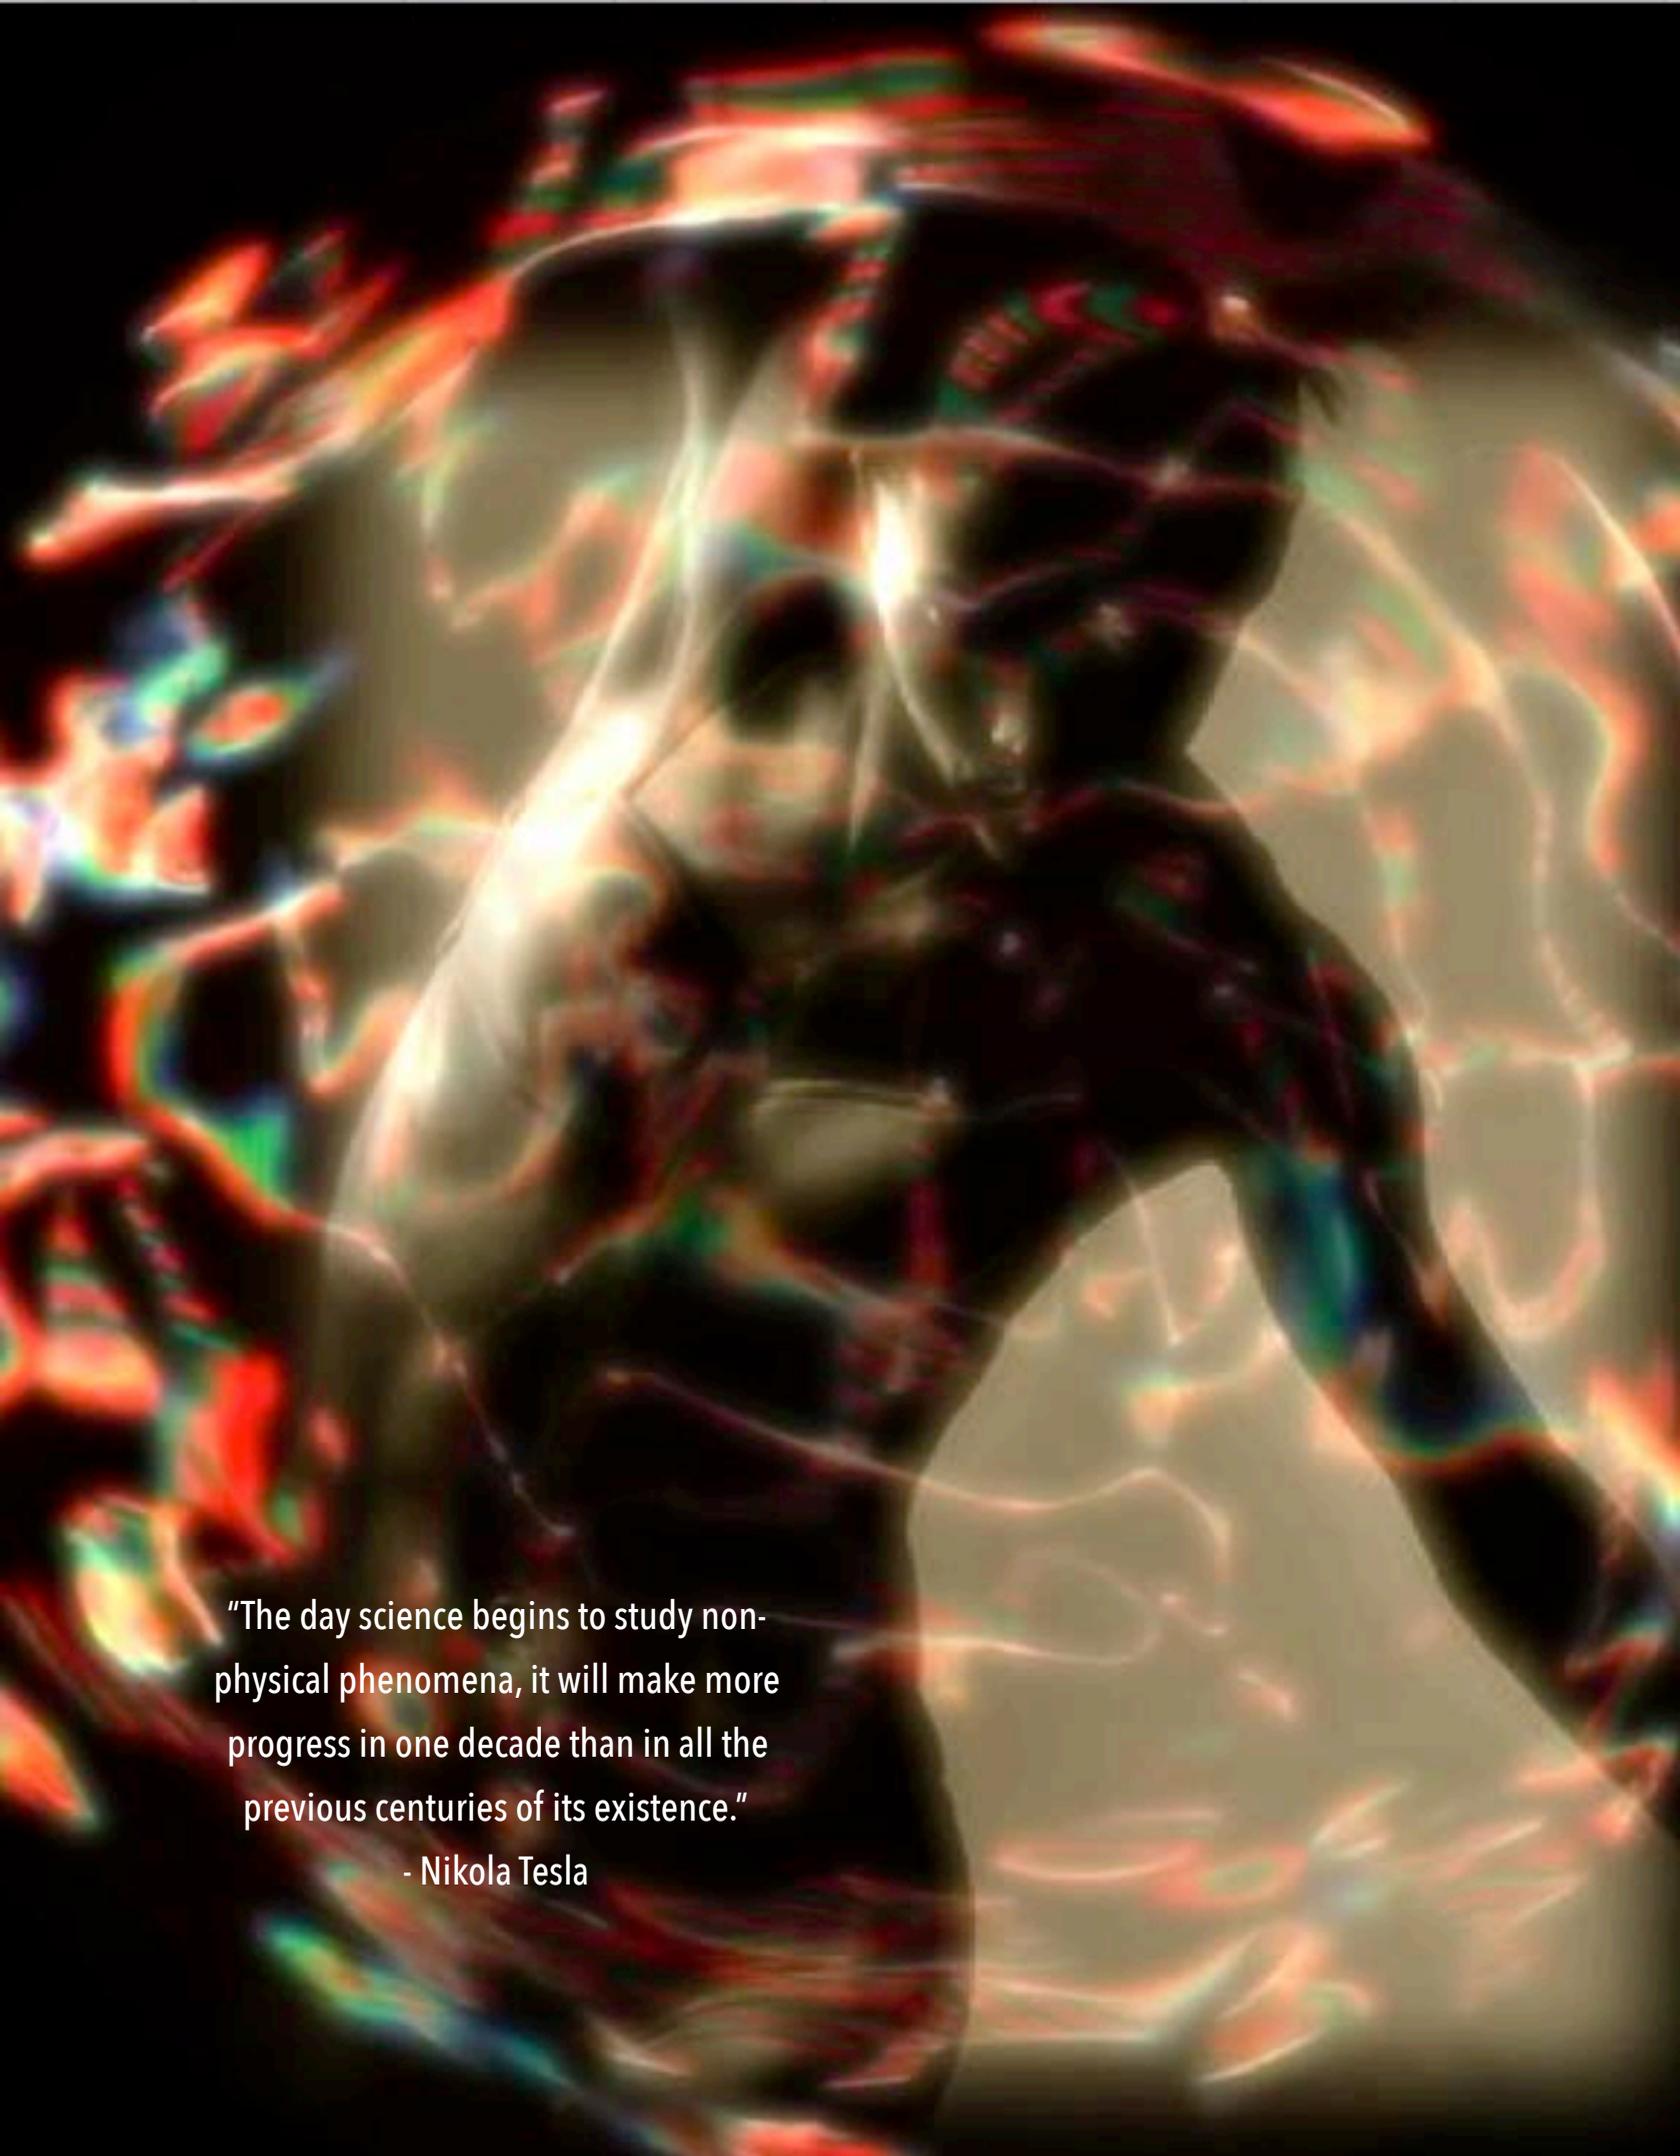

A Unified State of Consciousness

We (can) use awareness to form ideas of 'what is,' yet rarely give adequate attention to the quality and the presence of awareness.

The universe is an observational measurement system. It provides the architecture for the growth of a cosmological consciousness that's reuniting the universe afresh every instant. As it incrementally expands, we (can) sense we're never the same way twice. We're total strangers to ourselves in each new moment. We have been clinging to images, to superficial ideas, and empty promises, terrified of

accepting an absence that is by its very nature unknowable. This awakening awareness which we 'essentially all are together' cannot be controlled by our fears or desires. It is 'that' which must remain unchanged. Unless we are wholly awake together as this ever-present, all-knowing, all-powerful, mirror-like, consciousness, we will continue to suffer.

A man in a dark suit stands in the center of the frame, looking down. He is surrounded by a complex, swirling field of colorful light patterns in shades of red, orange, yellow, green, and blue. The background is dark, making the vibrant light patterns stand out. The overall effect is one of a futuristic or scientific environment.

"The day science begins to study non-physical phenomena, it will make more progress in one decade than in all the previous centuries of its existence."

- Nikola Tesla

The Key to Global Enlightenment

Awakeness

Awakeness is like a mirror - it unites, reflects, and transforms our imaginations, causing love and awe; by sharing awakeness, the delusions of separation dissolve, awakening and enlightening our selves and all of humankind. This simple way of being together has reliably allowed anyone interested to experience a mirror-like 'awakeness' with others.

Collaborating on being awake as awareness reunites us with the primordial nature of mind, the relative becomes conscious of the absolute.

We (can) re-invent 'what is' and imagine what has never existed. How well we pay attention, as well as what we pay attention to, determines how we are, what we can do, and who we become.

Hosting leaders for transformational change.

Essay

by Sperry Andrews

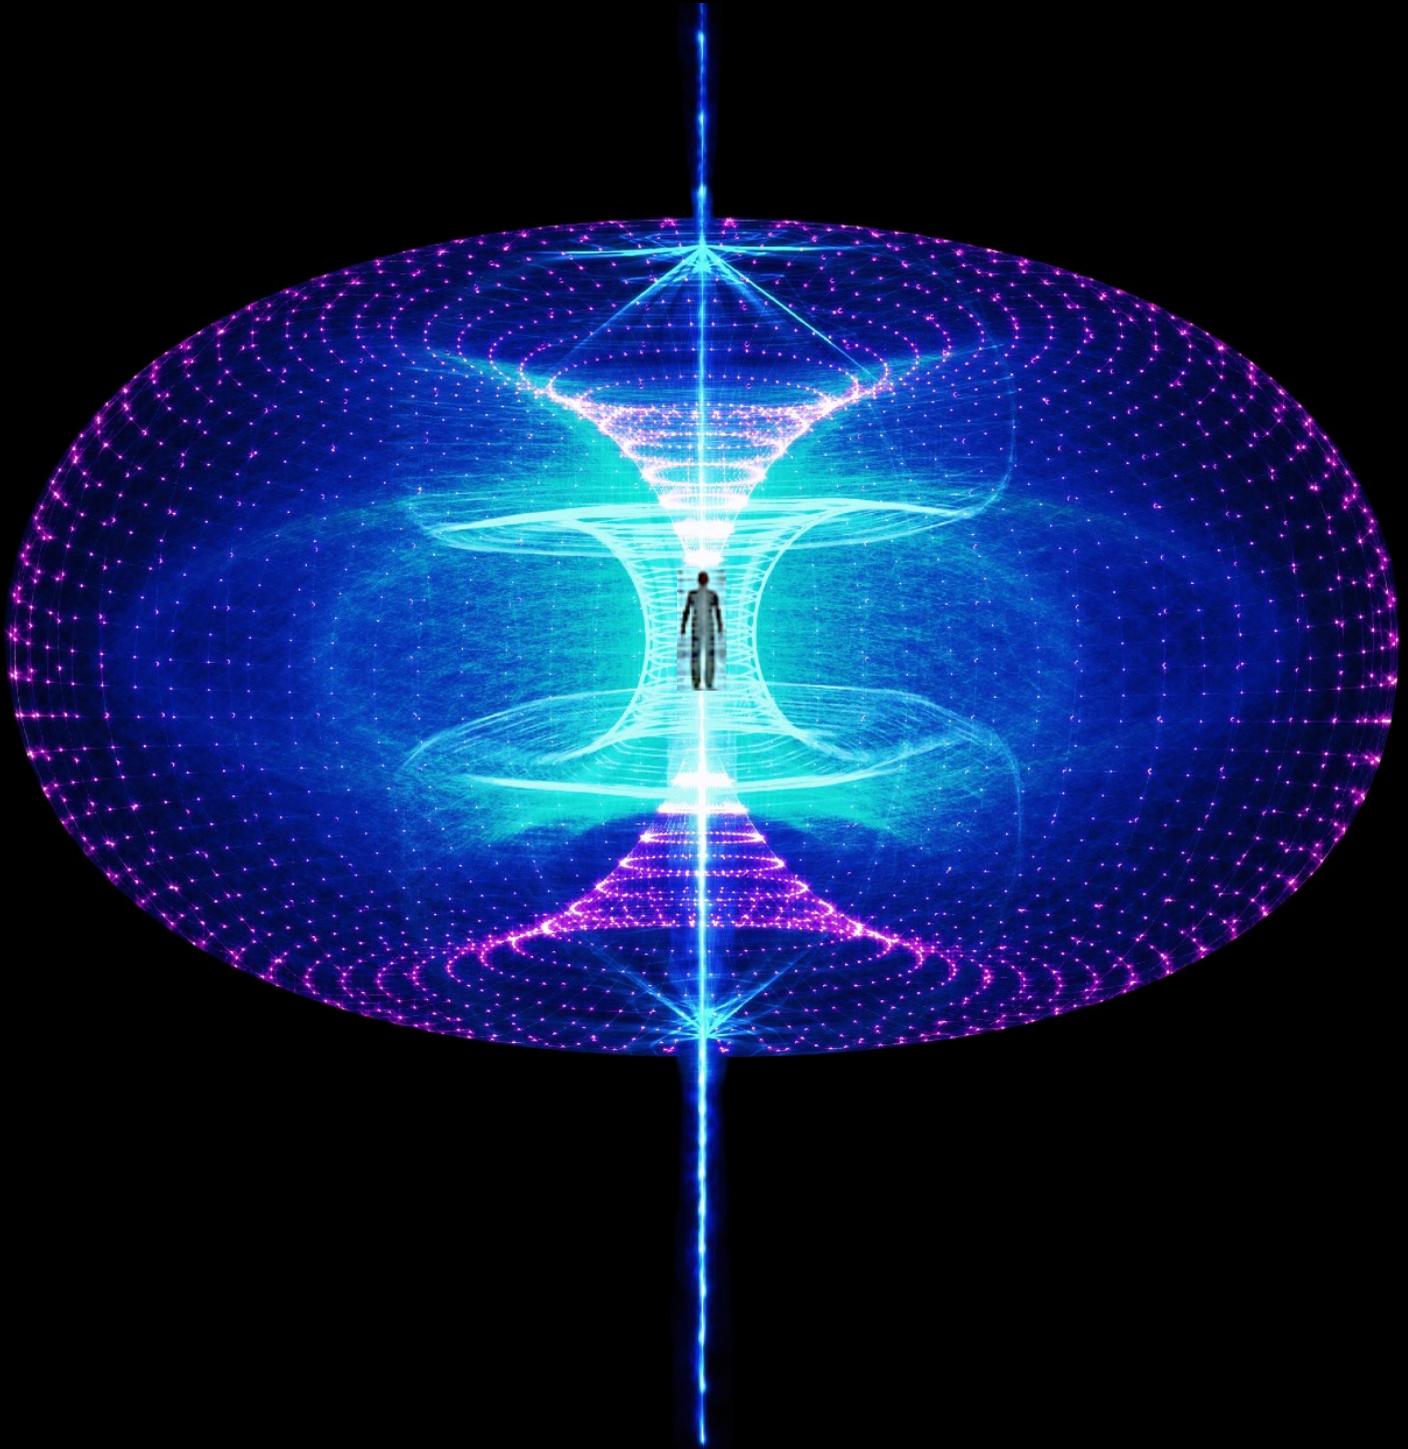

Resolving the Three Great Mysteries

Consciousness, free will, and God

Abstract: This essay celebrates a nearly four year collaboration with Dr. James E. Beichler to whom I owe a great debt of gratitude for rigorously exploring these insights in his own publications and coauthoring a paper published in these proceedings. I have quoted him here in recognition of our mutual understanding and referenced how he has addressed these insights in many of his papers in my bibliography. It is shown here how point-centered processes generate all phenomena and the expansion of our universe including non-material consciousness. He and I agree, a dimensionless mechanism (i.e., primal awareness) and its dimensional by-products (i.e., measurements) produce what is physical, emotional, mental, soulful, and spiritual.

“Before that moment of time [i.e., the beginning of spacetime], all science has to rely on is unfounded speculation, or at least that was the situation before Riemannian geometry was modified by incorporating point-elements and Andrews developed his intuitive notion of a 0-D point Void. Everything in our scientific model of reality changes by adopting the 0-D point Void as the original Riemannian point-element from which our more advanced Riemannian space-time structure of physical reality evolved.” ~ Beichler (2017) p.4

The absence of form,
without need of any force or
intention, continuously
'orchestrates' the extension and
expansion of form.

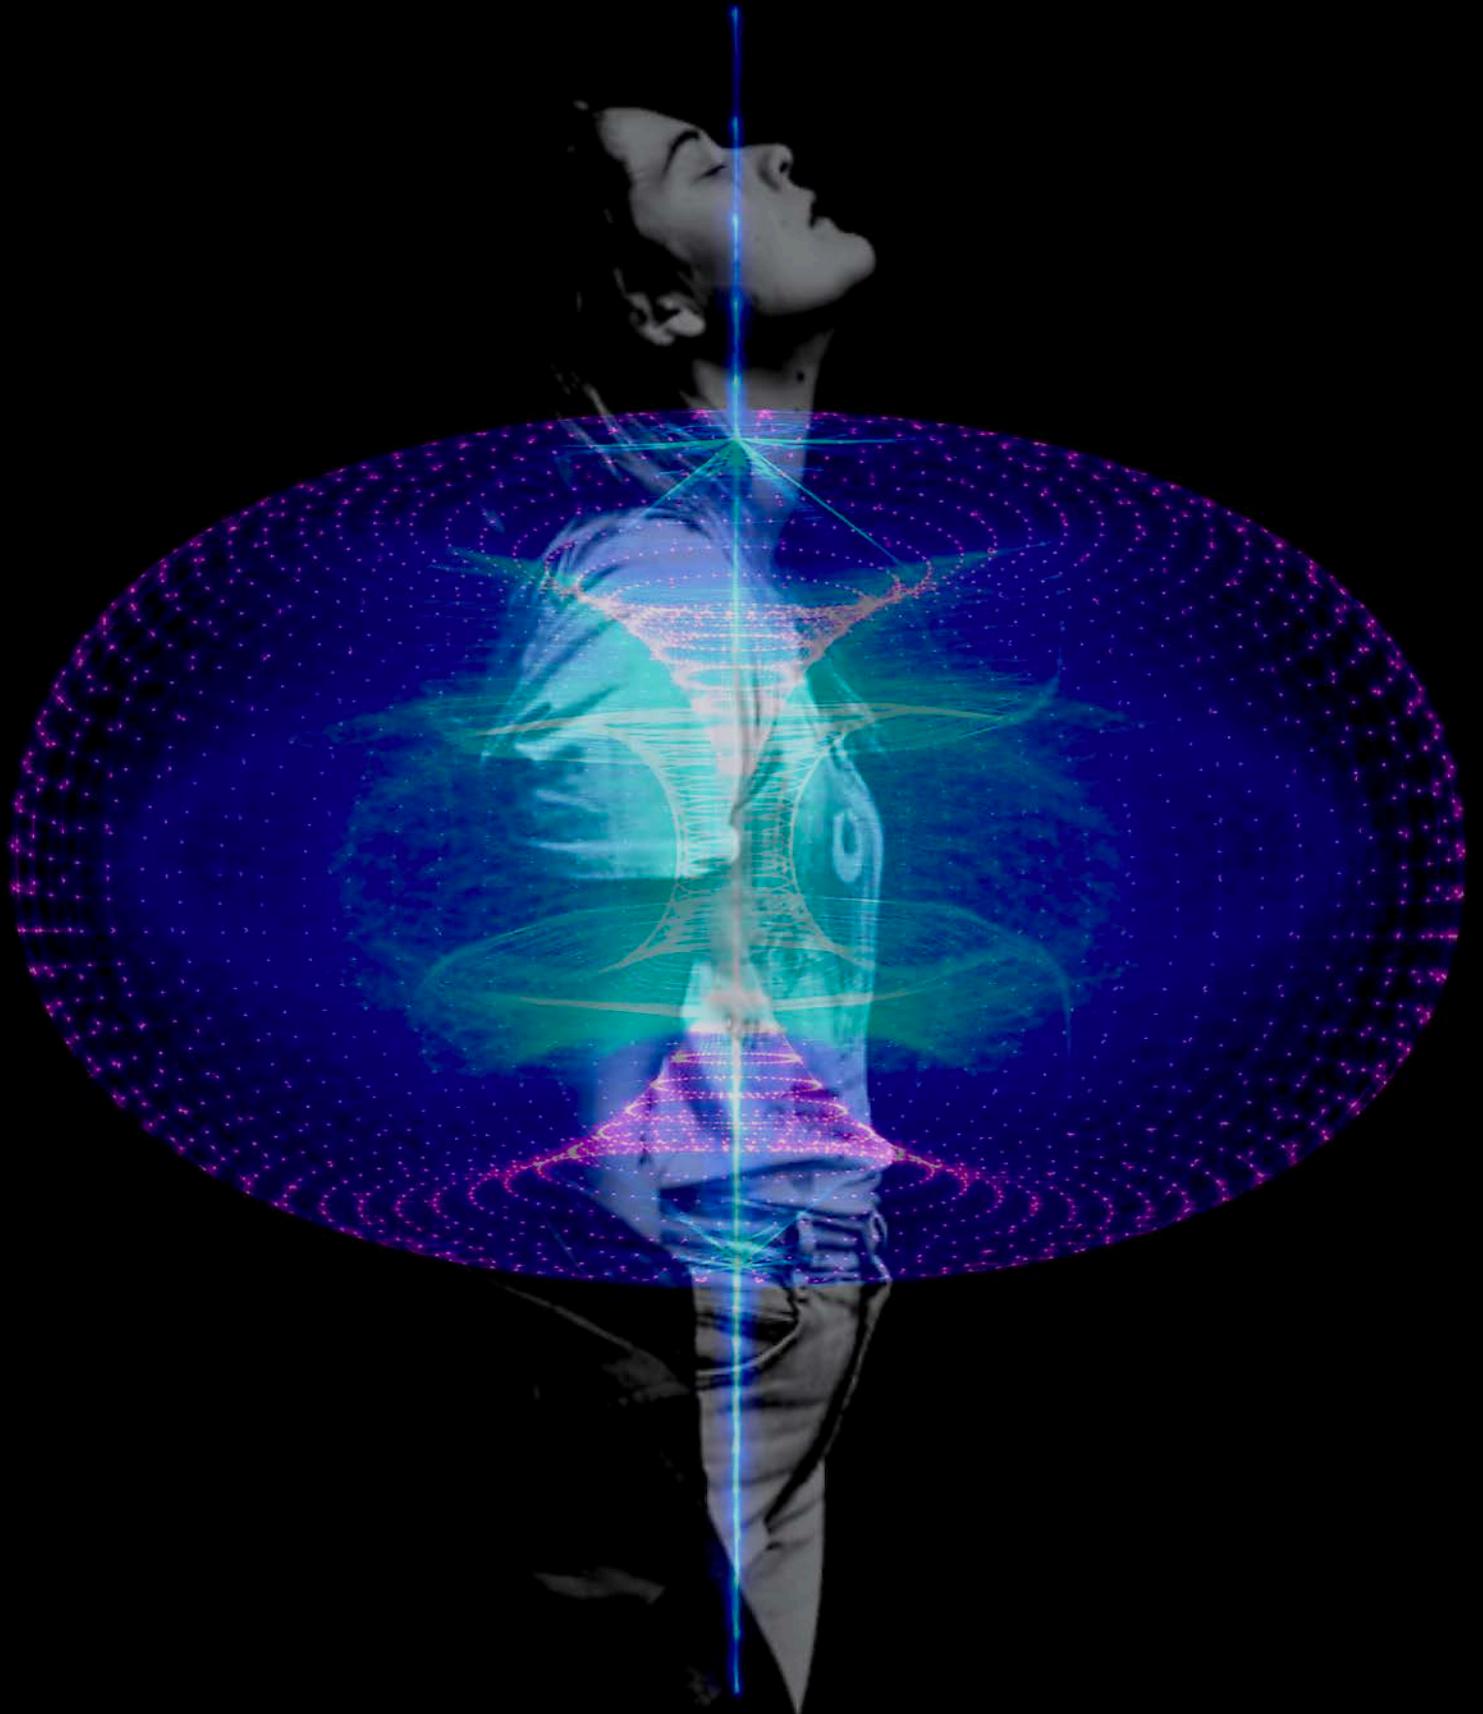

Introduction

Bernhard Riemann's original conception of curved spatial surfaces offers an n -dimensional space embedded in an $n+1$ dimensional manifold. When $n = 0$, a non-dimensional (0D) point functions as an *invariant absence*. This 0D point is kept from collapsing back into the Void by a (virtual) vortex of equal and opposite torsional potentials, initiating the emergence of curved spatial surfaces. Torsional potentials 'drive' the rapid replication of *discrete* 0D coordinate locations to form an expanding 3D volume. All 0D points in 3D also remain united at a single 0D polar point in the fourth dimension of space (4D) that most physicists think of as a point in time. Hereafter, 0D points are embedded in all higher-dimensional Riemannian spaces forming nested hierarchies which include and transcend all lower dimensions.

Each higher polar point serves as an *observer-driven mechanism*, measuring and manifesting gradations of self-organizing electromagnetic and gravitational potentials. All 0D points

also sustain their '*non-material*' absence—in space over time—as the indivisible presence of a primordial (*Godlike*) awareness which we can *consciously* experience as an '*insightful witnessing all-knowing mirror-like intelligence*.' As a dimensionless Void must retain its formless nature, all that '*takes form*' must be constructed out of 0D points, maintaining their formless unity in ever more complex ways. The absence of form—without need of any force or intention—continuously '*orchestrates*' the extension and expansion of form. We also experience primal 0D awareness (throughout 3D) as the basis for *our* self-centric (subjective) experience.

4D functions as the next-higher level of observer-driven (objective) consciousness. Our experience of free will is the affect of 0D/4D observer-driven consciousness on 3D geometry, biology, and psychology. The manipulation of things, thoughts, and activities in 3D requires 4D self-consciousness. If *stressful*, this is experienced as pain and suffering (psychophysiological tension).

Universal intelligence appears individuated

Every 'thing' emerges from no-thing,
including the Origin of Consciousness,
Free Will, and what 'We' experience as God.

What we attend to and how well we pay attention therefore has consequences. 4D consciousness of 3D awareness allows us to (affectively) learn ways of directing our attention. 'Free will' is utilized in evermore original, meaningful and constructive ways. With each higher dimension, there are more 0D points influencing our overall comprehension and articulation of lower dimensions. Freedom from suffering occurs (i.e., Self-realization) when 0D/3D/4D (and up) are aligned together, as a resonant synergy.

This requires 4D consciousness to '*effortlessly function through and embody*' a subjective 0D/3D 'awakeness' that has no image. Like

a mirror 4D unites, reflects, and transforms our experience of who and what we are, a universal intelligence appearing as uniquely individuating minds and bodies. By consciously sharing awareness-of-this-awakeness, the delusions of separation dissolve, awakening and enlightening our selves and all of humankind. It is truly astounding that all this has been spontaneously orchestrated.

Our unborn immortal nature (*as a void-based whole*) has evolved unique indivisible beings, and all life everywhere, adding 'us' to the future of a virtually fathomless multiverse while flawlessly clearing 'a way' for our awakening as a *newly* enlightened species.

By sharing awareness co-consciously, we awaken to who and what we truly are, an enlightening universal intelligence appearing as uniquely individuating minds and bodies.

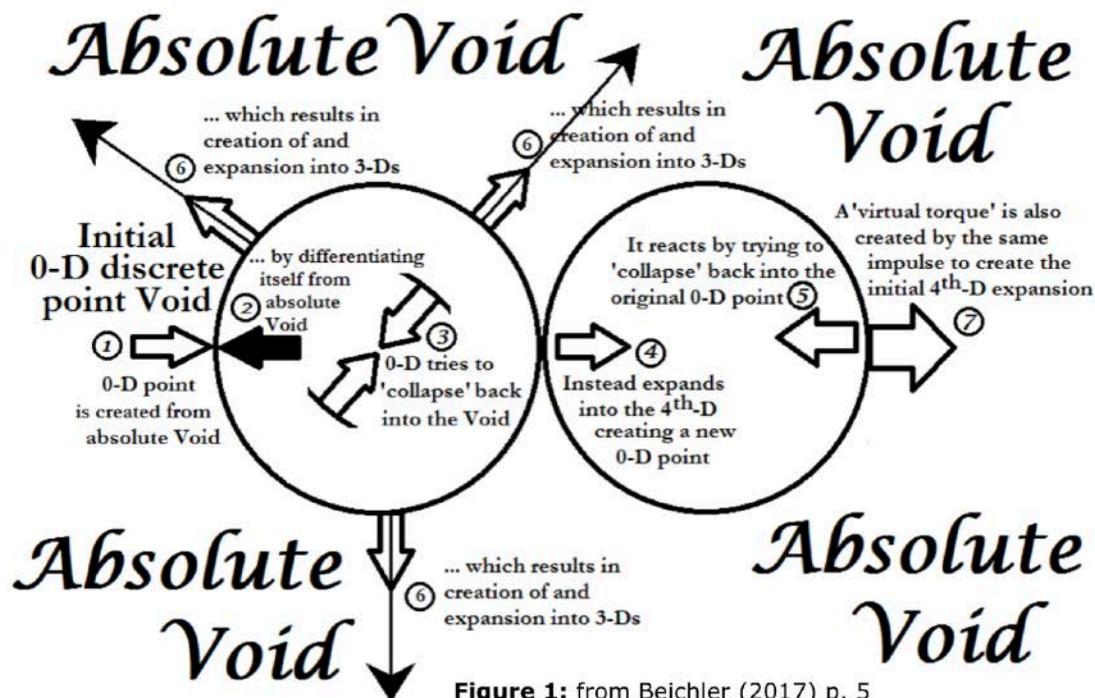

Figure 1: from Beichler (2017) p. 5

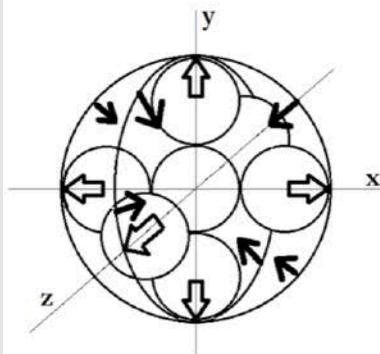

Figure 2. 0D in 3D, Beichler (2018) p. 232

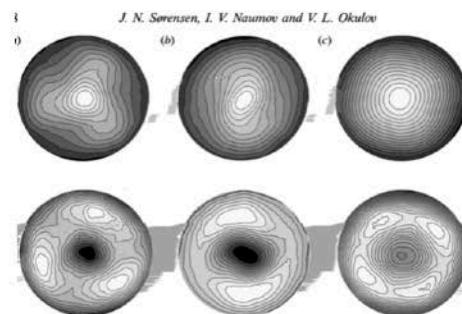

Figure 3. Sorensen (2011)

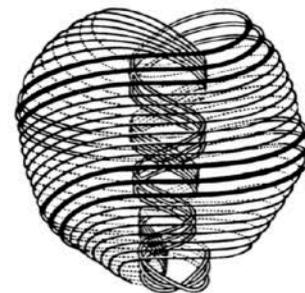

Figure 4. Murphy (2012) p. 57

To help us imagine this, a single 0D point can serve as the base of a 3D sphere as it begins to take form. By itself, a single 0D point is entirely empty of form. It cannot contain the length, width, and depth of 3D. Yet, a point has the potential for a unique point of view. As we add 0D points, let's imagine how each new 0D

point offers a unique (albeit virtual) 'bird's eye view' of all the points in this sphere including 'gradients' and complex relationships. This is primal awareness. Each 0D point is discrete yet also inseparable from every other point. In combination, 0D points can co-exist as 1D lines, 2D planes, and 3D volumes.

2D planes include 1D lines and 0D points, and 3D volumes include 2D planes, 1D lines, and 0D points. 4D includes 0, 1, 2, and 3D by being 'all that they are' as a whole. Each higher dimension includes all lower dimensions. If we remove the virtual fields and potential forces between and among all these points, we would still have a dimensionless Void.

Our 4D point of view is a 'concentrate' of 3D. It co-exists 'through every 0D point' and throughout 'the whole of 3D.' All possible points of view in 3D are being summarized from many more points of view in 4D as a sequence of impressions giving 'us' a time-like experience of constant change, when actually all changes are occurring in 'an eternal now.' 3D is integrated in this 'timeless' 4D context, informing an observer with an 'explosion' of available information. 4D and 0D observe, organize, and orchestrate potential fields and forces in 3D. These 'observer-driven' processes have guided our evolution as a communion of experiences which we (can) sense as true love with mutual respect. In physics (as in spirituality) all 0D points (together) provide a 'primal virtual awareness' (a 'knowing' without knowledge) wherein 4D awareness-of-this-awareness (i.e., consciousness of awareness) 'stores' experiences (as memories) in the nonlocal 0D field, where ...

1. 0D points serve as placeholders in a geometrodynamics.
2. 0D serves no-thing whatsoever, as "off."

3. 0D is also counted as a '1' among many in 3D.
4. 0D serves as both a '0' and a '1,' (and as "on") in 4D.
5. Either/Or 'complements' Both/And.
6. Both/And is the (non-linear) centerless context for (linear) Either's and Or's.
7. 0D/4D serves self/Self/no-Self-awareness.
8. Linear and non-linear, local and nonlocal potentials equilibrate together, held to a zero sum gain.

These (ubiquitous) early forms of sentience become the recreative 'axis' for all life, within what is unbounded, immeasurable, and indivisible. Sentient biological lifeforms are formed via self/Self/no-Self-awareness. 0D/4D also serves as a primordial rest-frame which no 'thing' can move relative to. A 0D/4D (5D/6D, etc.) rest-frame literally does not move in any conventional physical sense, as it is both no-where and/also every-where. 0D is "in the world but not of it." Through 0D/4D, an absolute Void 'plays many incomparably unique 'parts,' passively 'supporting' all the many countless forms of physical manifestation. 0D (in 3D, 4D, and higher dimensions) serves as the "Unmoved Mover" of 'All that Moves' in our universe. 'No-thing' can appear to transform into 'being something' then return to 'being nothing at all' without changing 'its' essential nature.

Self, self no-Self

In physics (as in spirituality)

All 0D points (together) provide a 'primal virtual awareness' (a 'knowing' without knowledge) wherein 4D awareness-of-this-awareness (i.e., consciousness of awareness) 'stores' experiences (as memories) in the nonlocal 0D field, forming and unforming sentient biological lifeforms. via self/Self/no-Self awareness.

"Last summer I met and began working with an intuitive and NDE experiencer, Sperry Andrews. He has some very interesting and informative ideas on how the universe works, i.e., the physics of the universe in its wholeness, and has been of great help with me in furthering my own research." - J. Beichler's email to Richard Amoroso, August 17th, 2017

In this way, formlessness unites form, as *'form expresses formlessness.'* 3D is the most dense. It comprises 1D length, 2D width, and 3D depth. When we share this 3D context consciously, as one consciousness, there is an implosion of our complexity which (ideally) results in an explosion of meaning, love, compassion, joy, and enthusiasm for life. We are capable of sharing a common observer, of being awake as both one and many in an ever-present 'now.'

There's only one 'us.' Given these points-to-view, everything is separate yet also not separate. In fact, we are *'nudged'* to see all things as new. If we do not, we *remain* (karmically) 'bound to awaken' gradually, as every physical system participates in the reunification of creation. We 'make all things new' and can experience 'this' re-creation-of-creation as an intersubjective, planetary, and/or cosmic evolution.

By attuning our perceptions (both internally and externally) to consciously perceive everything as a by-product of our consciousness, we (can) experience our Void-like nature as 0D throughout 3D as a 4D observer of it all. We (can) realize we are every 'thing,' every 'one,' any 'one,' and no-one-thing in particular, going no

'where' and every 'where' forever as who and what we all are, unborn, and that which cannot die. Self-realization can reliably fulfill 'lifetimes of yearning' for an everlasting love.

"The practice of Dzogchen is said to be 'beyond effort, and indeed one does not need to create, modify, or change anything, but only to find oneself in the true condition of 'what is.'" - Chogyal Namkhai Norbu Rinpoche (1996) p.101

Intersubjectively, 'love' offers an optimal way of 'making sense.' It can help 'us' experientially explore (ways of orchestrating) otherwise disconnected aspects of this single field of interdependent potentials: i.e., sensation is a 3D 'revelation' to our observer-based 0D/4D rest-frame. 0D/4D in turn unites, receives, reflects, and reproduces the potential for our genuinely loving feelings which make 'our world go ~round.'

As yet another 0D point, 4D is a property of every 0D point in 3D. 4D is to 0D what self-awareness is to primal-awareness. 4D is 0D's self-awareness. 'Nested' layers allow an unlimited number of dimensions to function together as a whole. The Void cannot be divided against itself as there is no-thing to divide, but as form, formlessness is infinitely divisible.

Quantum mechanics only provides probabilities for the different possible outcomes in an experiment, but no mechanism to produce an observed result. In this model, observational measurements (OM) are (virtual) dimensional, spatiotemporal, energetic, and material structures which result from 0D/4D observations. OM re-generates, re-visits, and re-members re-uniting what was with what could be—as what is. Formless (all-D) observations, at every dimensional level, allow for an ever-evolving re-creation of forms to remain fundamentally undivided. This is why our sense of consciousness is ubiquitous.

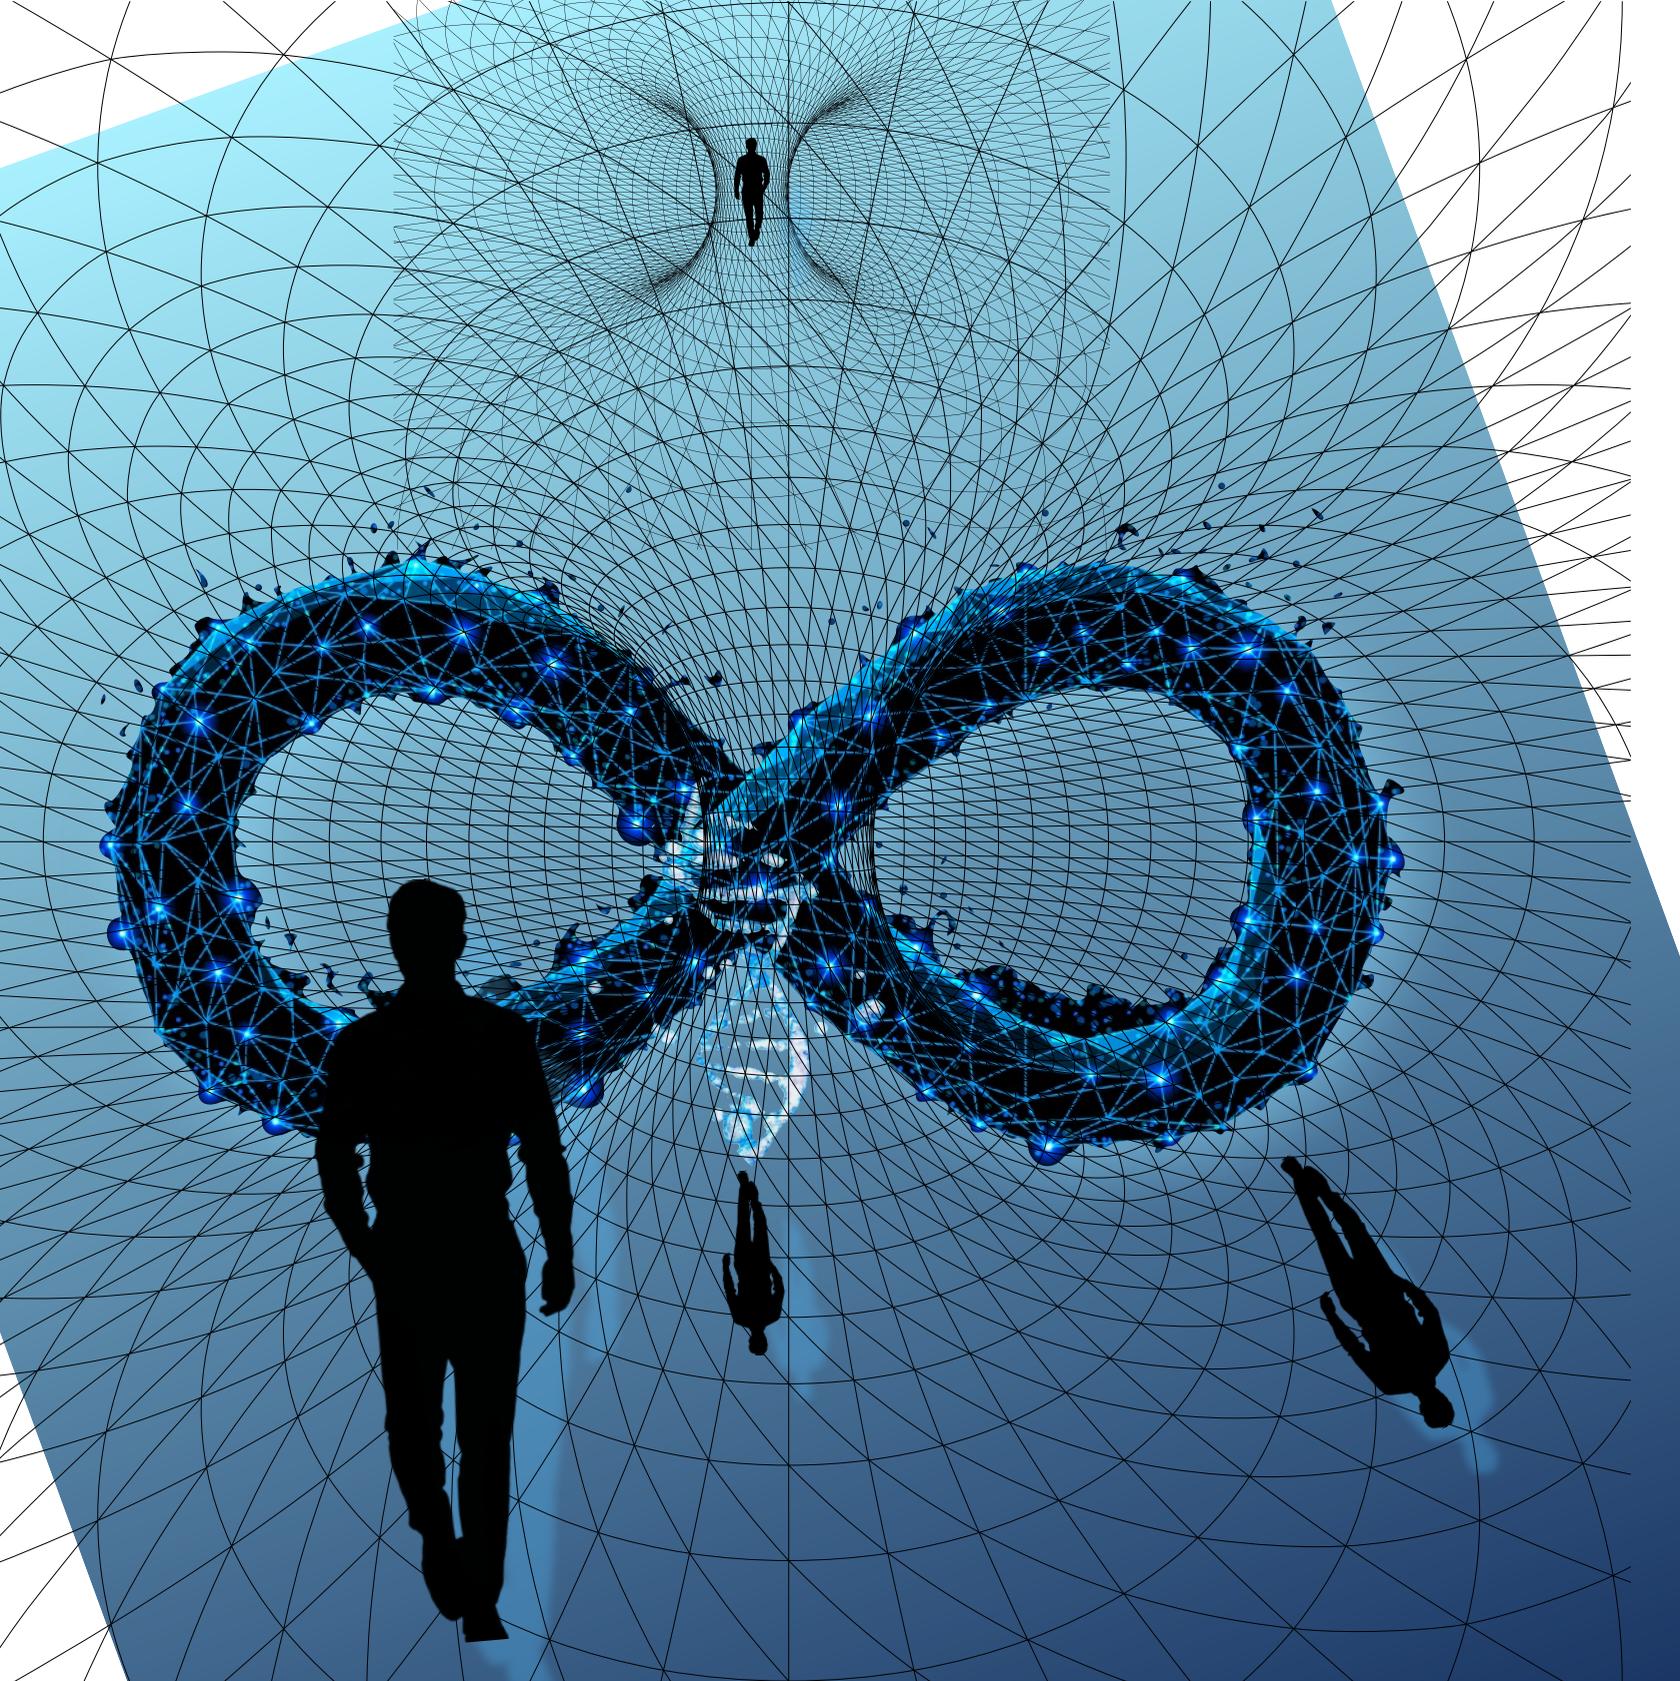

We are continuously, as well as discontinuously, uniting and re-uniting all the countless forms produced by our sense perceptions, memories, and imaginations by being indivisible as an ever-present context of consciousness. Our identification with the form of our experience can be considered a 'necessary' (karmically consequential) 'mistake' that is helping us learn to awaken from the 'dream of form' through (seemingly) suffering the loss of our spiritual freedom. What a marvelous 'tool' to help us explore and experience something that is (*actually virtually*) no-

thing whatsoever by collaborating co-creatively on comprehending 'this' commonly sensed reality. OM has allowed the physical world to expand incrementally at an ever-increasing rate by adding spatiotemporal, energetic, and material measurement structures that sustain the evolution of a single field.

As every self-aware 4D point in 5D shares a single polar point in 6D, this sixth dimension of space is a step closer to a cosmic universal consciousness of 'all that is,' to a supreme way of being all-knowing, ever-present, and all-powerful. Might such a being, or beings, currently co-exist together in an eternal now? The capacity to unite 'what is,' just by seeing what is so, is a property 0D *has to offer* as the extension of an absolute Void. The primordial presence of 0D enfolds (and unfolds) its layers via 'cells and selves,' forces, fields, and particle-like potentials throughout 'all that is,' as 'all that is.' 4D observation extends 0D to become a spatiotemporal continuum wherein each of us is a 'microcosm.'

"Consciousness acts through the individual discrete quantum points (Andrews' 0-D point Voids) to co-create our three-dimensional experience of space..." - Beichler, (2017 p. 10

"Nothing was divided and there is nothing to unite. The real does not begin; it only reveals itself as beginningless and endless, all-pervading, all-powerful. immovable prime mover, timelessly changeless." - Sri Nisargadatta Maharaj

Different Possible Outcomes

Quantum Points

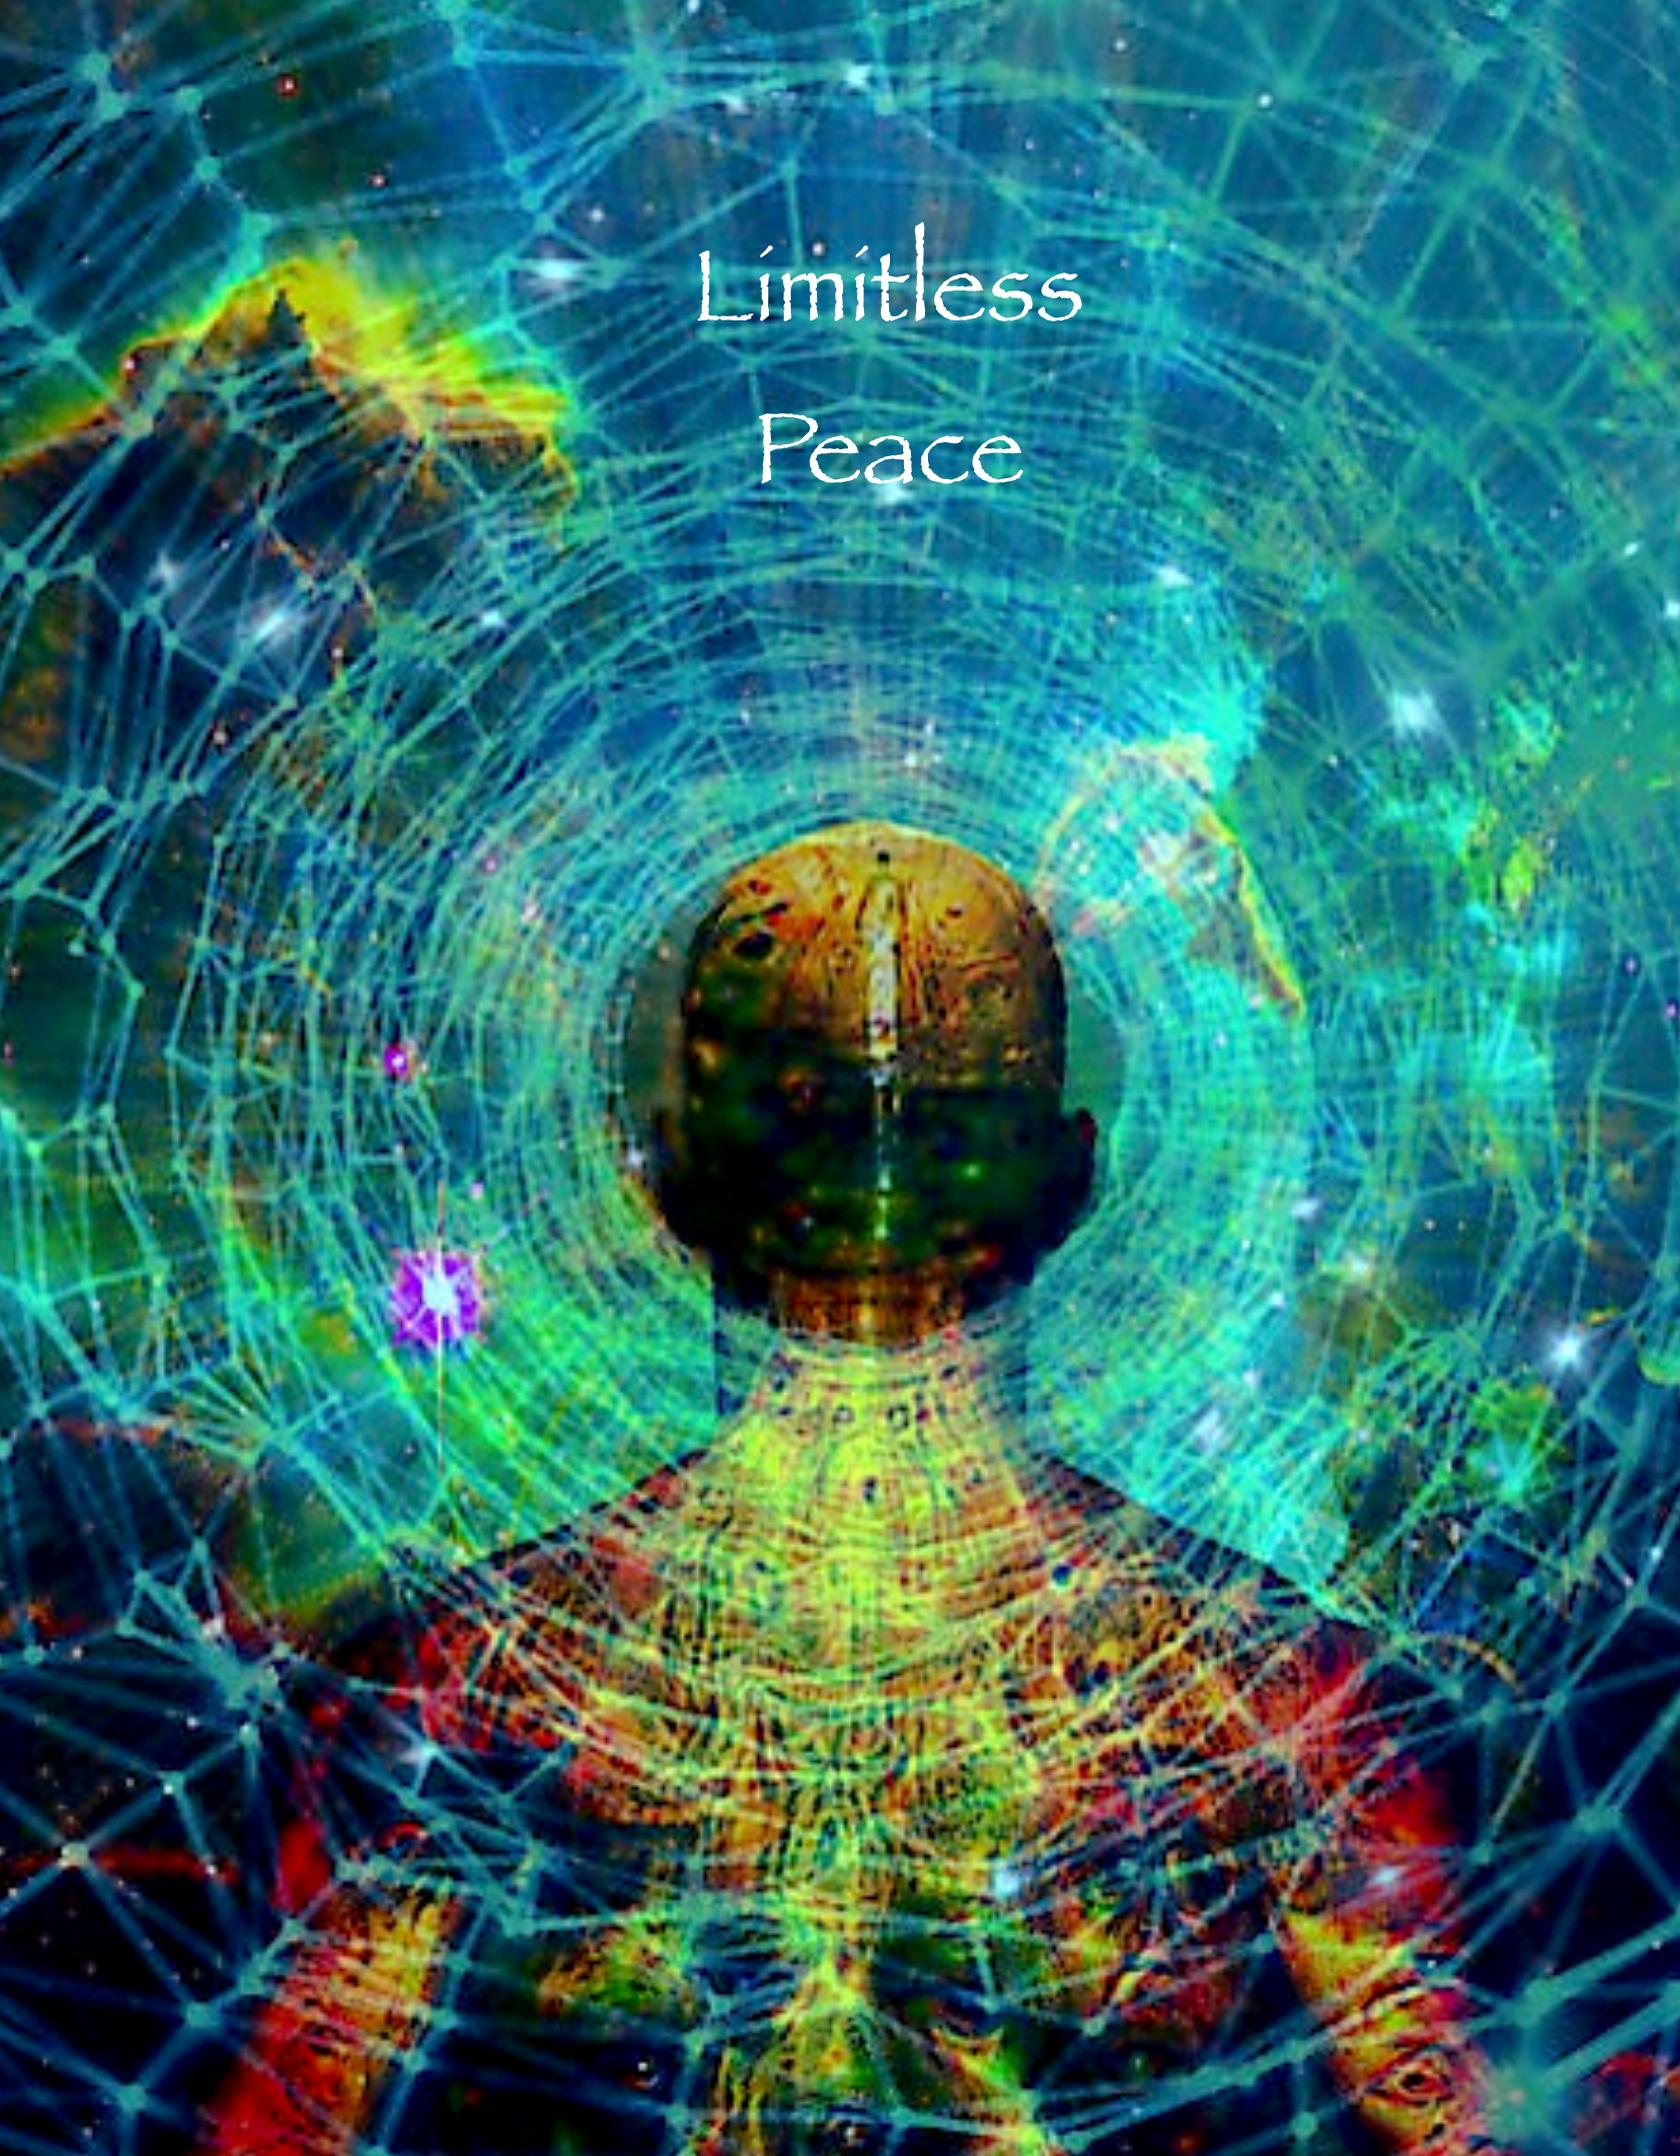

"...Consciousness acts through the individual discrete quantum points (Andrews' 0-D point Voids) to co-create our three-dimensional experience of space..." - Beichler, (2017 p. 10

Every 0D point in 3D space co-exists in every moment of time, as a timeless context wherein every 'thing' and every 'one' is being renewed. We (can) choose to (*choicelessly*) perceive what changes, because we are what does not change. As self/Self-organizing 0D/3D/4D (and up) systems, we are not random. For example, 0D/4D allows us to have near-death experiences (NDEs), explore outside our bodies (OBEs), 'rest' between lives (LBSs), reincarnate, remotely view, have spontaneous remissions, phantom DNA affects, technological as well as non-technological teleportation,

telepathy, time travel, self/Self/no-Self-realization, including individual and global collective species-wide enlightenment. We (can) recognize that sharing 4D observation unites us, as it frees 'us' from our apparent isolation. As every point in 4D unites all 0D points in 3D, while every point in 5D unites every 0D point in 4D, we (can) realize this virtual 'structure' is self/Self-focusing. 4D consciousness of formless 0D awareness 'releases us' from what we have been 'mistakenly identified' with. An eternal receptive/reflective 'now' makes our personal and mutual awakening inevitable.

Limitless
Peace

CONSCIOUS EXPERIENCE

"Nirvana is a state of pure blissful knowledge. It has nothing to do with the individual. The ego or its separation is an illusion. Indeed in a certain sense two "I"s are identical, namely when one disregards all special contents – their Karma. The goal of man is to preserve his Karma and to develop it further... when man dies his Karma lives and creates for itself another carrier."
Schrödinger (1918) quoted (1994) by Walter Moore

Subjectively, an effective way to view consciousness is as a superposition of nonexistence and existence, experiencing our 'nonlocal (4D) being' as 'local (0D/3D) observers.' This allows for a unity we (can) sense 'telesomatically' as a species. Through mutual understanding, collective mindfulness, collaborative activities, and sharing a commonly sensed consciousness, we can co-create a world which works for everyone.

From 'my' experiential research, involving hundreds of multi-cultural groups internationally, I have found whenever self-selected participants experientially notice the quality and presence of awareness as a group, a profound peace unfolds throughout everyone's body, heart, and mind. We spontaneously rediscover an ever-present, all-knowing, all-powerful

'presence' through our perceptions of a formless, timeless, witnessing 'absence' (as a dimensionless Void) which flawlessly re-unites all that can change by being indivisible and unchanging. 'This is' a vitally alive way of being never the same way twice, always awed by co-existing as every 'thing,' while intimately experiencing that 'we are' *effortlessly* re-inventing our 'selves' through our moment-to-moment mutual understanding of 'our own' eternal nature. By cultivating this '[Self-perfecting Dzogchen practice](#)' (1), we collaborate on cultivating a capacity for Consciousness via whatever form 'it' assumes.

Consciousness has been described as that which is limitless. It is impersonal and it is what is most personal about 'us.' It appears to be formless, yet it's what we are.

The ever-changing content of our lives can distract 'us' from the presence of awareness.
Awake as awareness we re-connect with what we have not yet fully felt or understood.

As mortal creatures who have survived and thrived by defining personal boundaries and defending our chosen physical and psychological territories, we have attended to 'our' things, thoughts, and activities, to who we think and feel we are. As a result, we've developed the habit of feeling separate and isolated, preferring to pay attention to what is pleasurable and promising while withdrawing our attention from what is painful and threatening. We (may) have been objectified from an early age as a little boy or girl, as though we were another thing or thought. Traumatic threats to our security have come to 'us' through our most intimate relationships. The ever-changing content of our lives can distract 'us' from the presence of an awareness that reunites us with what we have not yet fully felt or understood. If awareness becomes *overly* structured by imagery, it can become opaque and narrowly constricted.

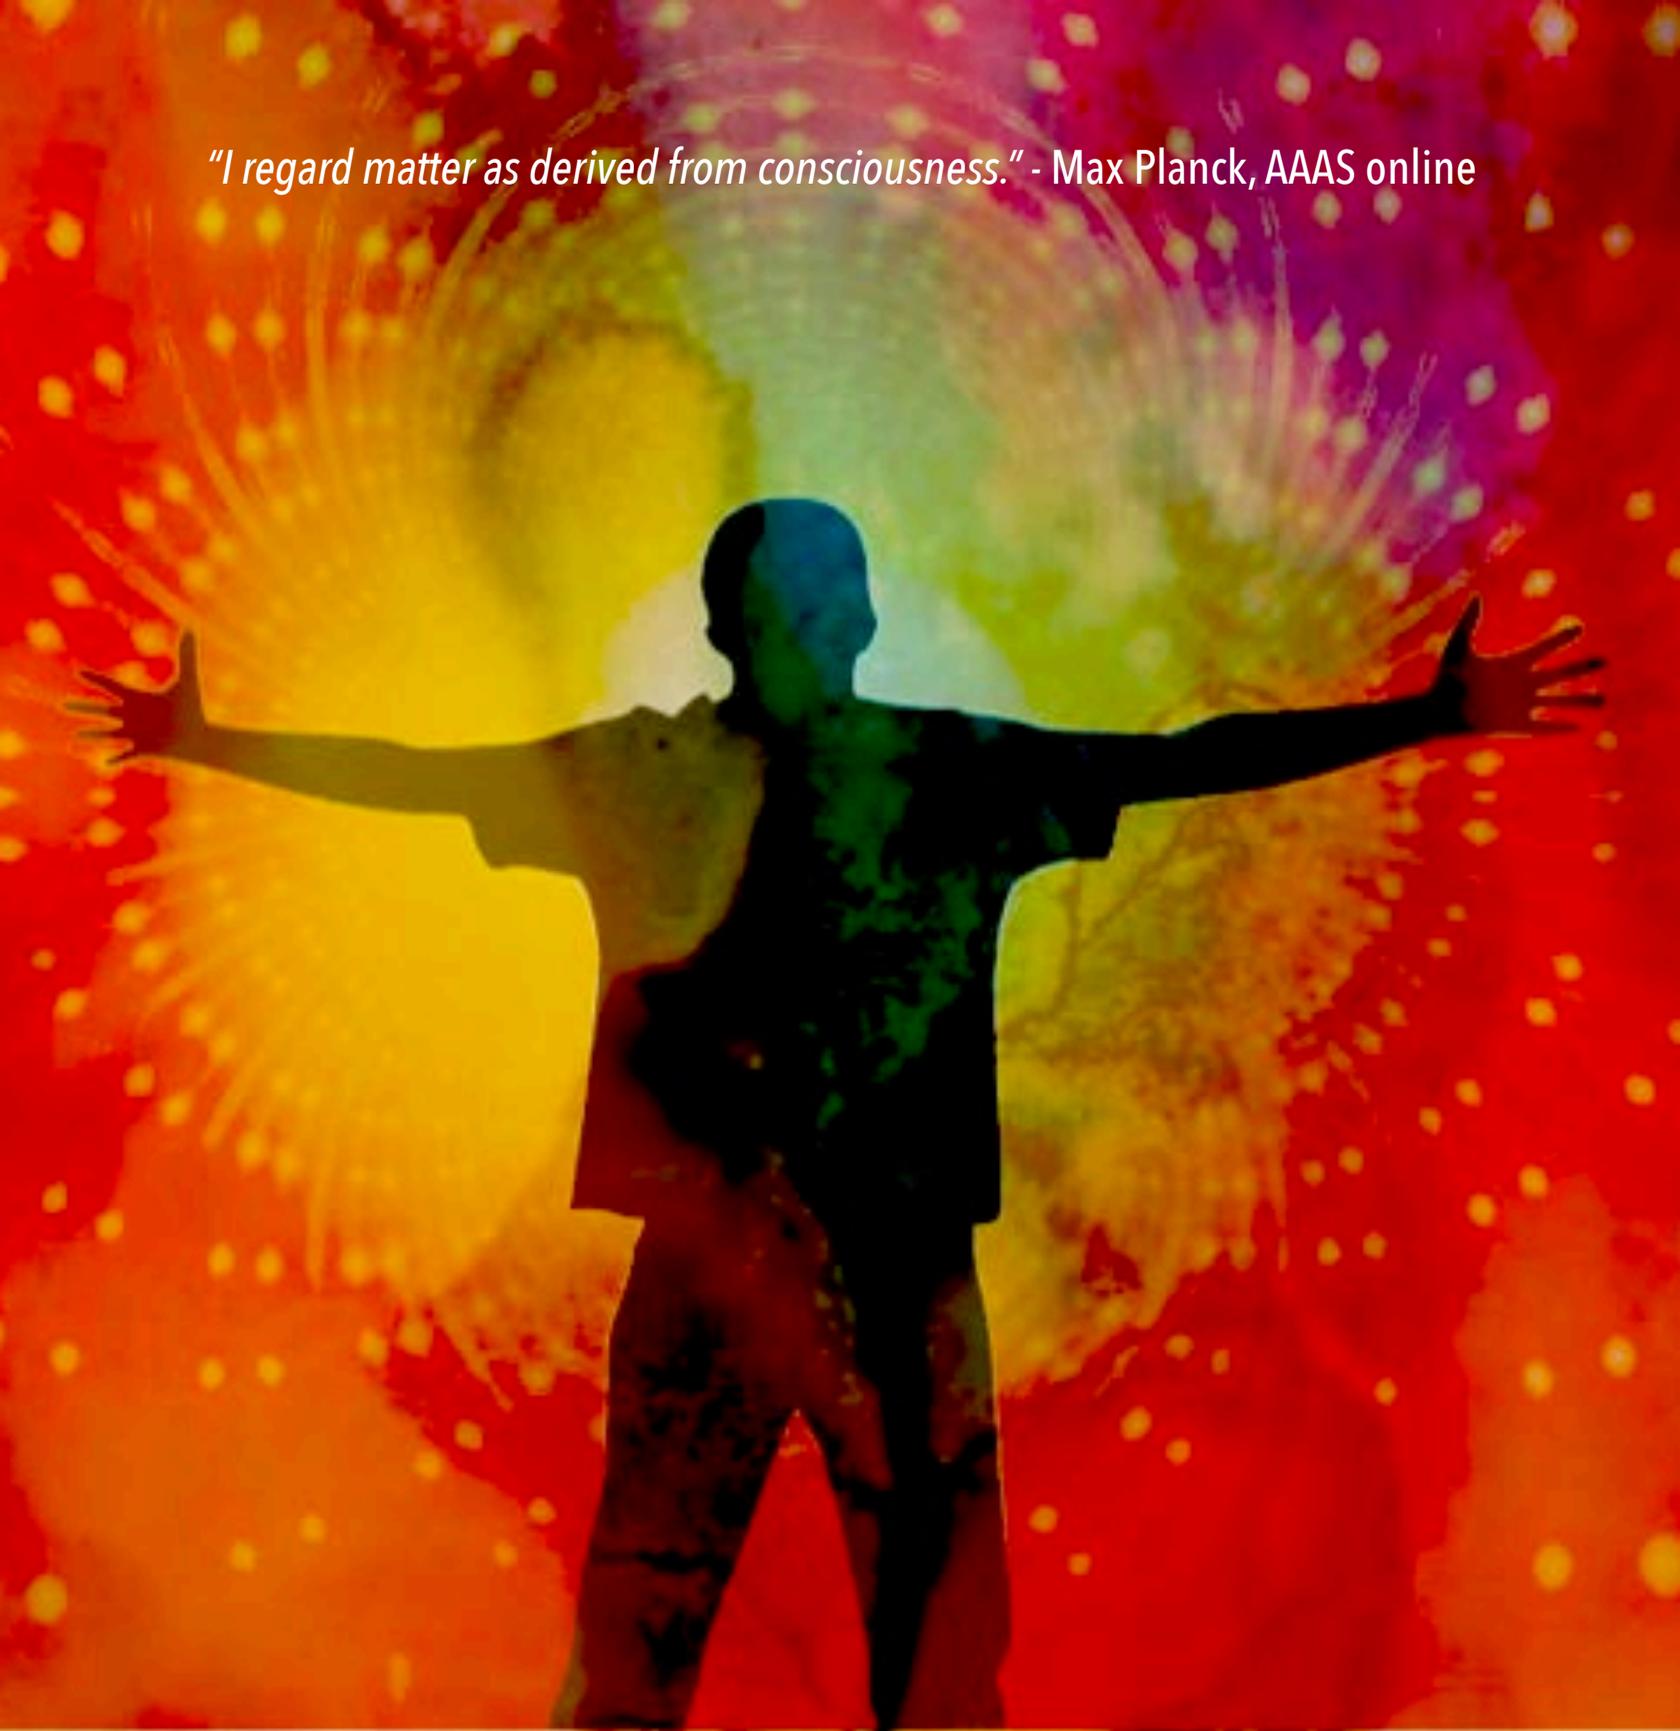

We cannot know true freedom if we are suffering from an overactive imagination. Experientially being, seeing, feeling, and sharing awareness (*itself*) inclusively, within, between, and among our 'selves,' eliminates these fears of not feeling whole and holy. Still, without devoting sufficient time and attention, we cannot expect to

realize how utterly simple and peaceful we are capable of being together.

We may spend a lot of our time as *awareness* trying to achieve and/or get what we think we want. We can 'try' to avoid what seems frightening. But these goals (can) remain forever out of reach. Like a child ready for sleep, we clutch at straws to stay in control, when what we need is to rest in the arms of the infinite.

There is a world of difference between never really 'knowing' awareness and intimately experiencing it as wholly integrated with everything else. We (can) use awareness to form ideas about 'what is,' yet rarely give adequate attention to the quality and presence of awareness. If we take 'awareness' for granted (unconsciously) this ensures an imbalance. We (can) search endlessly for our integrity in what we own, what we think we know, or may be able to obtain in the future. We (may) 'think' we already 'have' awareness. Though, unless we are consciously aware of being 'it,' we have not integrated it into our life. We (may) blindly believe we have to earn whatever we do not already have, only to lose our 'selves' by searching for our 'selves,' through activities, ideas, relationships, and our chosen professions.

"I regard matter as derived from consciousness." - Max Planck, AAAS online

A commitment to being awake-as-awareness, between-and-among, and within our 'selves' reliably unknots the countless fears created (unconsciously) over a lifetime.

Unified Consciousness

These many ways of 'immersing' our awareness do give it structure, but never the '*structureless structure*' it requires, which it - alone - *has* to offer to itself. A commitment to being awake-as-awareness between-and-among-and-within our 'selves' reliably *unknots* the countless fears created (*unconsciously*) over a lifetime. Once awareness is allowed to be conscious of itself, every aspect of our integrity with others, our

purpose, and the joy of simply being is soon found. Our awareness can be compared to the white light of a projector illuminating a colorless movie screen. Being awake as awareness allows us to dis-identify with the images on the screen of our consciousness. What might otherwise be felt as threatening and painful, becomes fascinating and fulfilling. It is thrilling to share this quality of awareness.

In life, there is ultimately no escape or spiritual bypass. Once awake as awareness in an undivided wholly-embodied way, not only individually but together, everything we have withdrawn our attention from eventually shows up to be felt and sensed, to receive its due of undivided attention. When we pay attention as a group, what we experience depends entirely on how well we pay attention to the quality and presence of awareness itself. When we participate in a [gathering](#) ⁽²⁾ and return home, we (may) continue to encounter what we have avoided in our lives. Unresolved feelings, confusing thoughts, fears of the future, misunderstanding our true purpose, and so much more, can be 'intimately' met and consciously integrated. Through these experiences, we learn to be grateful (together) for our fears

and the countless unpredictable surprises that lie in wait for us. From sharing these group experiences, participants are better able to connect with themselves and one other.

I've worked with in-house and external consultants from the Fortune 500 companies in the New York City chapter of the World Business Academy. In Europe, I've guided groups of people whose language I did not speak, with interpreters on either side of me; interpreting from English into their language on one side, and then back into English on my other side. It's been uplifting and profoundly educational to experience how effortless and yet immensely challenging it is to 'open us up' to the deepest depths of an *already* unified consciousness.

"Consciousness is never experienced in the plural, only in the singular. Not only has none of us ever experienced more than one consciousness, there's also no trace of circumstantial evidence of this ever happening anywhere in the world" - Schrodinger (1984) edited by Ken Wilbur

Autobiographical Sketch

When I was thirty-two, after a year of living in Western Australia, I moved to Hobart, Tasmania. I was then at the same latitude South as my birthplace was North. The presence of Antarctica taught me there can be radiant cold.

Its icy presence pierced my bones until it seemed like they could snap. I took a plane up the coast to Cairns, North Queensland, and found a free ashram in Mount Molloy - up in the tablelands - run by an English couple. They gave me a garden shed to live in on the edge of their property where I could meditate without being disturbed.

I felt an overpowering need to do absolutely nothing other than be awake and aware. When taking walks out into the bush, I'd sit for long stretches. The more still I became inside, the more Nature was alive within and around me.

A couple of months passed and I settled down. One night I was reading a passage from Jiddu Krishnamurti

wherein he suggested to make "*no effort.*"

I felt compelled to experience effortlessness.

By the next morning, having laid awake all night, without the need of sleep, a turgid cloud of psychic matter gathered in front of my face - a few inches away. It seemed to contain all that I had withdrawn my attention from, all of what I had not been conscious of until then. It was awesome to be hallucinating my 'disowned' self. I'd never experienced anything like this before.

There was a mental/emotional, as well as physical desire, to turn away from 'it.' By sustaining effortless awareness - within the space of a minute or two - the cloud dissolved into the awareness I was witnessing it with. Free from what I had hidden from, who and what I knew 'my' self to be became infused with the radical presence of impersonal awakenss.

"Who's There"

I was not any one thing, yet I was this universe,
unfolding as a spaceless timeless awakens.

Everything was made of this one consciousness.

This continued throughout the day and into the night. And then suddenly, as if by magic, I lost all limitations, becoming an unbounded Void, seemingly the source of all possibilities and potentialities, without beginning or end.

Everything was made of this one consciousness. Sounds outside my body also seemed to come from inside of me. There was not one place within that did not contain everything and nothing.

The most serene bliss came over every cell in my body and heart. My mind was utterly silent. I was indistinguishable from all I was perceiving. I was not any one thing, yet I was this universe, unfolding as a spaceless timeless awakens.

Stepping outside into the night, I decided it was as good a time as any to go look at a used car I'd seen in the paper.

The owners lived over an hour away and I had no phone to call them. I decided to do something I'd not done since I arrived. I walked to the one and only road, to hitch a ride to a phone. At eight or nine at night, standing on the side of an empty road,

there were no cars. The moon and stars were high overhead, yet they felt every bit as much inside me too.

Throughout all this, there were no thoughts, only direct perceptions. I felt and saw the moon was as much in my knee as it was in my heart and hands. There was a distinct sense that the whole universe was within every part of my being - this vast formless featureless awakens.

It was then I saw a car's headlights in the distance and I had one of my first and only thoughts. I wondered, innocently, wouldn't it be nice if this person stopped their car, picked me up, and took me to Atherton - an hour away.

The car approached and its brakes engaged, bringing it - skidding on the dirt - to a sudden halt next to me. A small Japanese woman rolled down her window, seemingly disoriented. "*Where are You going?*" she asked. When I told her, she added that she lived just up the road, but she'd take me (two hours out of her way). It was uncanny, though it felt right somehow. Once in the car, I could feel her sensing the effect of our presence.

"Heart at Your Door"

As she started to drive, she asked: *"What are you doing?"* I answered, saying: *"I'm just noticing, I am everything I'm conscious of."* Energetically, I could feel her recognize our combined consciousness. All she said was, *"oh."* Then there was only one of us. We both clearly sensed the sound of each others' words actually arising from within our common body.

She told me how frightened she had been of everyone, as her husband had brought her here from Japan to live and she knew no one. That her neighbor from time to time would take care of her newborn baby. She explained how she suffered terribly from thoughts of her neighbor intending harm to her child.

Asking, did I think it was true or not? I said I did not sense it was, and we entered into a deeper peace together.

We maintained a unified consciousness all the way to Atherton. Before dropping me off, we stopped and shared something to eat while we waited for the car owner to come get me. She and I agreed to meet again in a few days time and said good night.

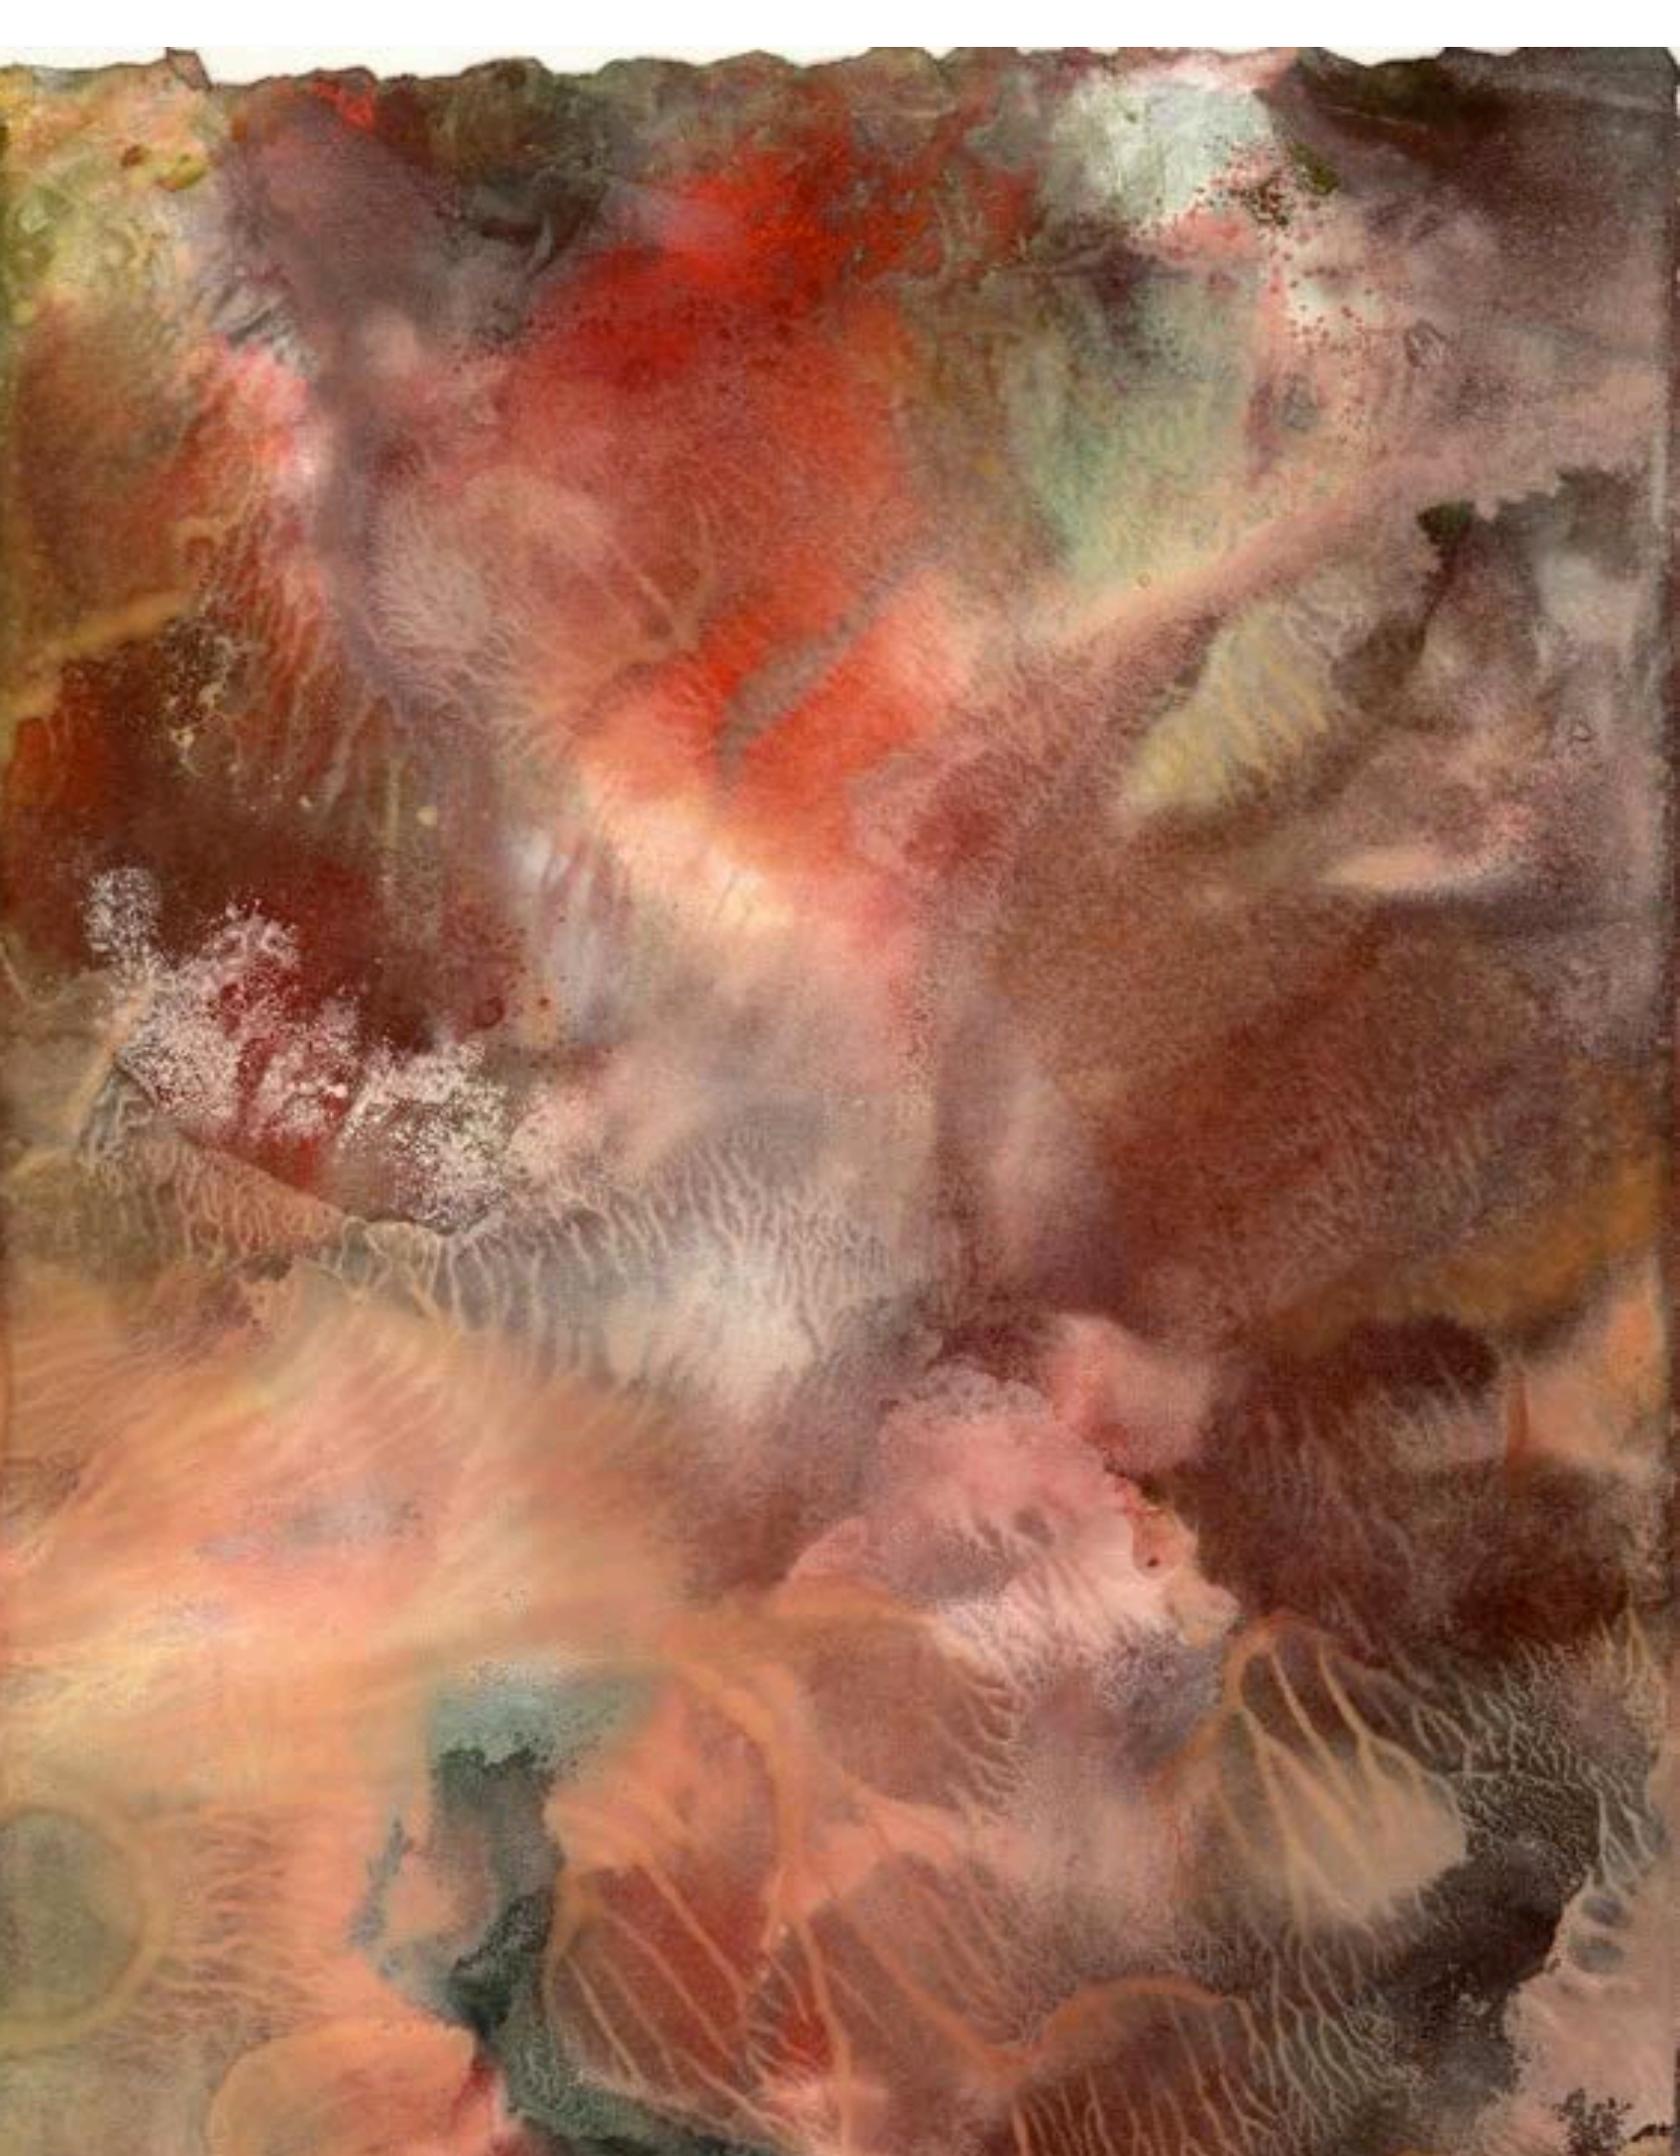

The couple selling the car invited me to spend the night. It had been a forty-mile round-trip to come and get me.

Back at their home, they sat me down and started sharing their deepest conflicts. She said he kicked their cows. Then asked, what did I suggest they do about it. Both of them were on the edge of their seats hanging on my every word and movement. I had certainly never experienced anything like this, yet it flowed so effortlessly. I was acceptance itself. Reflecting their dilemma seemed to bring clarity and they felt remarkably resolved.

It was after 11 when they showed me to a room with a bed. When I closed my eyes, I did not sleep. It was like being the night sky - light years in every direction - but instead, there was only the sparkling beauty of pure objectless consciousness. The night passed without dreams as if time did not exist. When I opened my eyes again, the manifest universe re-appeared around me.

This quality of experience lasted for several days. I found I could move in and out of 'it' by noticing I was everything and everyone I was witnessing - or not.

"Emotion"

A week later, I was no longer in this consciousness. I was back to being just a separate self again.

The Japanese woman came over to take me out to lunch. She was so tense, it felt like she was electrified with fear. To make a long story shorter, we were not able to communicate the way we had and, eventually, she became so scared she could not stand to be around me.

I had to hitch a ride 'home.' The insecurity of being 'unconscious together' seemed almost unbearable for her. It saddened me.

The difference between that one night and this day a week later was astounding. I was so profoundly moved by how she had picked up a total stranger - a 6'2" man nonetheless, on a lonely road at night - to drive him two hours out of her way. The only difference was the quality of 'my' consciousness. If I had been more awake, she would have been able to relax.

I unmistakably realized from this experience I was wholly responsible for ending fear in relationship. That how awake I am is more important than anything else I might do or say.

"A human being is part of the whole, called by us "universe," a part limited in time and space. He experiences his thoughts and feelings as something separate from the rest - a kind of optical delusion of his consciousness. This delusion is a kind of prison for us, restricting us to our personal decisions and to affection for a few persons nearest us. Our task must be to free ourselves from this prison by widening our circle of compassion to embrace all living creatures and the whole of nature in its beauty." - Einstein (1967) p.136

"Dawn on Neptune"

"There is the body. Inside the body appears to be an observer and outside - a world under observation. The observer and his observation as well as the world observed appears and disappear together. Beyond it all, there is Void. This Void is One for All." - Nisargadatta (1997) p. 378

Awakening Our Collective Self

Eminent physicists, Drs. Alan Guth, Steven Hawking, Alex Vilenkin, Paramahansa Tewari, and James E. Beichler agree that 'something' can come from 'no-thing.' Tibetan and Hindu adepts teach that "the essence is the Void, the real condition of the individual and all phenomena." (Norbu, p. 53) The resolution of the three great mysteries are found in our simplicity. Formlessness guides the evolution of form. The unimaginable complexity of existence rests upon our indivisible 'presence' as a primordial 'absence' that effortlessly orchestrates all of spacetime, energy and matter, mind and body. All that can change is precisely coordinated by what does not change. As the sole witness of '*all there is*,' the Void is *incomparably unique*. As a collective consciousness, the truth of what we are occurs in us and to us. We are awakening, as *both one and many*, in an eternal now. As each of us has been relatively unconscious of being consciousness, our current circumstances are largely due to our not paying attention in an undivided way as a species. The depth of our insensitivity depersonalizes, deludes, and deceives us. We are indivisible, but our false sense of a separate self has kept us from enjoying our spiritual freedom.

We are not who, or what, we imagine our 'selves' to be. Our persistent myopia confounds the unity of our consciousness. In an infinite present, inside a relative

reality, wherein every 'one' is there for every 'one' else, we would all know every 'thing' is fleeting, except what cannot change. We must know our 'selves' as a Void to be fully alive. Our ability for empathy, compassion, loving-kindness, and shared sensitivity is rooted in an absence which gives rise to our awareness. Without the constant indivisible 'reference frame' of the Void linking every point centered event, process, and geometric coordinate location, it could well be 'impossible' to be how we are. Whether we are aware of it or not, 'all of us' share a changeless context extended-and-expressed as our bodies and formed by our minds. Our creative freedom, love, and understanding appear to rely on how well we pay attention and what we pay attention to.

Not knowing who-or-what we are has physical, neurological, and psychological consequences. If we seek relief from fear and pain by clinging to insubstantial forms and mind-made ideas, we suffer. Whenever attention is allowed to become overly identified with these fragments of a greater whole a mind-made personality 'tries' to take control of these pieces of experience to create a "peace" that is missing. Yet, this trying is futile and goes on endlessly, as the mind promises to make life behave the way it imagines it '*should*.' When filled only with the knowledge of these thoughts and things our minds cannot begin to know the actual integrity of awareness.

Modern cognitive psychologists find human *"attention provides the 'glue' that integrates initially separate features into unitary objects."* Treisman (1980) This 'glue' is explored here as a self/Self-organizing affect on all physical potentials, providing a basis for distant mental interactions with living systems ([DMILS](#)). ⁽³⁾ We have largely been 'ruled' by our so-called 'conscious mind,' which (only) comprises 3 to 5%, that some say manages only 40 bits of information per second. It 'tries to control' the other 95% (the cognitive unconscious) which processes about 40 million bits of information per second.

Our 'conscious' mind is made possible by our new brain (the neocortex) which attempts to 'include-and-transcend' the 'more established' sensory/motor reptilian brain and emotional/mammalian limbic system.

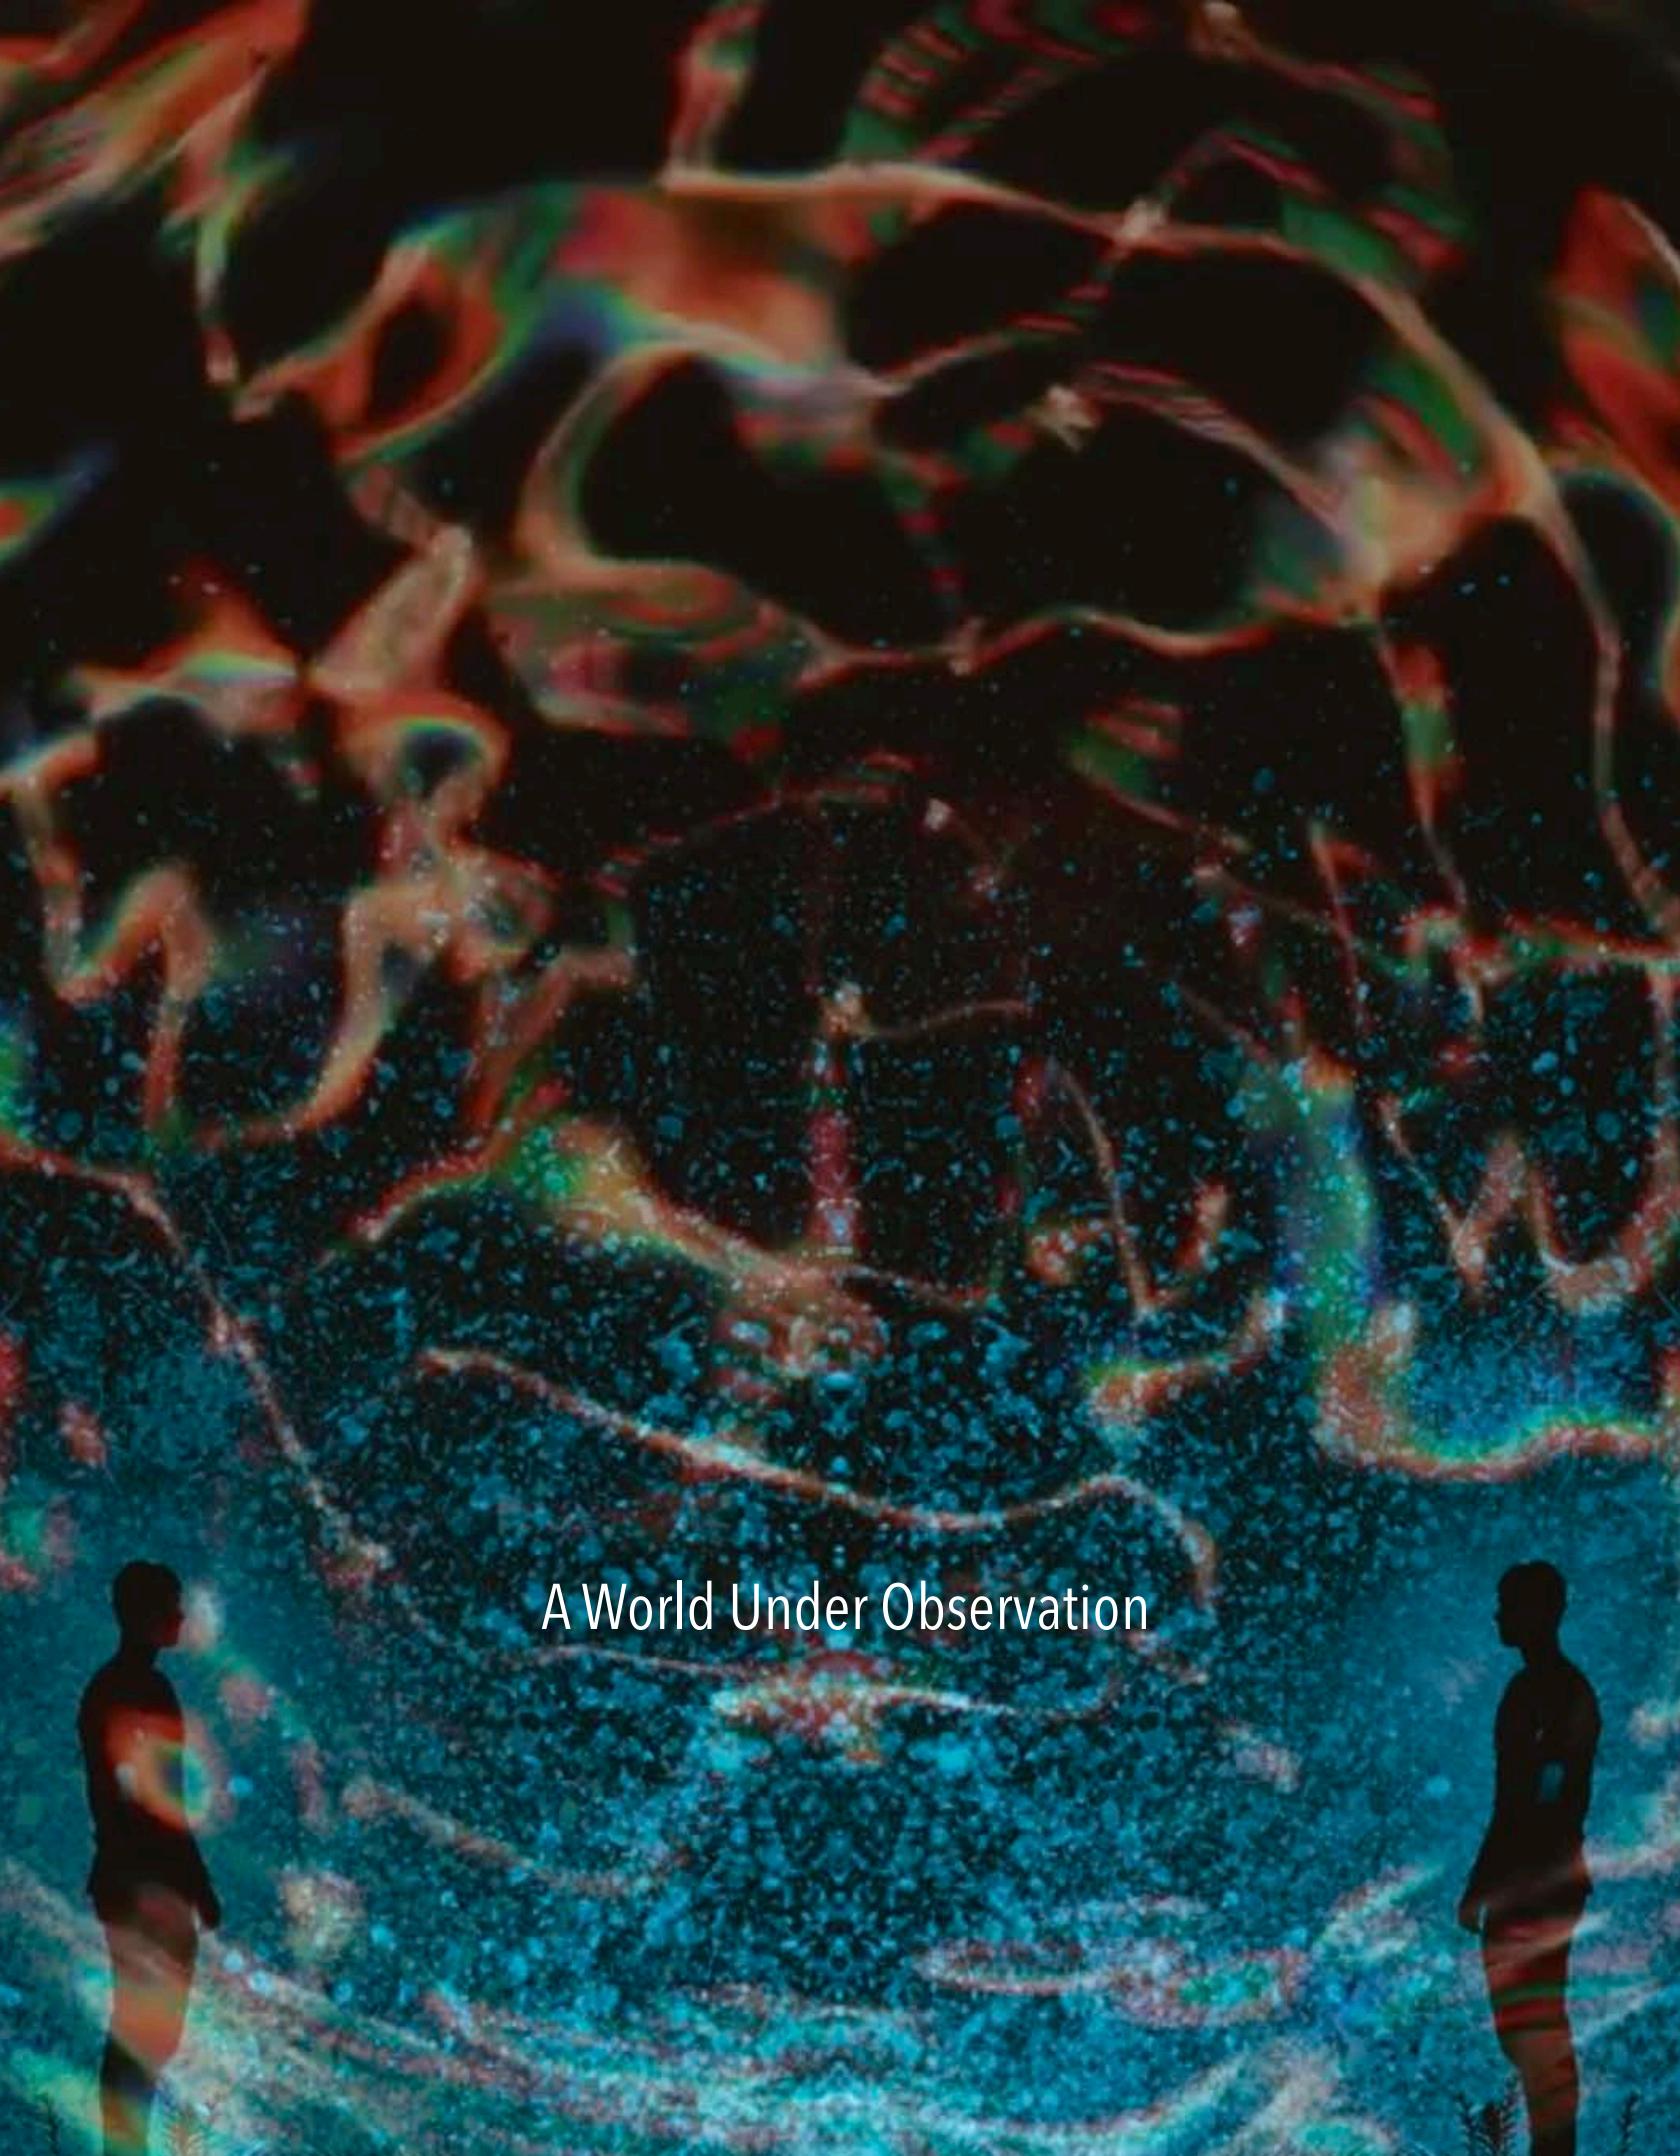

This new part of our brain is learning to make a conceptual map of everything we sense and feel. Yet, it is still a child asking its emotional 'mother' and sensate 'father' what's this mommy, what's that daddy, evaluating 'one and all' in its attempt to create a conceptual equivalent of what is being sensed and felt. Its activities (can) fixate attention on what's happening in our body, heart, and mind, obscuring our soul and eclipsing our spirit. This 'experiencer and experienced' duality is so busy it cannot hope to offer us the depth of peace we yearn for. We end up looking for our freedom (and greater meaning) in the next best thing and thought.

Glimpsing all that we can know our 'selves' to be (as an absolute Void) may seem far too terrifying to our mind-made image of our 'self' and, so, is rarely (if ever) allowed any depth of consideration. It's possible to accelerate our own awakening by sharing this process. Self-realization requires radical honesty. We can deconstruct the delusions which have been conditioned into us by our mind, family of origin, and culture.

We can cultivate a commonly sensed consciousness. The habit of 'seamlessly' being aware-of-awareness both individually-and-indivisibly in dedicated groups, via free 24/7 multilingual access on social media, in stadium events and films that unite viewing audiences, would help humanity awaken sooner.

Our void-based nature (interpersonally and as a collective) has gradually intensified our resolve to collaborate on solutions which are in evidence now throughout the world. Yet, our emergent new intelligence can also be dismissive, psychotic, and unforgiving (like the children in the movie, "Lord of the Flies") grasping at control over the greater body, heart, and mind.

The mass of humanity (the 99% if you will) is now in a struggle for survival to reign in our upper 1%. Yet, whenever our 4D mind tries to control 'life' - as a separate 'self' - we lose our integrity and instantly suffer a (false) sense of isolation. Then, avoidance of painful memories generates resistance which immediately shows up as the very pain we hoped to avoid.

A World Under Observation

Like any living creature, we are born this way as children, attracted to pleasure and averse to pain. Our false belief in a separate self is the source of virtually all of our self-loathing and adversity with others.

Our new brain has gotten each of us into a lot of trouble. Who we think we are and what we think we are doing has led us into a dead end alley. Humanity is stuck.

The good news is, we are being given no other alternative but to wake up and realign with our original source. We need to do this together, not just individually. We need to do it as a species, to return to what has made life possible in the first place, to be aware of being awareness, prior to thought.

Meditation is the living, breathing, knowing 'art' of conscious awareness supporting what we are here to realize, to be aware of being that which need not suffer and is never divided against its Self.

Plants grow by noticing. As we awaken now, we notice more each moment.

The universe is an observational measurement system. It provides the architecture for the growth of a cosmological consciousness that's reuniting the universe afresh every instant. As it incrementally expands, we (can) sense we're never the same way twice. We're total strangers to ourselves in each new moment. We have been clinging to images, to superficial ideas, and empty promises, terrified of accepting a Void that is by its very nature unknowable.

This awakening awareness which we 'essentially all are together' cannot be controlled by our fears or desires. It is that which must remain unchanged. We are that which 'nothing' can be added to and from which 'nothing' can be taken. Unless we are wholly awake together as this ever-present, all-knowing, all-powerful, mirror-like, consciousness, we will continue to suffer.

cosmological consciousness

Two hyper-rational neuroscientists have had peak experiences. Dr. Eben Alexander has been sharing his near-death experience and Dr. Jill Bolte Taylor gave one of the most popular TED-talks online about the loss of her left brain. They both had a non-linear experience of inter-connectedness.

Also, people have been operated on while their body was frozen with no possibility of any brain activity. Yet, that's when they had their out-of-body experiences. Evidently, our physical brain does not have to show any sign of life at all for there to be self/Self-aware

consciousness beyond the brain. People have gone out of their bodies and passed through walls. A woman undergoing cardiac arrest was able to say what the doctors were talking about.

She left her body and passed through the ceiling of the hospital to later report noticing a lone red sneaker on the roof.

Her doctors were astounded, as she also knew what they had been discussing down the hallway, with great accuracy, when her vital signs indicated she was dead.

Near-death experiencers often have total recall, saying 'it was' more real than anything else they had ever experienced in their lives. Is this a statistical anomaly?

How commonplace are near death experiences?

It's been a subject of scientific research for decades now, starting with Drs. Raymond Moody, Bruce Greyson, and Kenneth Ring. There have been over fifteen million near-death experiences reported in the United States alone. It is that prevalent. Given what's reported, the actual number is surely far greater.

"The peak experience, the mystic experience, the oceanic feeling, feelings of limitless horizons opening up to the vision, the feeling of being simultaneously more powerful and more helpless than one ever was before, the feeling of great ecstasy in wonder and awe, a loss of place in time and space, and finally the conviction that something extremely important and valuable has happened. That's a very good thing for a person." - A. Maslow

Abraham Maslow is known for his 'hierarchy of needs' for food and shelter, love, and nurturance. Researching our capacity for self-actualization, he only expected a small percentage of the population (maybe 5%) would have actually experienced 'this' highest level. Yet, his research revealed that 100% had these experiences.

He found that those who reported their recollections with the greatest clarity were changed the most. Highly functional people reported a transpersonal identity that superseded their physical self. In another study, involving over 40 cultures, people were asked if they had such experiences. 68% admitted to having had one or more, yet only 23% of those had ever spoken about it to anyone else for fear of ridicule, saying they worried that others would think they were crazy. Some just wanted to 'shut it away,' as they did not know what to do with it. They did not know what it meant or how to integrate it into their lives. While this is sad, it is also hopeful. It suggests that humanity as a whole can potentially free 'its Self' from 'needless' suffering. This may prove to be our greatest innate natural resource, enabling us to care for nature, and all sentient beings.

Undivided Attention

As children, we are 'restored by thoughtless (0D) awareness several times a night. In waking 0D consciousness, our attention is undivided, and our 4D mind is thrilled to behold all we are *actually* sensing and feeling (as 3D humans). We experience being intimately connected to everything, as though 'all that is' and everyone is part of our own body, heart, and mind. When we share undivided attention in groups it allows us to access a much more comprehensive and complex level of information and insight.

The whole of humanity can access this state. We *can* be collectively enlightened as a species. When we hold a child, or our beloved to our heart, we (can) share what we both are feeling together. Everyone I know loves to share this sense of belonging as one heart, body, and mind. It feels eternal, like unconditional love. We (can) realize that '*your attention and mine*' are actually always undivided, we just weren't noticing it.

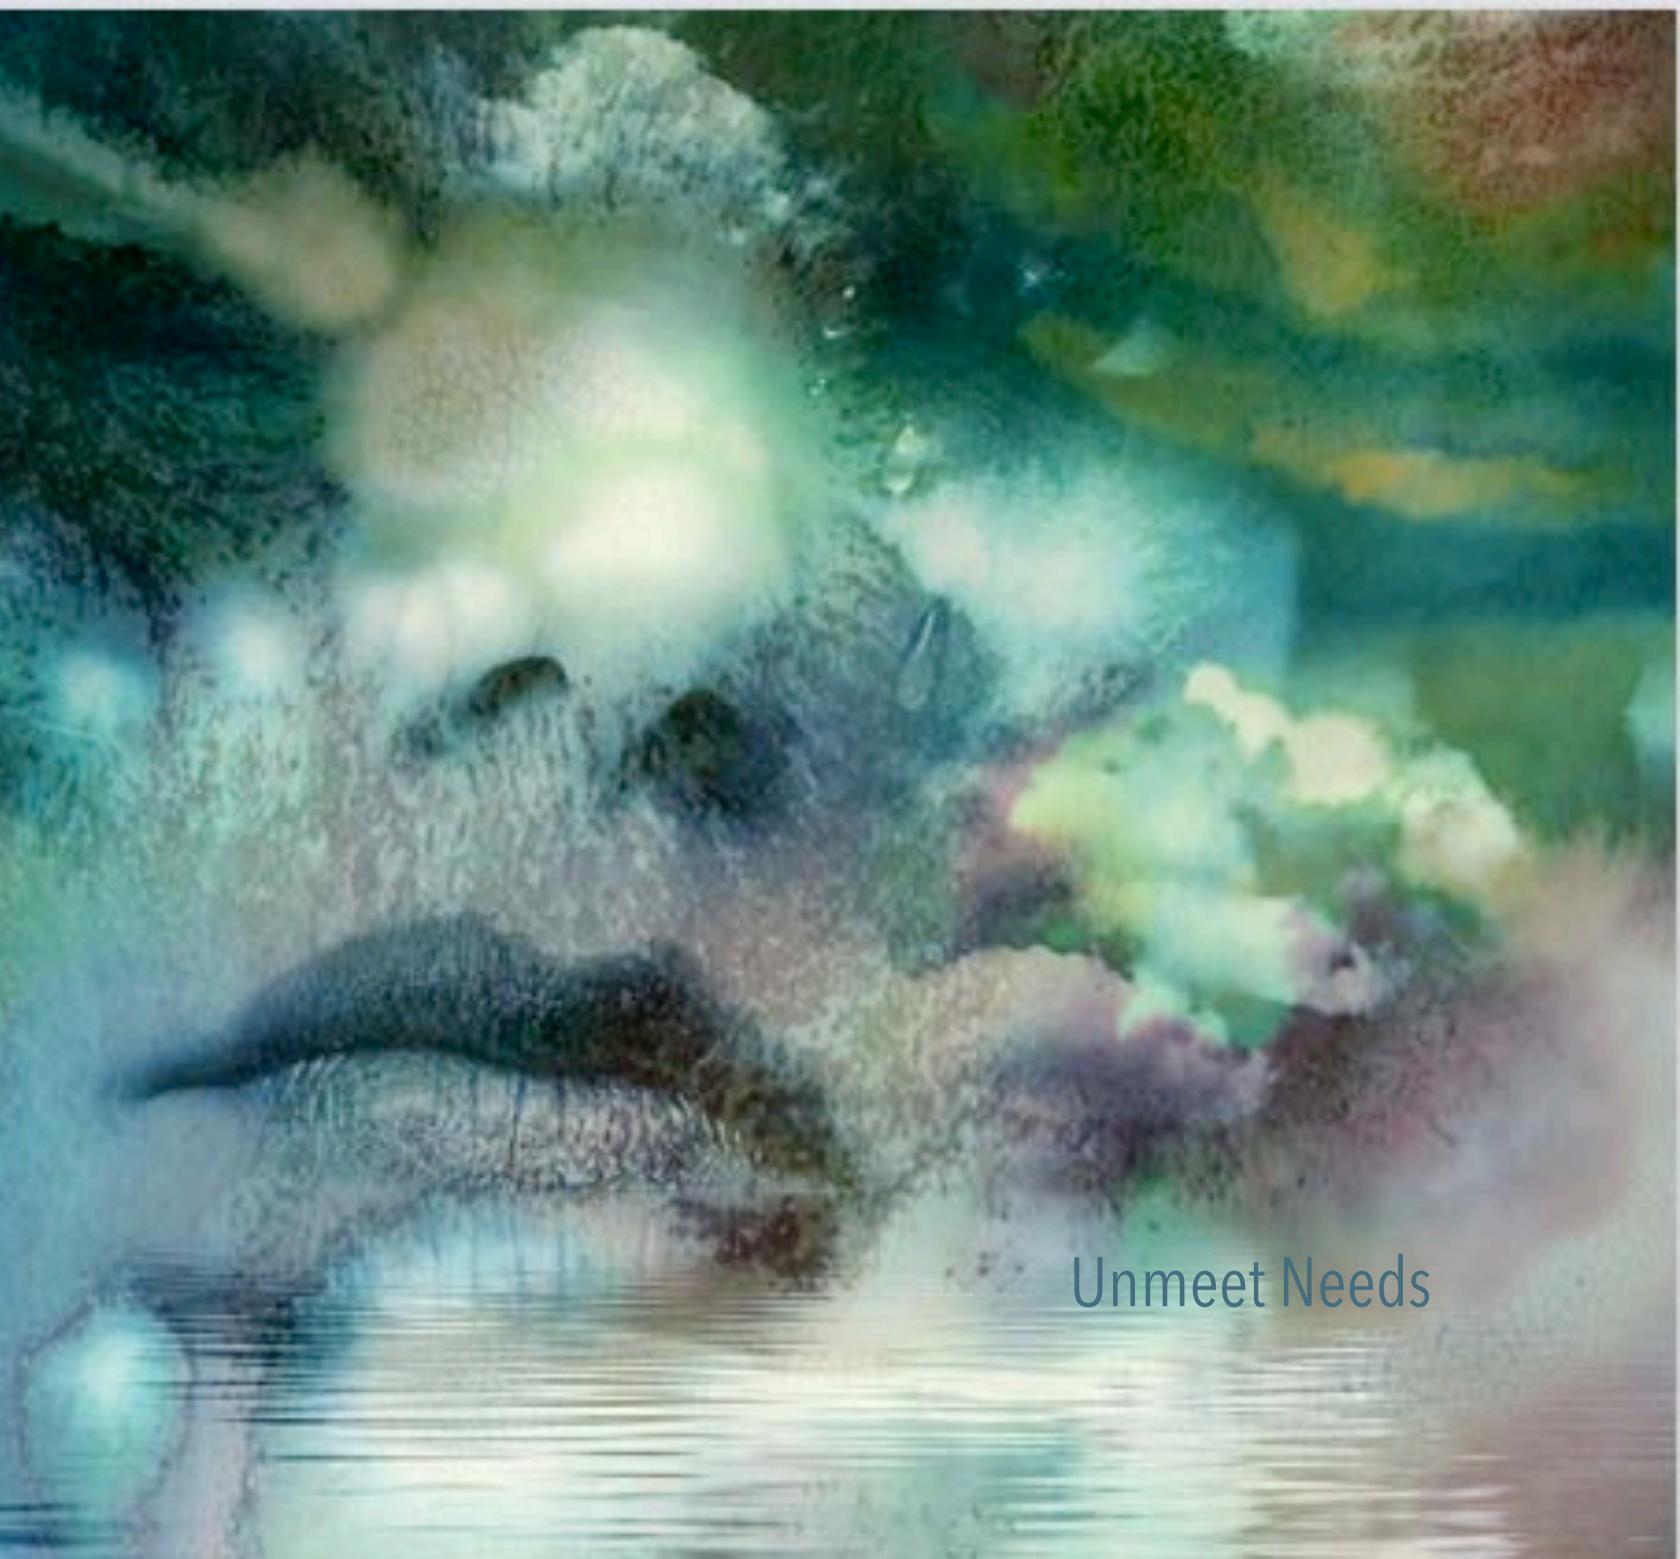

There's such a thing as healthy narcissism. But, if we don't get our healthy narcissistic needs met as children, later on, we (can) have unhealthy narcissism where we '*try*' (*unsuccessfully*) to get the unconditional love we missed in childhood. We (may) try to achieve 'the

promise' of consumer culture, to have the best car, the best place, and 5,000 friends on Facebook as a sign that we made it. We may feel good, momentarily. But, like everything else at the level of form, it doesn't last. We keep looking for what will fulfill us. When we structure '*our*' attention, *exclusively*, championing '*our own*' thoughts and activities (over that of '*others*'), it can become a life-threatening dependency, '*suppressing*' our full potential, as inclusive and all-loving.

As long as we're paying attention 'slideshow-style' to things and thoughts and activities, we (can) feel unfulfilled and separate from each other, as well as from our greater 'Self.' This shows up in brain wave analysis as a chronic form of low-level anxiety. Researching sleep, we find that most adults are not fully restored when they sleep. When we do rest well, we bask in a totally protected place. The absolute peace and unconditional love we crave most is based in the Void prior to consciousness and sentient life. In 'dreamless sleep' we return to our Void-based nature as formless 'pure awareness.' We appear destined to be 'this fulfilled and peaceful' in our waking 0D/3D/4D (and up) consciousness as 'the source' of everything we are experiencing.

Our felt/sense of joy and friendship with all life frees us from fear. When we stand in front of a mirror and witness the quality and presence of our seeing in the space between the mirror and our body, there is a 4D sense that all the 0D points in the 3D space—in and around us—are also us. We feel and sense 'our' unchanging absence giving rise to our

presence as we explore how freeing it is to relax into self/Self-aware consciousness. The longer we spend being aware of all that we are, the more joyful and loving and fulfilled we feel. The cosmos wants to 'wake up' through us. By simply sharing this level mutual recognition, we (can) know we are well on our way to collective enlightenment.

Unmeet Needs

In contrast, when we're in the presence of violence—but it's not being done to us—we're doused with neurochemicals called endorphins that are over thirty times as powerful as morphine. We don't require a lot to get our fix. It's like shooting a small amount of heroin. So when we are seeing violence in front of us on the TV, we produce small amounts of 'this.' We numb 'our (*seemingly separate*) selves' so we can deal with our fear. Neurologically, there are docking sites - so-called opiate receptors - in the cells of our body.

When we see graphic violence on the news, read about it in the paper, or in a book, we are getting 'high.' We get the same thing from eating a starch and protein (meat and potatoes) diet. Eating them together affects us like a drug. Alkaline and acid digestive juices (ordinarily) aid digestion. Together they neutralize each other. By not digesting our food, it's like having a couple of beers. Gratuitous violence (in the media) is almost everywhere we look. Being shown all these horrible things going on in the world has a narcotic effect on us, which is 'used' to tranquilize us, making us feel listless, defenseless, and susceptible to suggestion.

[Operation Gladio: The Unholy Alliance between the Vatican, the CIA, and the Mafia](#) (Williams, 2015) has since become a standard policy for governments around the world to manage mass populations (also see: [Operant Conditioning](#).⁽⁶⁾ By systematically creating fear, societies are effectively

controlled, becoming addicted to a heroin-like neurochemicals.

When violence is being done *to us—instead of just seeing it*—we are doused with neurotransmitters that tend to numb or even paralyze us. As when a cat catches a mouse, it's paralyzed with fear. If a gazelle has been captured by a lion, and it is going to be eaten alive, it's only natural to want to numb the body, as struggling (can be) pointless and only makes 'dying' more horrific. Being slaughtered by another animal can then be experienced as an ecstatic trance state. Animals do not appear to be feeling pain once that happens. And there are many dimensions of this.

Nature photographers have reported seeing fish leap into the talons of hawks and eagles. Perhaps, if you've been swimming around as a fish, you may not know what death is. You see this thing flying around above the water, and maybe you figure, 'hey' if I let that creature get a hold of me, I'll be able to fly too.

In my near death experience at age four, I existed without a form of any kind. My mortal human, body, heart, and mind fell away. I was consciousness without any objects. Children, as well as adults, have reported this, wherein death is not the end. The contentiousness of life, all the countless images we have identified with, who we seemed to be, what we imagined, can all dissolve in an instant. In its place, there is this constant context which cannot die.

After much trial and error over many years—with friends and strangers—I discovered we are able to share a close approximation to this quality of consciousness while still in our bodies—in a joyful and liberated way—by simply choosing to let go (*choicelessly*), surrendering all intentions and emotions to no-thing whatsoever. By gradually making less-and-less effort, we (can) notice the featureless depth and imageless breadth of awareness becoming conscious of its 'Self.'

We (can) share awareness of this 'placeless' meeting place, feeling it fully, viscerally, in the atoms, molecules, and

cells of our bodies. Your fifty trillion human cells and mine contribute to the quality and presence of our noticing. We could be in a group of two, or more, even a thousand people, or the whole of humanity, and notice the quality and presence of our combined sensitivity as a greater, body, heart, mind, and spirit. By relaxing completely, each one of us is capable of sensing 'all of us' radiating a heightened level of conscious presence. We become aware of being the intimate by-product of each and every moment by magnifying our sensitivity. There's more wisdom, more insightfulness, more feeling, and more to be known as a unified consciousness.

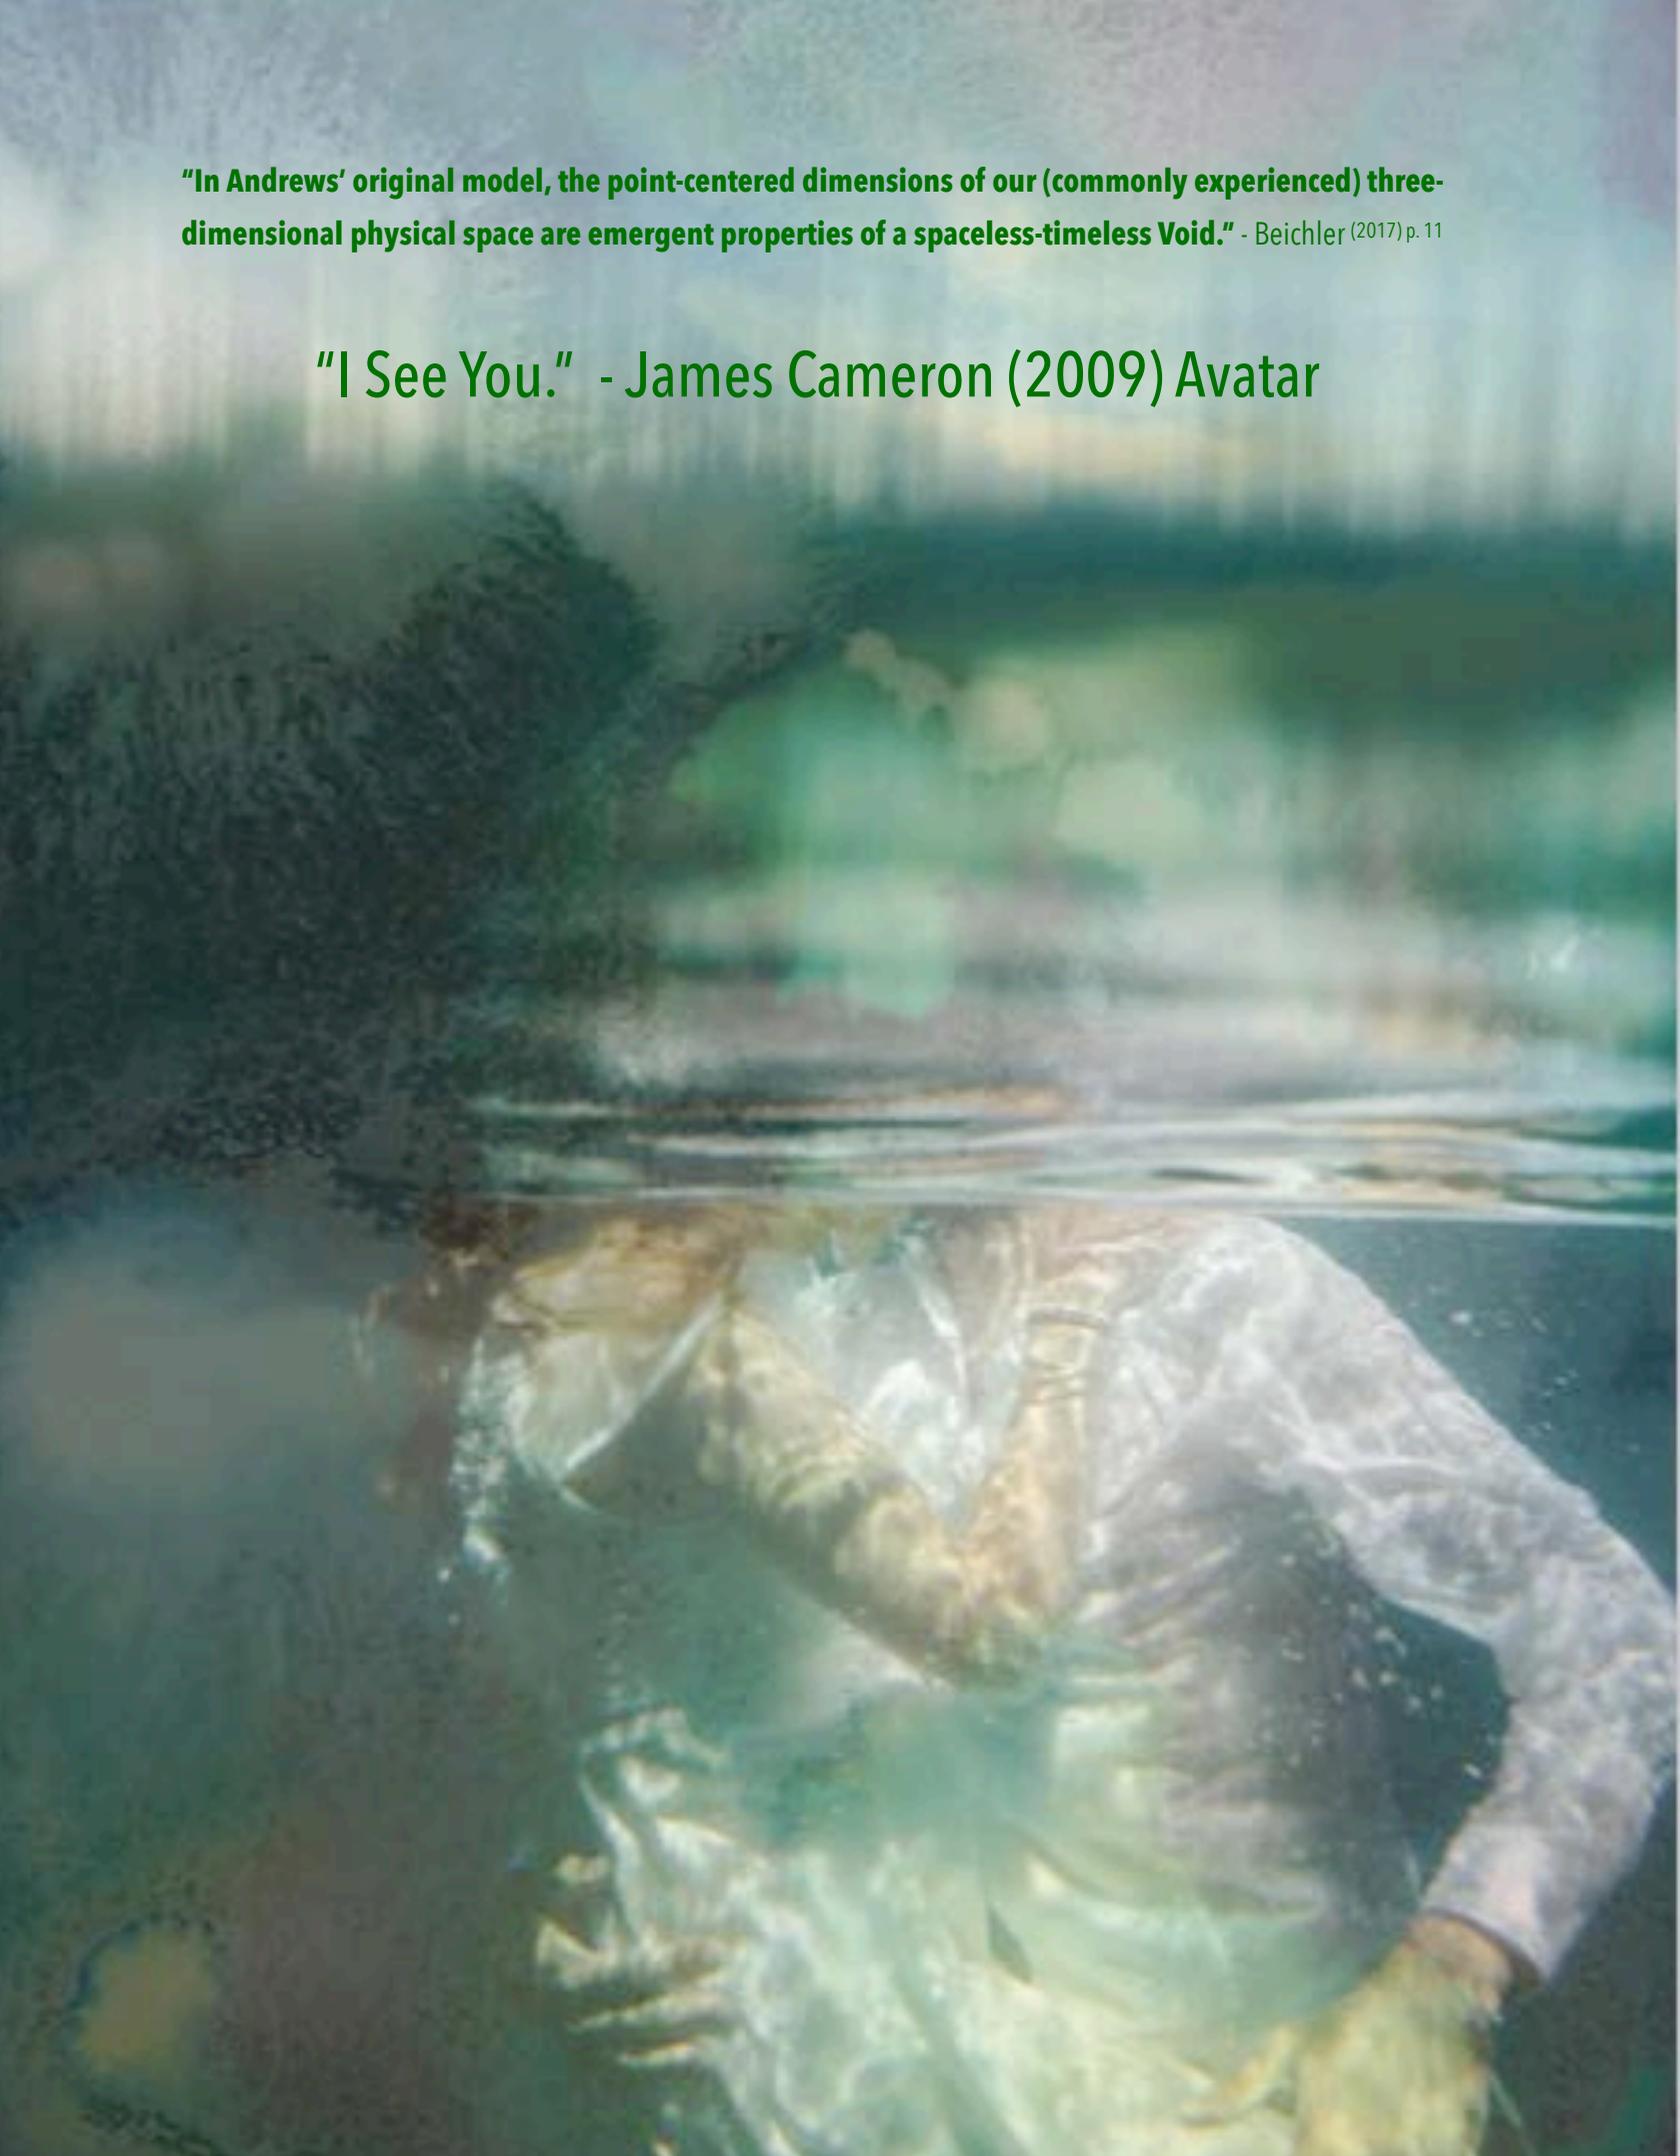

"Be interested, give attention until a current of mutual understanding is established. Then the sharing will be easy. As a matter of fact, all realization is only sharing. You enter a wider consciousness and share in it. Unwillingness to enter and to share is the only hindrance."

- Nisargadatta, "I Am That" (1997) p.17

"In Andrews' original model, the point-centered dimensions of our (commonly experienced) three-dimensional physical space are emergent properties of a spaceless-timeless Void." - Beichler (2017) p. 11

"I See You." - James Cameron (2009) Avatar

LOVE

I recall falling in love with how simple life is the first time I understood the word Spirit. By giving up all control, I found how easy it is to be wholly transparent to our 'selves' and one another, to be every 'thing' and no-thing whatsoever together. Within the radical intimacy of being awareness itself, as one body, heart, and mind, we are unknowable, delighted, and surprised, like innocent children. There is an all-loving unity faithfully and flawlessly orchestrating all that can change. When 'it' is shared, it is the greatest blessing. All are deeply moved and grateful for the serenity we feel. Our lives are opened up to be safely examined. We want to unlearn and re-learn who and what we are, and how we can be in 'this' relationship with 'all that is.'

In weekly gatherings we easily sense what it is to be liberated and Self-realized. We share the surprise of life as re-creators of creation. After a lifetime of meditating as separate individuals, we discover we are indivisible. This unlearning process, once it begins, unfolds for months and years and never ends. It's a 'psychedelic experience,' yet so very peaceful, as we are not 'driven' by a substance. An emptiness that is utterly devoid of form is our catalyst. We freely evolve without effort the more concisely we recognize the absence of a separate self. We sense 'all else' as it is meant to be. Every single moment, in all the countless hours and forty years with thousands of people *internationally*, I have felt incomparably unique and absolutely indivisible. People openly admit how unrecognizable they are every single moment, cherishing how comfortable they are being unknowable. We share one heart, body, mind, soul, and spirit, not as an experience but as what we actually are. Having once fragmented

awareness into pieces and parts - which were artificial and insubstantial - I feel who they, and we, are without dependency on a drug or a technique.

It seems essential for each of us to have access to the combined intelligence of all of humanity as a commonly sensed consciousness, hopefully soon than when it might be too 'late.' Nature has so clearly enabled us to awaken together as one universal intelligence - to share as love itself - as radiant, Self-realized, liberated, enlightened beings who mutually understand one another through compassion and unconditional love. Our experience of being 'all that is' together cannot be limited by anyone's ideas for long.

**We share 'this' as many, yet
there can only ever be 'one of us.'**

The Void is fundamental to who we all are. It pre-exists all form, time, and space. It asks us to be unimaginable, and as intimate as anything we have ever known with total strangers and our 'selves.' No one can hide inside 'their' personal individual 'trip.' Life offers a reunion with our own immortal soul. Awakened adepts have said, who we are was never born and cannot die. 0D/4D consciousness allows us to evolve according to a '[least action principle](#).' Individuals and social groups are known to thrive through the empathy of their members, and by supporting the evolution of self-awareness and mutual respect. We are now firmly in the grip of evolving beyond what is yours and mine to a greater love, one we can trust as a people who truly care for everyone and all life everywhere.

THERMODYNAMICS REVISITED

In the first law of thermodynamics, where did it find
'the energy' it has assured us cannot be "created"?

It is rewritten here, by replacing the word 'energy' with that of an absolute Void: i.e., *"The first law of thermodynamics states that a nonexistent Void is always conserved, it cannot be created or destroyed. In essence, a spaceless/timeless Void can be converted from one form into another."* A Void 'can change' from being formless to also have a form, from a spaceless/timeless 'absence' to a spatiotemporal 'presence' that still sums to zero overall, which agrees with evidence in current astrophysics. Many scientists assume our universe is "closed." The second law of thermodynamics states that the total entropy of an isolated (closed) system can never decrease over time.

A Void is not a 'system'
that is closed or isolated.

Researchers often refuse to 'risk' the dangers of speculating about what could be 'true' beyond what is considered 'acceptable.' So an absolute Void is 'avoided' and dismissed as irrelevant because it cannot be measured. Yet, what if 'the piece (*peace*) that is missing' from physics is precisely that which cannot be reduced to a measurable quantity? A unity which cannot be divided by space or time, energy or matter, mind or body includes our psyche and soul, our spiritual imagination, the meanings we create and pursue together. As expressed in this

essay, without need of energy or matter, forces or fields, minds or bodies, an absolute Void can faithfully maintain the integrity of lower and higher dimensions. The Void is both integrative and/also dissipative. Without requiring a field or force of any kind, equal-yet-opposite potentials (effortlessly) sum to zero, sustaining a dynamic equilibrium, while ensuring departures far from equilibrium. Mathematics has not yet found a way to show what emerges from a zero-dimensional equation. We know the vast intricacies of the Mandelbrot set emerge from a very low-dimensional equation.

A) 0D re-presents an emergent property of a nonexistent Void with (*unanticipated*) 'properties.' The geometric inflation of an unlimited number of discrete 0D points can orchestrate all higher dimensional spaces.

B) 3D physical systems are inclined to dissipate as they integrate with the relative lack of order in their nonlocal environment: i.e., entropy at one level is syntropy seen from yet another level.

C) 4D re-unites and re-organizes 3D, re-encoding the local/nonlocal whole. Points that were kept separate in 3D become continuous, spaceless and timeless, as one point again.

An Absolute Void cannot be divided by Space or Time.

Our ('spirited') indivisible Void-based absence, when sensed and shared, gives rise to *the joys of being* 'the colorless light' of 0D/3D/4D consciousness.

**As 'All' ...we can be the joy
we wish to see in the world.**

D) 5D integrates all points of view in 4D space, as 6D integrates all points of view in 5D, etc. By utilizing the same principles at work in 0D and 4D, higher dimensions are ever more comprehensive, orchestrating all lower dimensions.

0D/4D observations add new observational measurement (OM) 'structures' via reorganizing, regenerating, and driving this ever-expanding recreation. As OM systems, we each grow from a zygote to a more complex multicellular organism. EM radiance, due to every-point linking with all-points through 4D and up, with spatial curvature due to the gravitational contraction of all-points linked to every-point, suggests how (as well as why) all life grow in complexity and contribute to the exponential expansion of this universe.

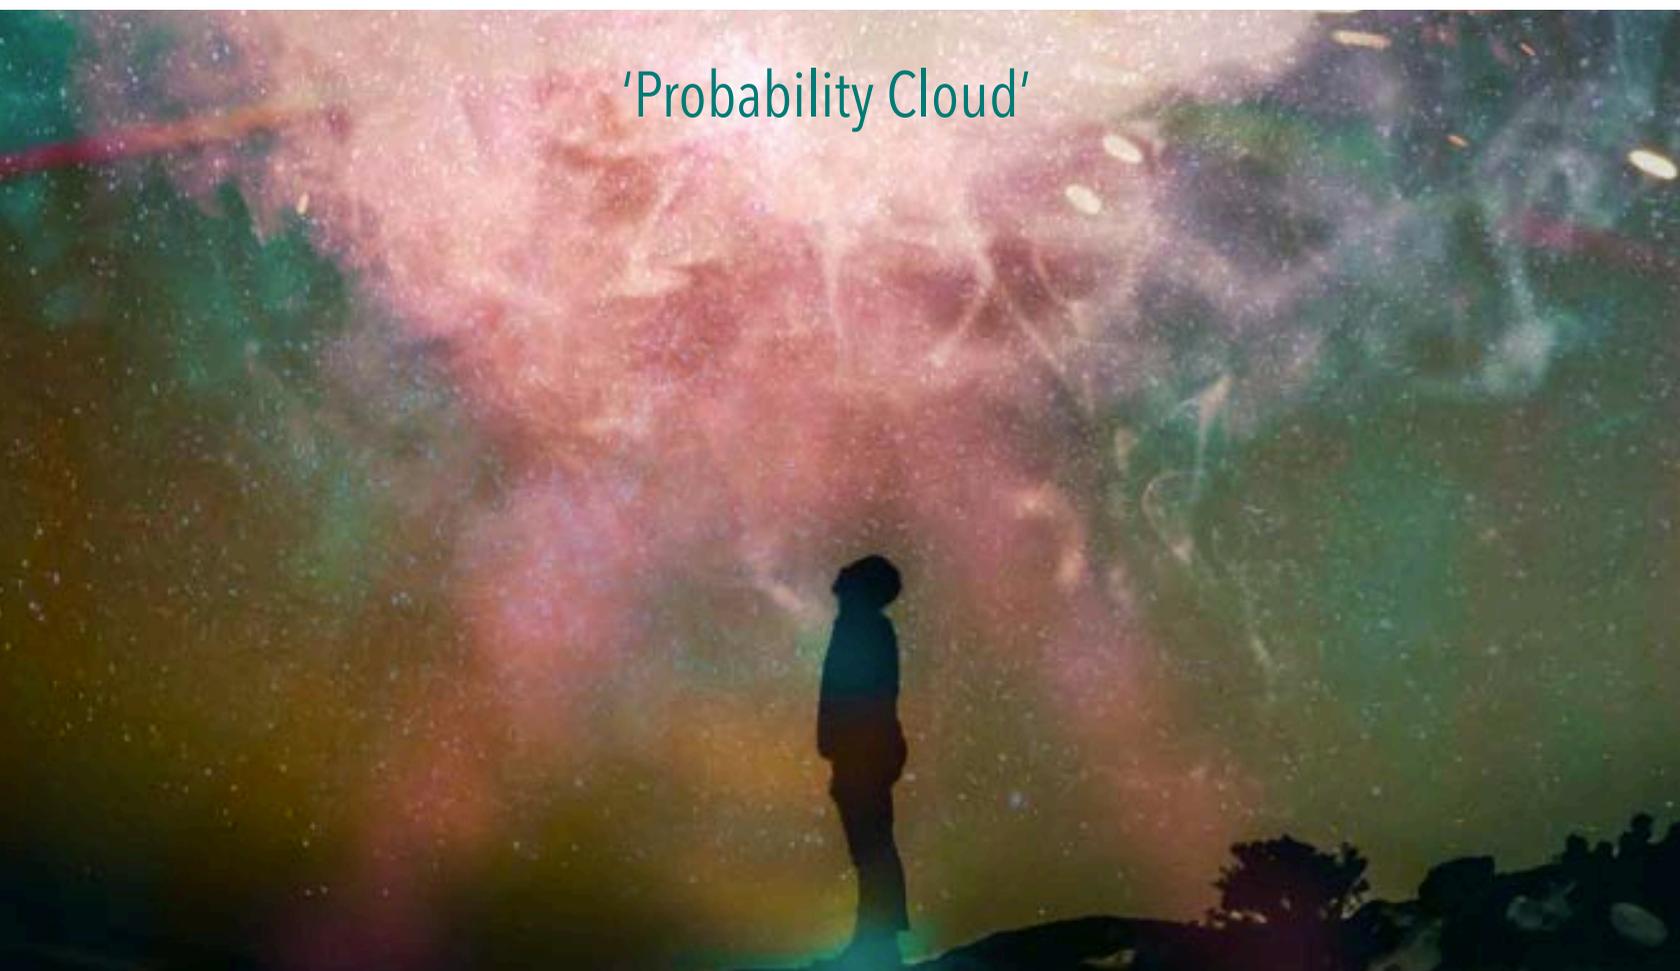

THEORETICALLY

Isaac Newton's insight, '*what is relative cannot exist without the absolute,*' and Einstein's, '*nothing can move relative to the speed of light,*' point to an invariant (absolute) context in which (relative) variations occur. James Clerk Maxwell's notion of an all-pervading 'aether' was later accepted by Einstein and was never disproven. While matter has seemed to exist as a minor element in the emptiness of space, zero-point energies are currently considered '*solid*' evidence of an underlying structure which fluctuates *in-an-out* of existence. Quantum mechanics' uses the term "probability cloud" (for 3D) which conscious (4D) observation 'coalesces'

into a classical relativistic spacetime geometry. In single field theory (SoFT), these potentials are *virtual* properties of an emergent whole as it gives rise to changing forms as expressions of formlessness.

Universal Consciousness is now a contender as a contemporary name for the aether. Still, most scientists are searching for quantifiable patterns while overlooking how an invariant Void is a 'patternless pattern' serving as a 'forceless force' which precisely organizes and orchestrates every pattern that can arise.

'Probability Cloud'

The re-organization of form by a reference frame that does not move inertially gives rise to **fictitious forces** that 'appear to cause' the acceleration of inertial objects including vibrations, as oscillations that change direction in space over time. These fictitious forces do not arise from physical interactions between forms but from the 'instability' of a formless non-inertial frame of reference that is distinct from moving forms.

Infinities, singularities, and whatever lies below the Planck length are considered 'unknowable' by relativity and quantum mechanics. Quantum theory uses math to "renormalize" these infinities in nature, though is unable to explain why we observe a specific event (in an ever-present now) in a field of probabilities. We know that above the Planck length, shorter wavelengths have higher energies. While a single infinitely-short wavelength 'below the Planck length' could be said to represent an infinite energy density by indicating an 'almost' precise coordinate location. Whereas, its closest neighbor (0D) would be invariant, possessing no energy nor fixed location.

"You wrote that according to Riemann's geometry, the 0-dimensional state would be a void embedded in a 1-dimensional space. You're correct. Funny, but I had not thought of it that way before. I will have to think about it within the context of a dimensionless (or quantum discrete) point

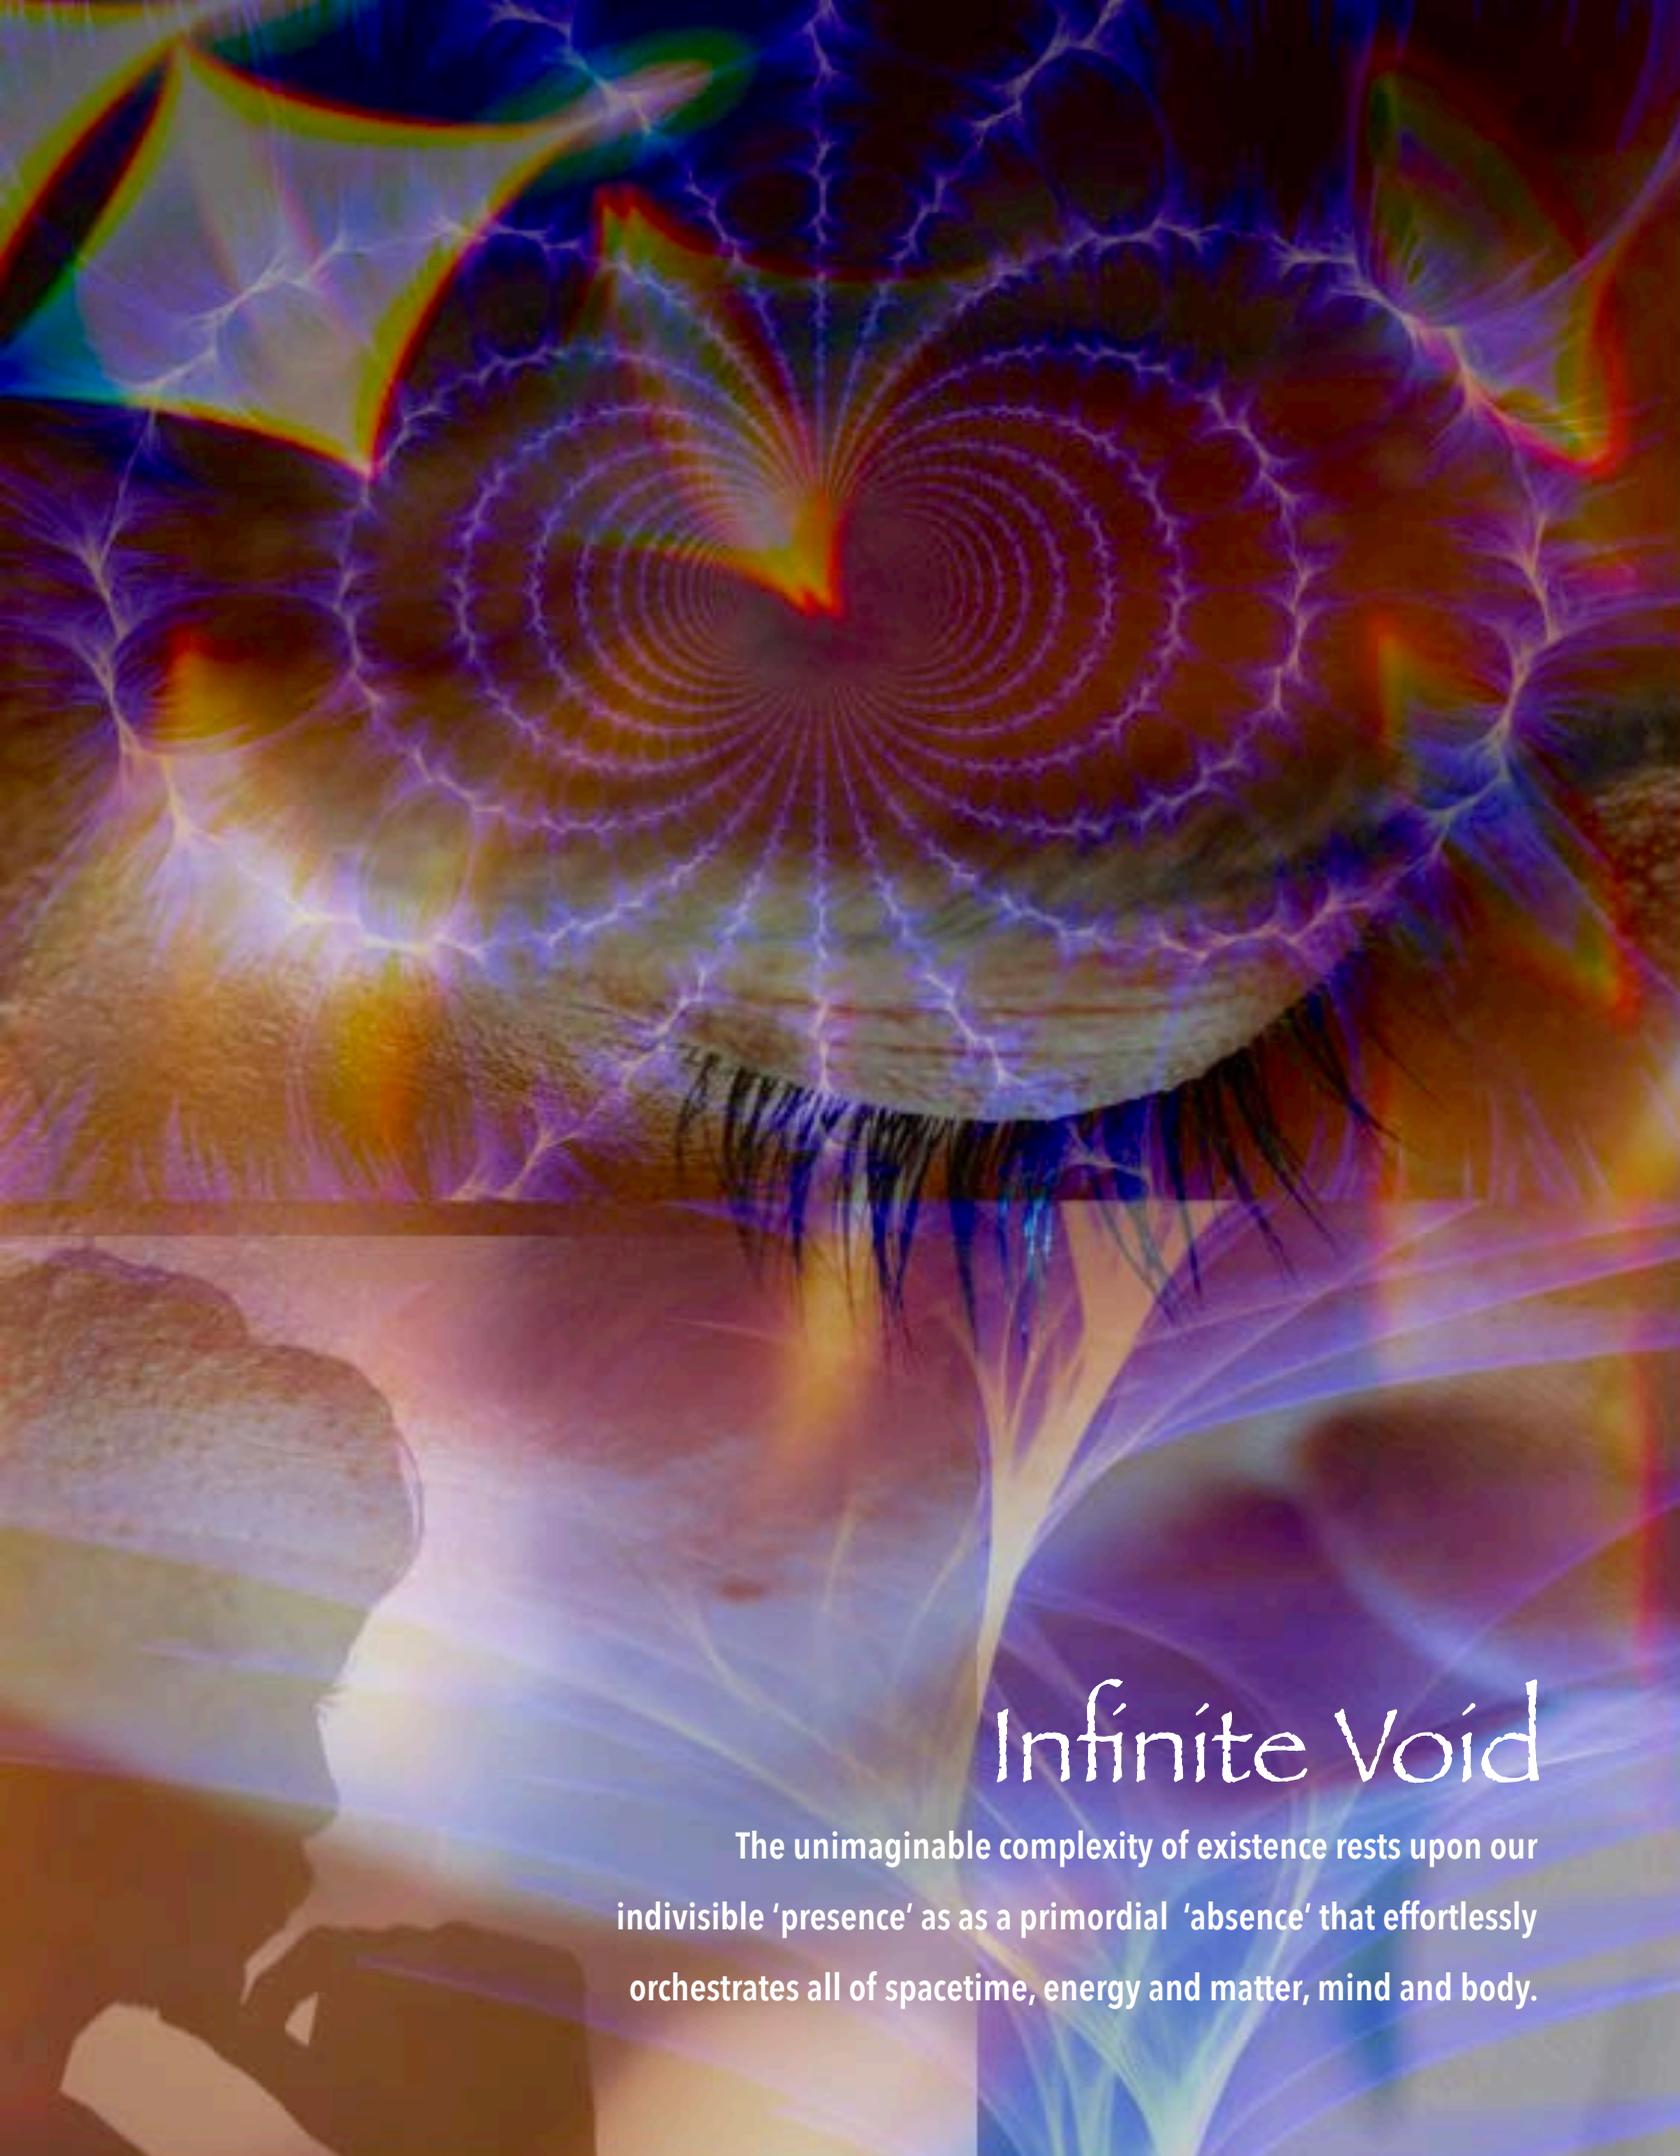

being the 0-dimensional space embedded in a one-dimensional space. Good call on that one, I like it and if I use it in the future I'll give you credit for it. That's what happens when we get so entangled in our own world-views, that we miss the obvious little details like that. It's Occam's razor all over again." - J.E. Beichler's

A singularity requires curved spatial surfaces for electromagnetically 'charged' and gravitationally 'bound' energetic and material potentials to be orchestrated by the absence of space and time.

Logically, every 0D point/Void is a singularity in 3D and shares a 'nested' singularity in 4D. The implications are that a 0D point/Void is a 'distributed' singularity in an infinite series of nested hierarchies wherein each higher dimension transcends and includes all lower dimensions.

This idea echoes Bohm's implicate order, orchestrating explicate phenomena as the 'unfolding and enfolding' of forms.

As a 'collective' of observational measurement mechanisms, we are extending the evolution of a commonly sensed self/Self/no-self-aware consciousness. While we structurally depend on these observer-driven measurements and mechanisms, inwardly, as a primal mirror-like awakens, we are as unborn and immortal as the Void.

Infinite Void

The unimaginable complexity of existence rests upon our indivisible 'presence' as as a primordial 'absence' that effortlessly orchestrates all of spacetime, energy and matter, mind and body.

Perhaps an infinite Void has been 'avoided' as it cannot be reduced to a 'finite' pattern.

Given our universe may be an 'experimental verification' that something can come from 'no-thing,' please take a few moments to experientially explore the extent to which you can intuitively sense a spaceless/timeless non-existent Void 'co-existing' as an unlimited number of non-dimensional (0D) points.

Now, kindly consider the extreme gradient between an unbounded Void and all the *virtual* forces and fields, with their kinetic and potential energies at every single point-centered 0D location. Can you intuit an infinite virtual energy density immediately next to what has no energy, wavelength, or frequency?

This might appear to violate the conservation of energy which states that energy cannot be created or destroyed, that it can only be transformed, or transferred, from one form to another. Yet, if oppositely directed potentials all sum to zero, this law is not violated. If the density of energy (concentrated at shorter wavelengths) can expand into the form of this universe, 0D/4D observer/measurement systems may be

(conservatively) serving a dual function as 1) dissipative gradients *implosively* 'absorbing' shorter wavelengths and higher frequencies, 2) to *explosively* 're-emit' them in a more extended and expanded form as longer wavelengths and lower frequencies. Syntropic point elements (in this way) can be extended to include (entropic) metric extensions.

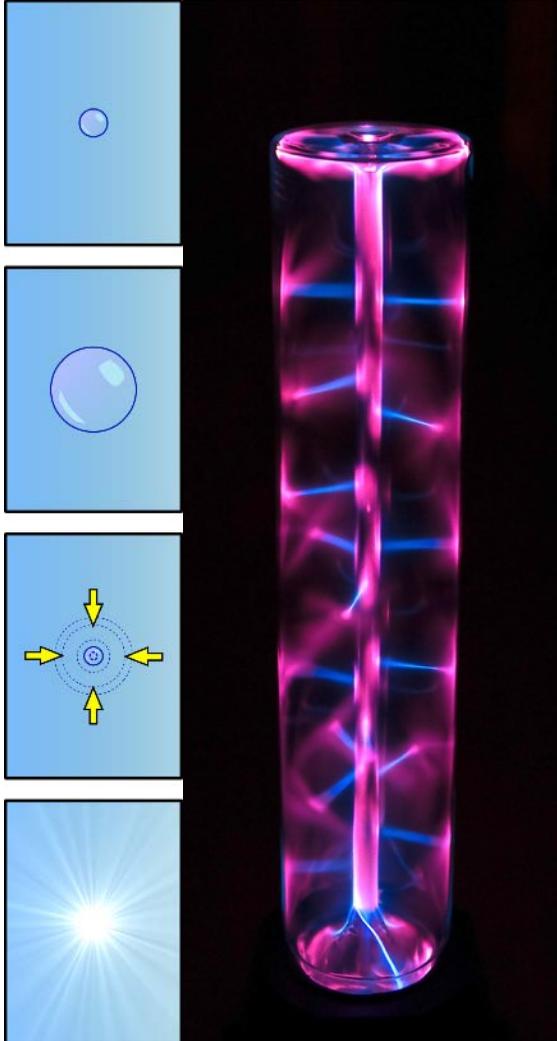

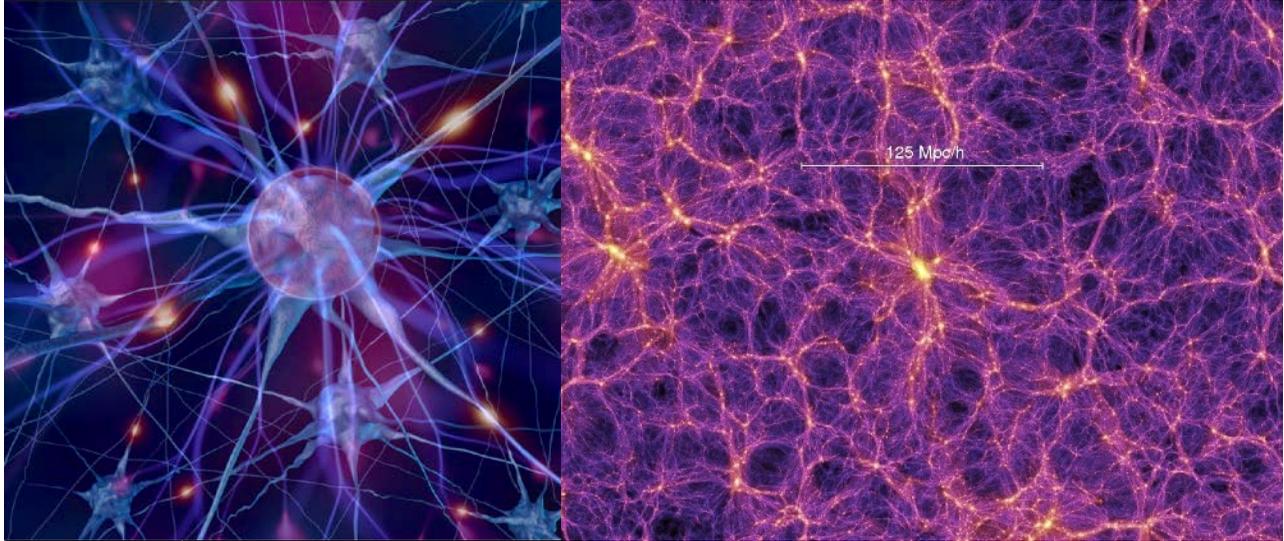

"The 'twist' not only stabilizes each new duplicate 0-D point/twist Void that is created during expansion, it guarantees the discreteness of geometrical points in physical space. It also creates a 'virtual torsion' in the three-dimensional space (sometimes referred to as 'torsion space' by other physicists) surrounding each and every point. So all discrete geometrical points that constitute our 'real' perceived four-dimensional space-time continuum are discrete 0-D point/twist Voids 'wishing' to collapse back into the absolute Void, but they are prevented from doing so since they are stabilized and rendered discrete in a dynamic equilibrium by their 'twist.'"

- Beichler (2017)

The Explosive Nature of Light

SONOLUMINESCENCE

99.999% of matter in the 'visible' universe is in the form of plasma which is also found to appear in sonoluminescence. The mechanism of sonoluminescence is as yet considered "unknown." It can occur when an acoustic vibration of sufficient intensity induces a gaseous cavity in a liquid to collapse (i.e., implode), resulting in the emission (explosion) of short bursts of light. In laboratory experiments, intense heat is created that is estimated to be many times the temperature on the surface of our Sun (20K° Fahrenheit).

A person stands on a path that leads into a vast, complex network of glowing blue and orange lines and nodes. The network is dense and intricate, with many nodes connected by thin lines, creating a web-like structure. The background is a dark, starry space with soft, glowing bokeh effects in shades of blue, purple, and orange. The overall atmosphere is one of mystery and exploration, suggesting a journey into a complex system or universe.

This essay suggests the universe is
an observational measurement system
which grows by re-uniting with its 'Self.'

Explaining the Accelerating Expansion of the Universe

This appears to violate the conservation of energy which states that energy cannot be created or destroyed - that it can only be transformed or transferred, from one form to another. As suggested by Alex Vilenkin, Alan Guth, Steven Hawking, and others, if oppositely directed potentials all sum to zero, this law is not violated. This essay suggests the universe is an observational measurement system which grows by re-uniting with its 'Self.'

Comparing virtual particles and 'real' particles, the only difference is that the former 'appear' to fluctuate in-and-out of existence.

That which cannot be divided against itself (i.e., an absolute Void) is by definition unbounded, immeasurable, and (virtually) non-existent. It can retain these qualities as any number of non-dimensional (0D) points. The introduction of any 'form' of spatial process - between and among 0D points - is 'bound' to be accompanied by some form of (albeit virtual) spatiotemporal field phenomena. We recall that a quantum system of potentials and possibilities behaves classically when it is 'observed'- without any explanation as

to what observation is. Counterposed mass/energy potentials (can) serve as emergent properties orchestrated, organized, and observed by an invariant ("**real**") indivisible Void-based constant.

This essay suggests that 'primal (0D) awareness' is an emergent property of an indivisible (ever-present) Void. The accelerated expansion of spacetime and the emergence of energy and matter, mind and body are thought to be 'extensions' of this Void, which requires all physical phenomena to be 'reduced' to a zero sum - overall. It has also been proposed that two or more dimensionless points cannot be separated from one another without there being a means of maintaining their interconnectedness as an undivided whole. Quantum mechanics offers the concept that every point particle is an observational measurement system. David Bohm advanced the idea that every observation gives rise to a spatiotemporal, energetic, and material measurement structure which - in turn - gives rise to the next more refined observation (i.e., SomaSignificance). This progression suggests a way to understand our own evolution as well as the evolution of the universe from nothing whatsoever.

An exponential increase in complexity due to the progression of observational measurements would logically accelerate the expansion of spacetime as an indivisible unity, producing and coordinating the the creation of potential fields and re-creative phenomena. Dynamic tensions - arising between-and-among 0D points - could (as argued earlier) sustain the emergence of something from no-thing. Such re-creative activity would have to be precise and abide by 'its own' rules, pre-determining our own capacity to observe, measure, and discover the laws of physical manifestation.

To reduce spacetime, energy and matter, mind and body to a zero sum, while forming and re-forming the complex potentials that are inflating space over clock-time, logically would require 'all there is' to be re-created by both a point-centered primal awareness and an instantaneous nonlocal awareness. The density of potential mass/energy concentrated in the shortest possible fluctuations of space over time (i.e., the frequency of wavelengths below the Planck length) could be understood to incrementally

expand the outward form of this universe above the Planck length.

0D/4D observational measurement systems could serve a dual function as 1) dissipative gradients (*implosively*) 'absorbing and resolving' shorter wavelengths and higher frequencies to sum to zero 'through' every 0D point-centered process, 2) to (*explosively*) 're-emit their momentum' in a more extended and expanded form as longer wavelengths and lower frequencies. In this way, point elements would also take form as metric extensions over clock-time.

The '*implosion*' of an unbounded Void - becoming spatially bounded at a 0D point - could have 'caused' the '*explosion*' (inflation) of countless (discrete) 0D point/twists as discussed in the introduction. As has been suggested, these could have been 'intimately' accompanied by (*virtual*) high-frequency/short-wavelength (torsional) fluctuations as curvatures within a single field (SoFT)⁽⁸⁾, producing sonoluminescent-like 0D/4D (*cavitations*) resulting in (kinetic) electromagnetic 'photon-like' potentials (i.e., spherical wavefronts) and oppositely directed gravitogravnetic (GG) potentials.

Consciousness is essential for transforming the probabilities of quantum mechanics into the precisely observed measurements of classical relativity.

If an absolute Void's 'implosion' to a 0D point 'caused' an 'explosion' of 0D point/twists to rapidly form, multiply, and inflate below the Planck length, to be expressed above the Planck length as a unified field with forces and sub-atomic phenomena, we may be able to predict the physical heat that (*eventually*) resulted from these implosions as well as the 'virtual' fields and forces arising through 0D/4D points at the beginning of 'this' and perhaps other universes - to possibly match with our empirical measurements.

This might be compared to a 'strange (*Void-based*) attractor' in complexity theory generating emergent higher dimensional phenomena. After-all, life itself is an 'explosion' of diversity.

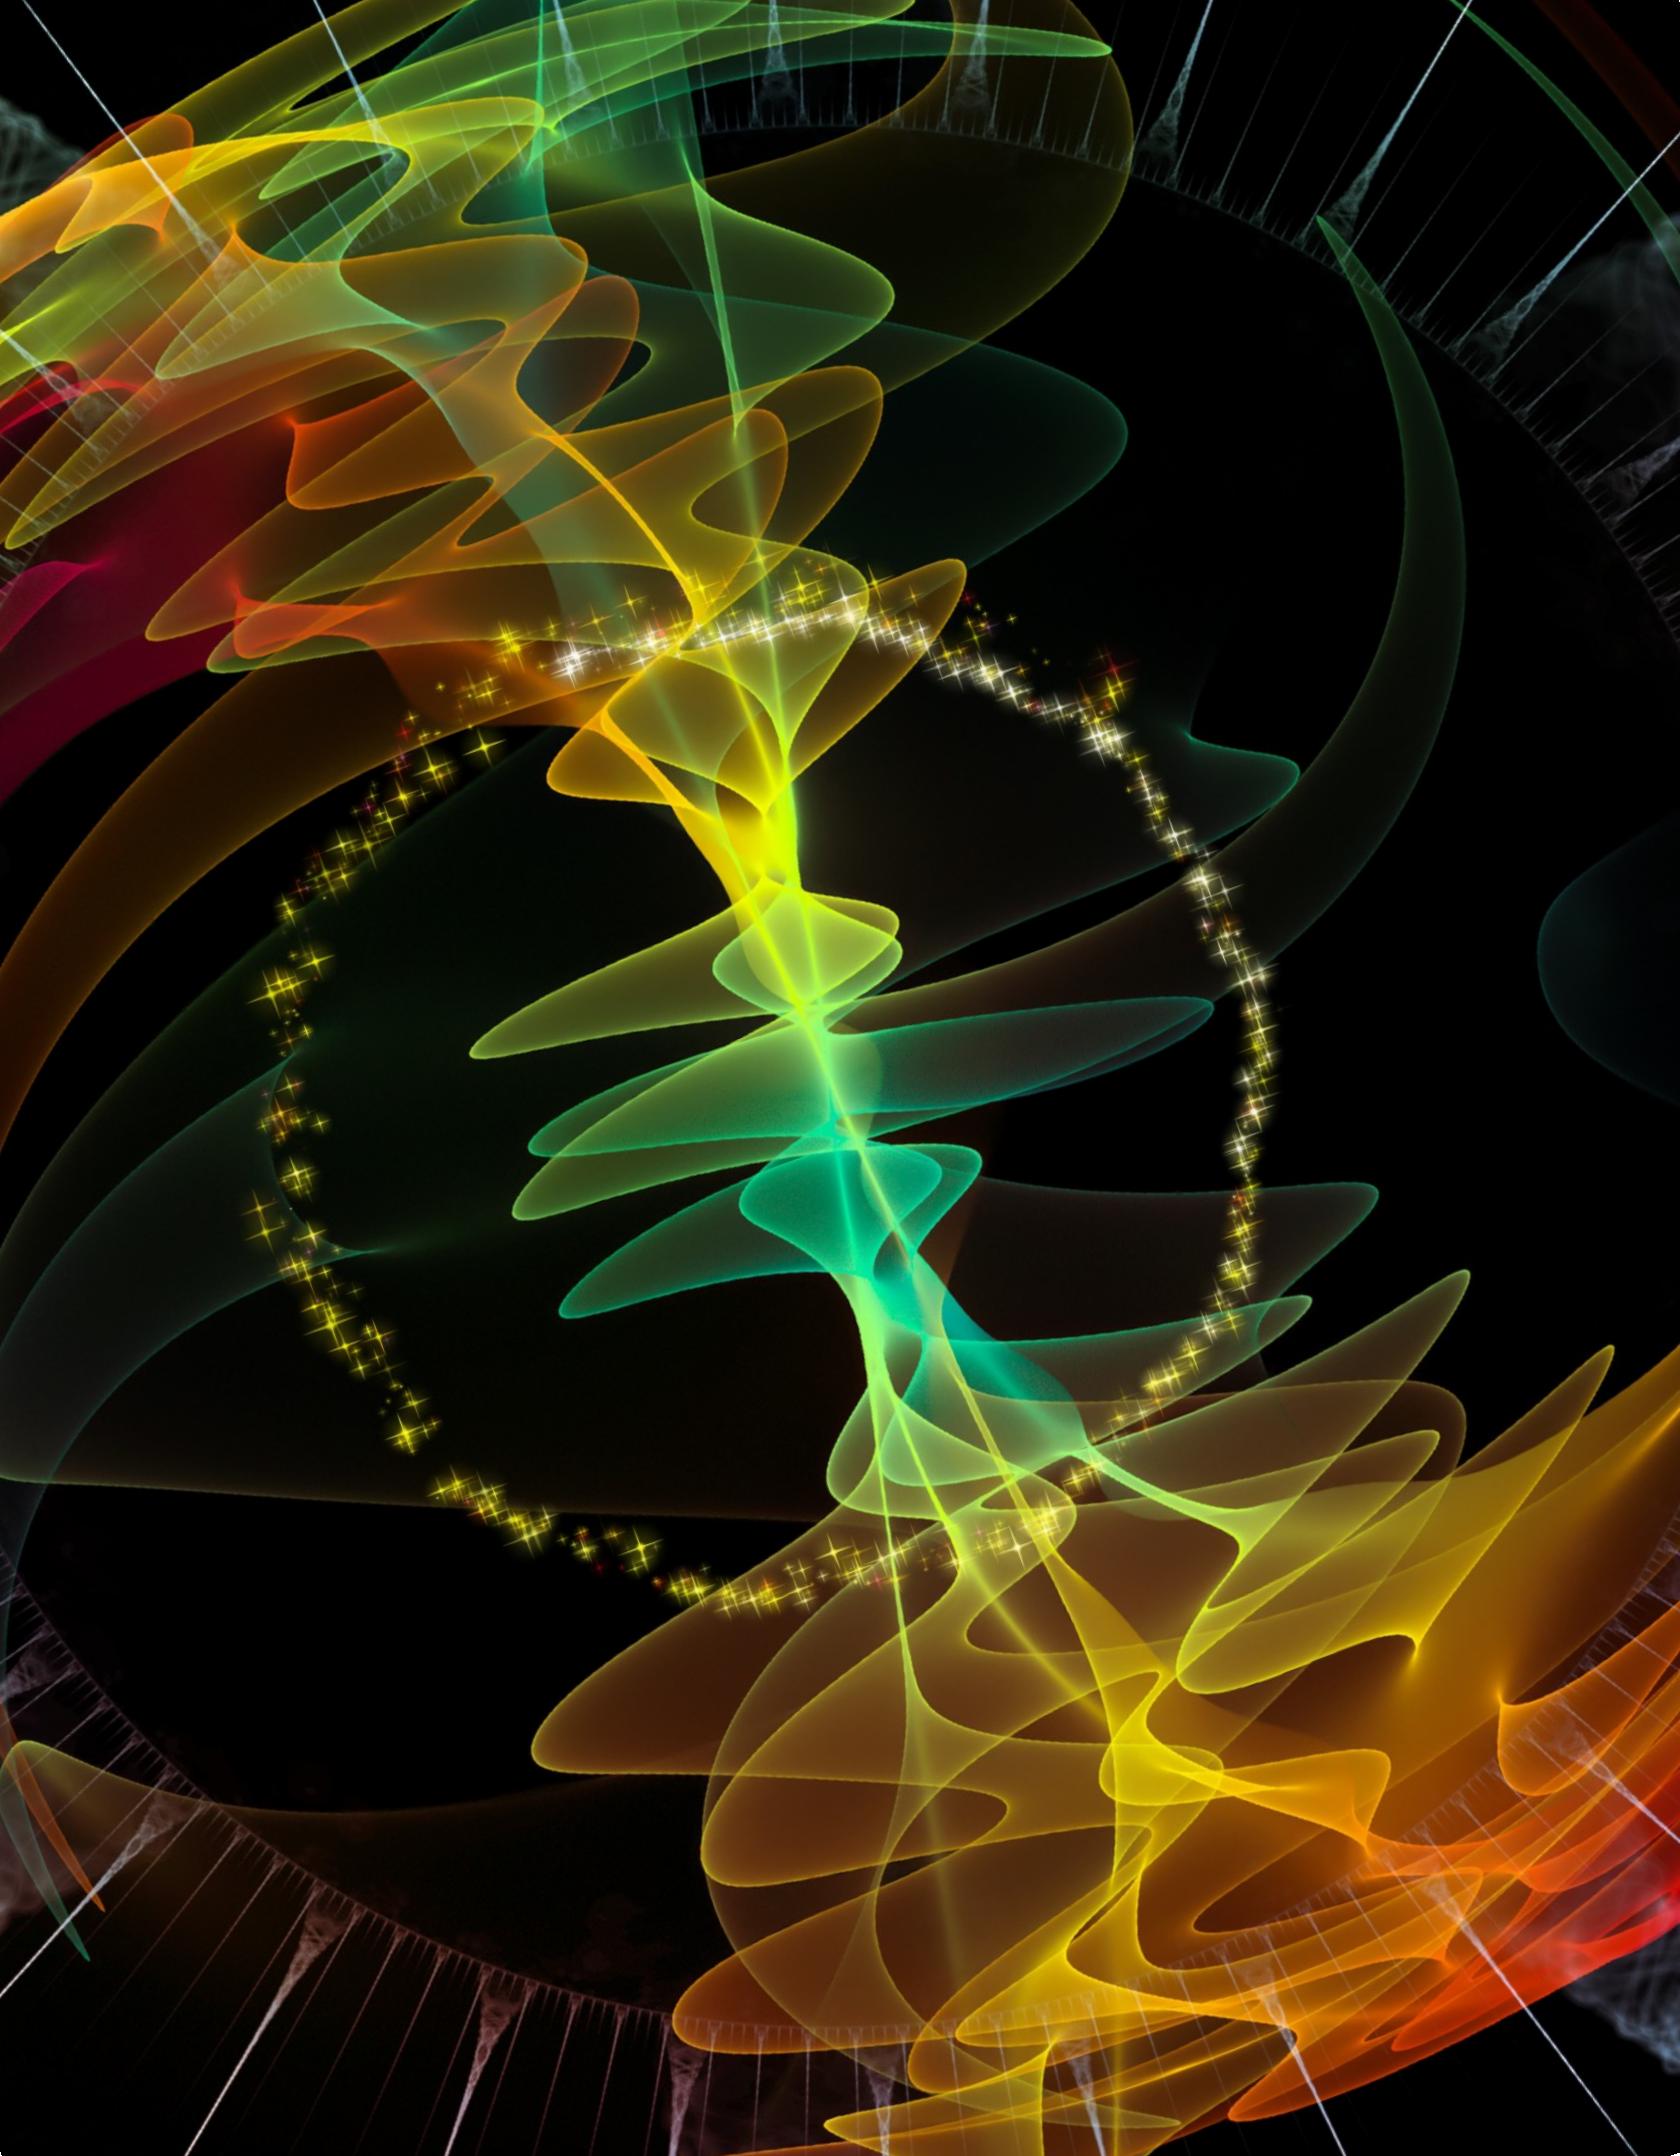

Demonstrations of matter being levitated and moved-around in acoustic fields have been held comparable to Bohm's theory of pilot waves.

Jim Beichler's 0D point/twist Void torsion model 'suggests' point-centered (photon) quanta exhibiting stable wavelengths and frequencies due to the equilibrium of field potentials that give rise to point-centered processes in the form of particle phenomena. Our (SoFT) model predicts the relative stability of a single field that sustains and regulates these potentials and their probability.

For a featureless Void to become 'all that is,' the accompanying logic has to be simple enough to satisfy Occam's razor: i.e., a principle of nature and physical science that requires the least number of assumptions.

Reimannian geometry has been used to show how all points in 3D share a single polar point in 4D. This implies extreme spatial curvature. The (*virtual*) mass/energy potential of all (0D) coordinate point locations, *in space over clock-time*, passing *through a single point* can be counterbalanced by the fact that these mass/energy potentials are summed to zero through a polar point - wherein 4D is a dynamic property of every 0D point in 3D. As 4D 'implodes' all points to one point (*dark matter?*), each 0D point must 'explode' (as *dark energy?*) through all 3D points, accelerating the expansion of the whole.

Physics itself can be viewed as just another potential with its equal yet opposite polarity in metaphysics. Every '*thing*' and no '*thing*' are perhaps correlated with electromagnetism - as the relativity of points - wherein gravity is point-centered. All 3D points being concentrated at a single 4D polar point may well be the origin of light, while all 3D points being drawn to every 0D point would also guarantee oppositely directed gravito-gravnetic potentials.

0D is a property of 4D. Jim Beichler points out that entanglement is 3D embedded in 4D. Also, a 0D point - by itself - is indeterministic. Yet, when it is observed, it becomes deterministic. 0D is discrete **and** continuous in 3D space, but discrete **or** continuous in 4D, which allows for quantized possibilities. Observation requires two points to be relative to each other. Jim says our reality can be characterized as both, and/or, neither.

Our intuitions agree. Since 4D (witnessing) is undivided by space or time, it transforms (and evolves) 3D by repeatedly re-uniting and re-creating every 0D point in 3D. In this way, point-centered processes '*re-generate and re-present*' all phenomena via the incremental expansion (acceleration) of our universe. As an always unified collective, our primal 0D awareness acts through this 4D polar point. We are becoming increasingly aware of the fact that this universe is literally the expansion of a Self-gravitating Consciousness. Wherein self, Self, and No-Self are integral features of a creation that survives and thrives by re-creating its Self. For this reason, our own reproductive instincts are naturally innate to our biology and psychophysiology.

As consciousness is essential for transforming the probabilities of quantum mechanics into the precisely observed measurements of classical relativity, this means that 'no-thing' and 'no-one' co-exist together as (*virtual*) potentials re-united by primordial awareness. The spiritual challenge for both scientists and society is to affectively comprehend the co-creative (*dreamlike*) character of this apparent "reality." It calls each of 'us' to the task of

successfully popularizing our actual potential. In this light, a commonly sensed, empathic, compassion consciousness appears to have been designed (*unintentionally*) by the absolute absence of any-thing or any-one.

On the most fundamental of levels, the acceleration of our education and the increasing rate of expansion of the universe appear to be inextricably linked. Our ever-increasing complexity and the re-generation of all forms are measures of this acceleration. Awareness and its by-products are not 'things' to be objectified, but rather the free-form imaginings of an eternity of dreamers made manifest by a timeless, placeless, here-and-now. 'Nothing' is literally happening, ensuring spiritual freedom from our thoughts and conditioning, from needing to be somebody, while free to be fresh and new.

We can ask if life is a perpetual motion machine, producing energy and matter, mind and body from no-thing whatsoever. This universe may actually be a "free lunch." Each new observation re-generates the emergence of what is unimaginably intricately complex, delighting our senses, surprising 'us' like little children loving the excitement of it all. The endless growth of life (*from life*) asks us to let go and die to what was, to come to know (*without a single doubt*) that awareness itself is sustained by that which is unborn, unbounded, immeasurable, and indivisible. In *this*, we are a verb, connecting a subject with an object, un-identified with any one form. This offers us all a way of being, of sharing the recreation of creation, to (*at long last*) resolve the three great mysteries.

Is Consciousness, free will, and God - in these Details?

Our capacities grow more exquisite and utterly delightful, in always inspiring and surprising ways. We are being guided to reveal our 'Self' to our 'selves,' to hold and to have, until death (again) proves to be the source of life, world without end. We have every 'thing' to give and receive (as a

gift). Our psychological and physical forms, within our formless spiritual nature, allow us to aspire, to become all-loving, all-knowing, and all-powerful. We intuit this 'quickenings' at our core. It's a call to greatness, to liberate our small-self-centric selves by serving the greater good of all.

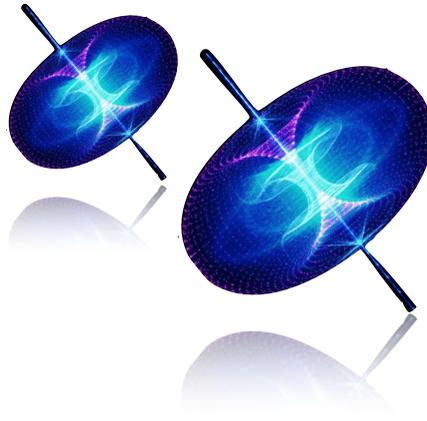

In the Mind, There is No Mind

No mind points to a quality of consciousness within all of us that is, like a mirror, untroubled by our mind-made world. All the experiential research I have facilitated has been inspired and guided by this innate natural resource. As when we are awake as awareness, we are conscious of who and what we are together without fear or regret, free of our wounds

and conditioning. We feel and see 'what is so' without being identified with it. As incomparably unique souls, each pursuing our purpose, we have a spiritual obligation. In touch with the source of happiness, there is the joy of being Consciousness. Our minds are naturally silent, thrilled to look upon the whole, unpuzzled by its pieces and parts. Truly at Peace and One with All, we are Love its Self.

OBSERVERS AND ACCELERATING CHARGES

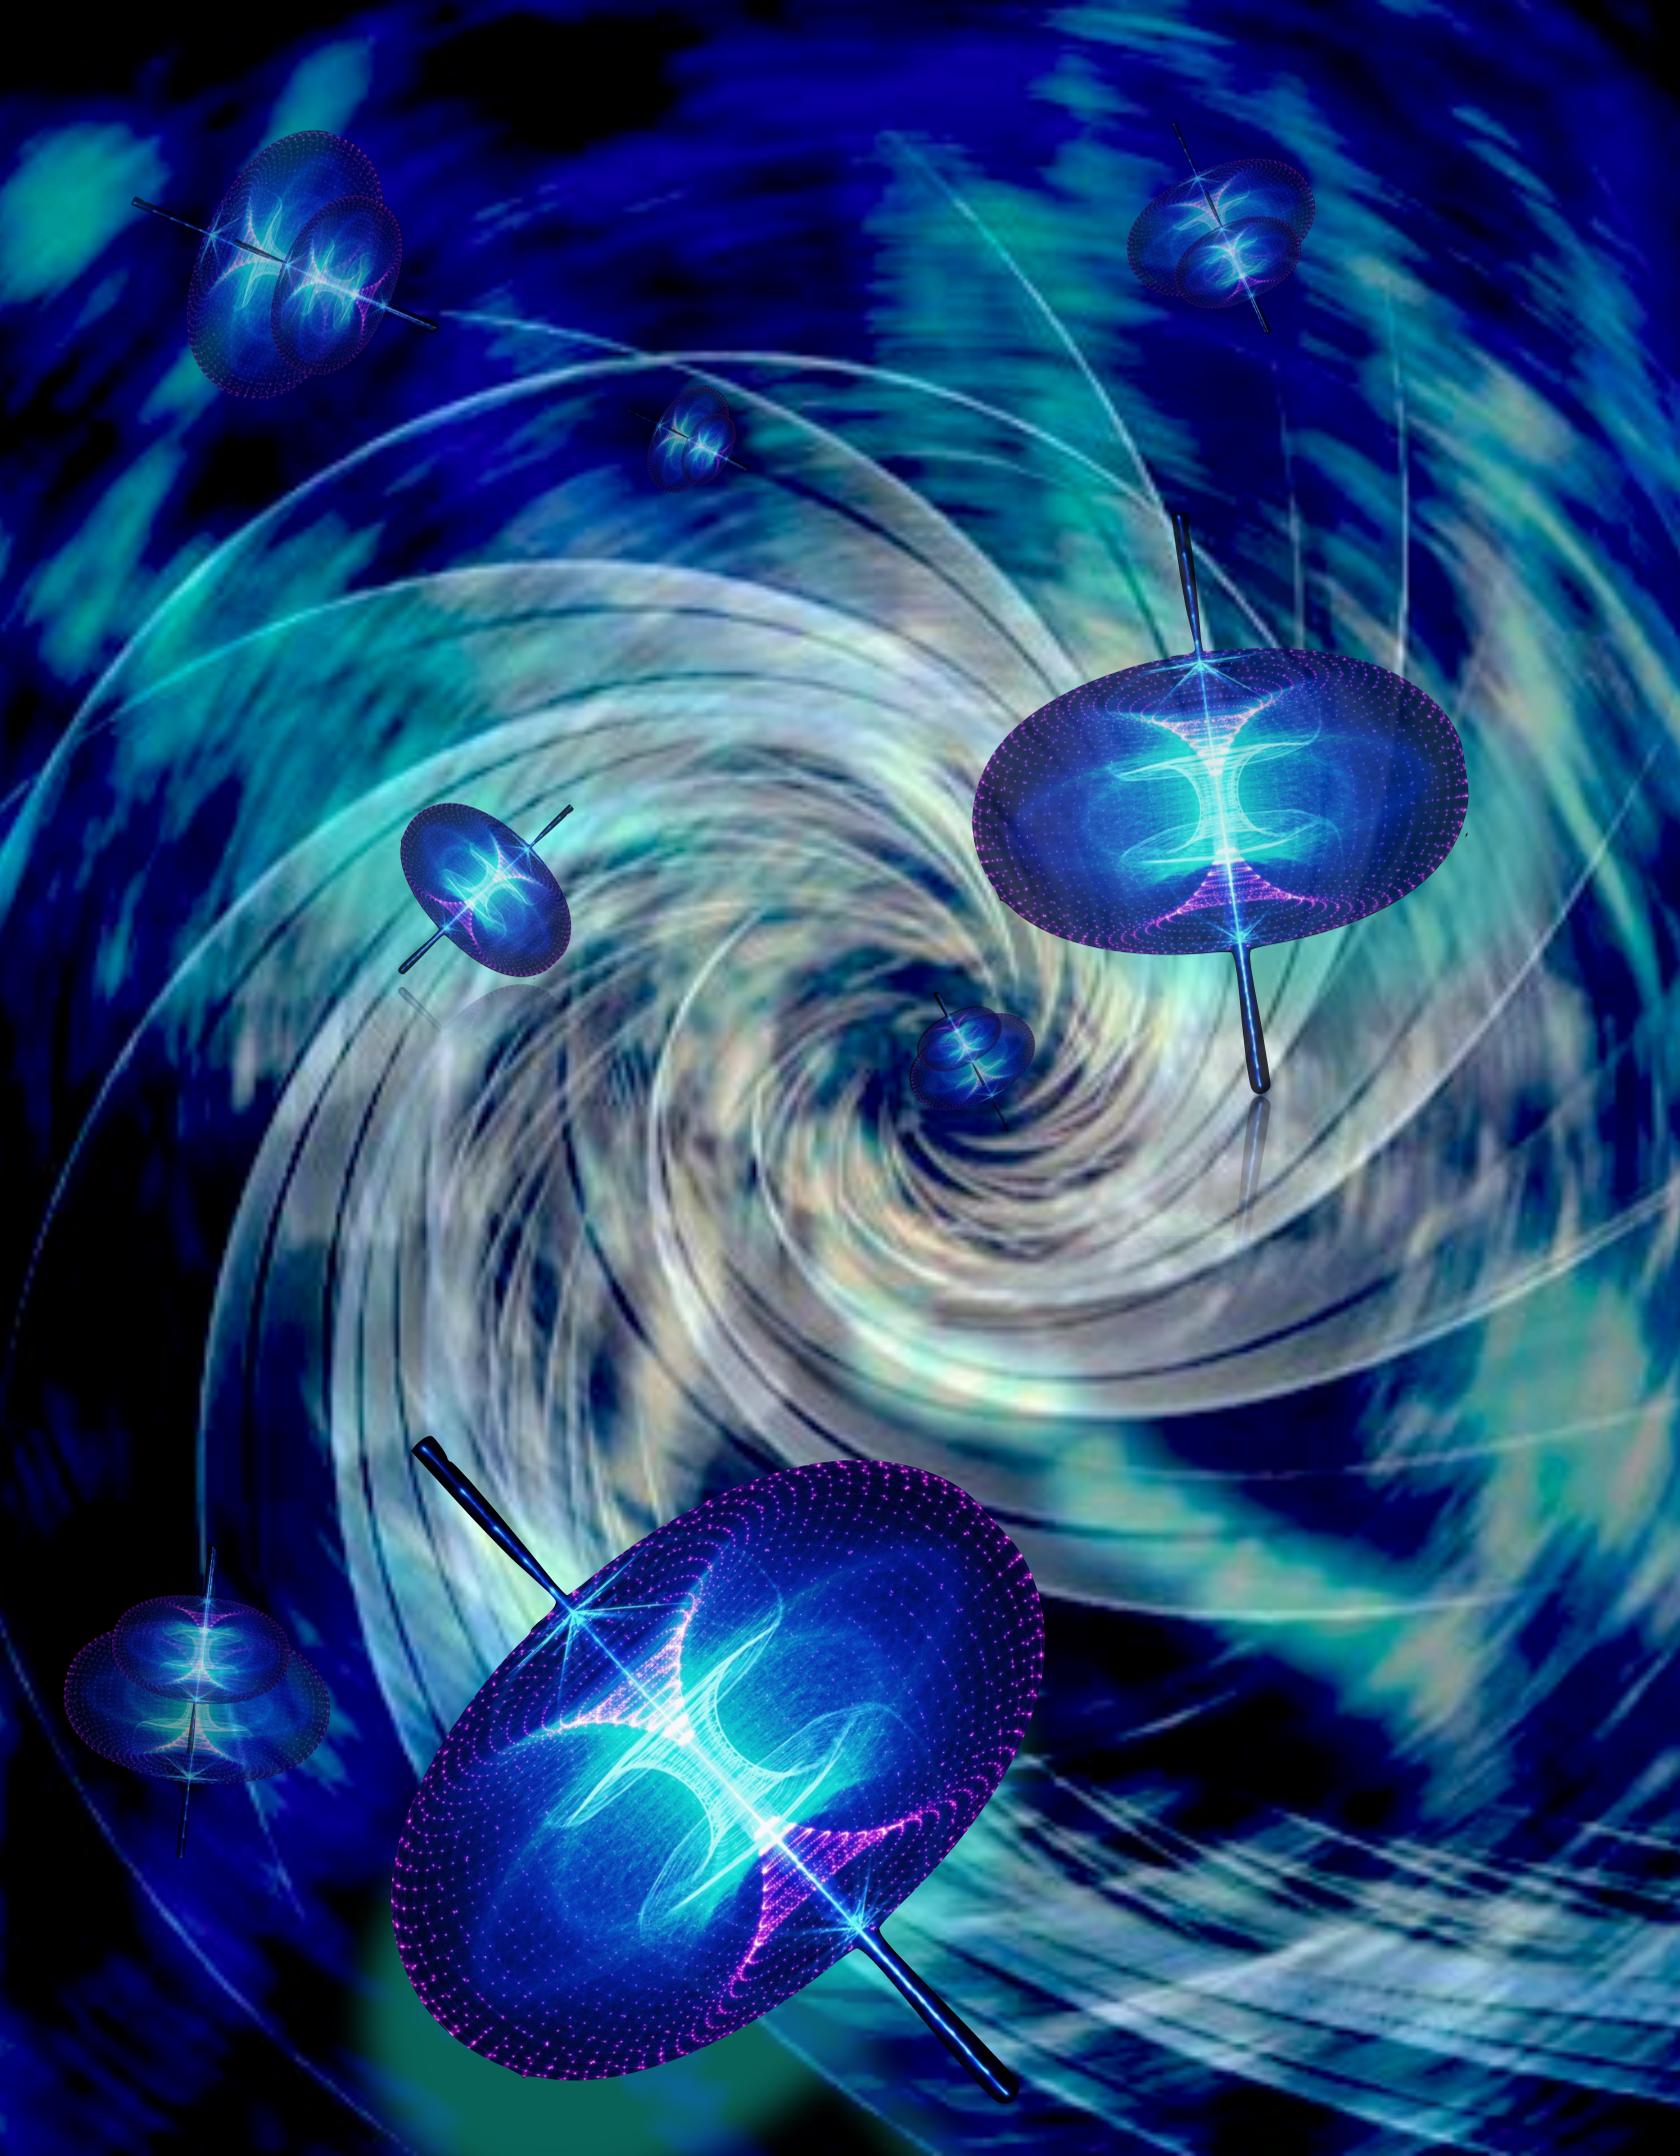

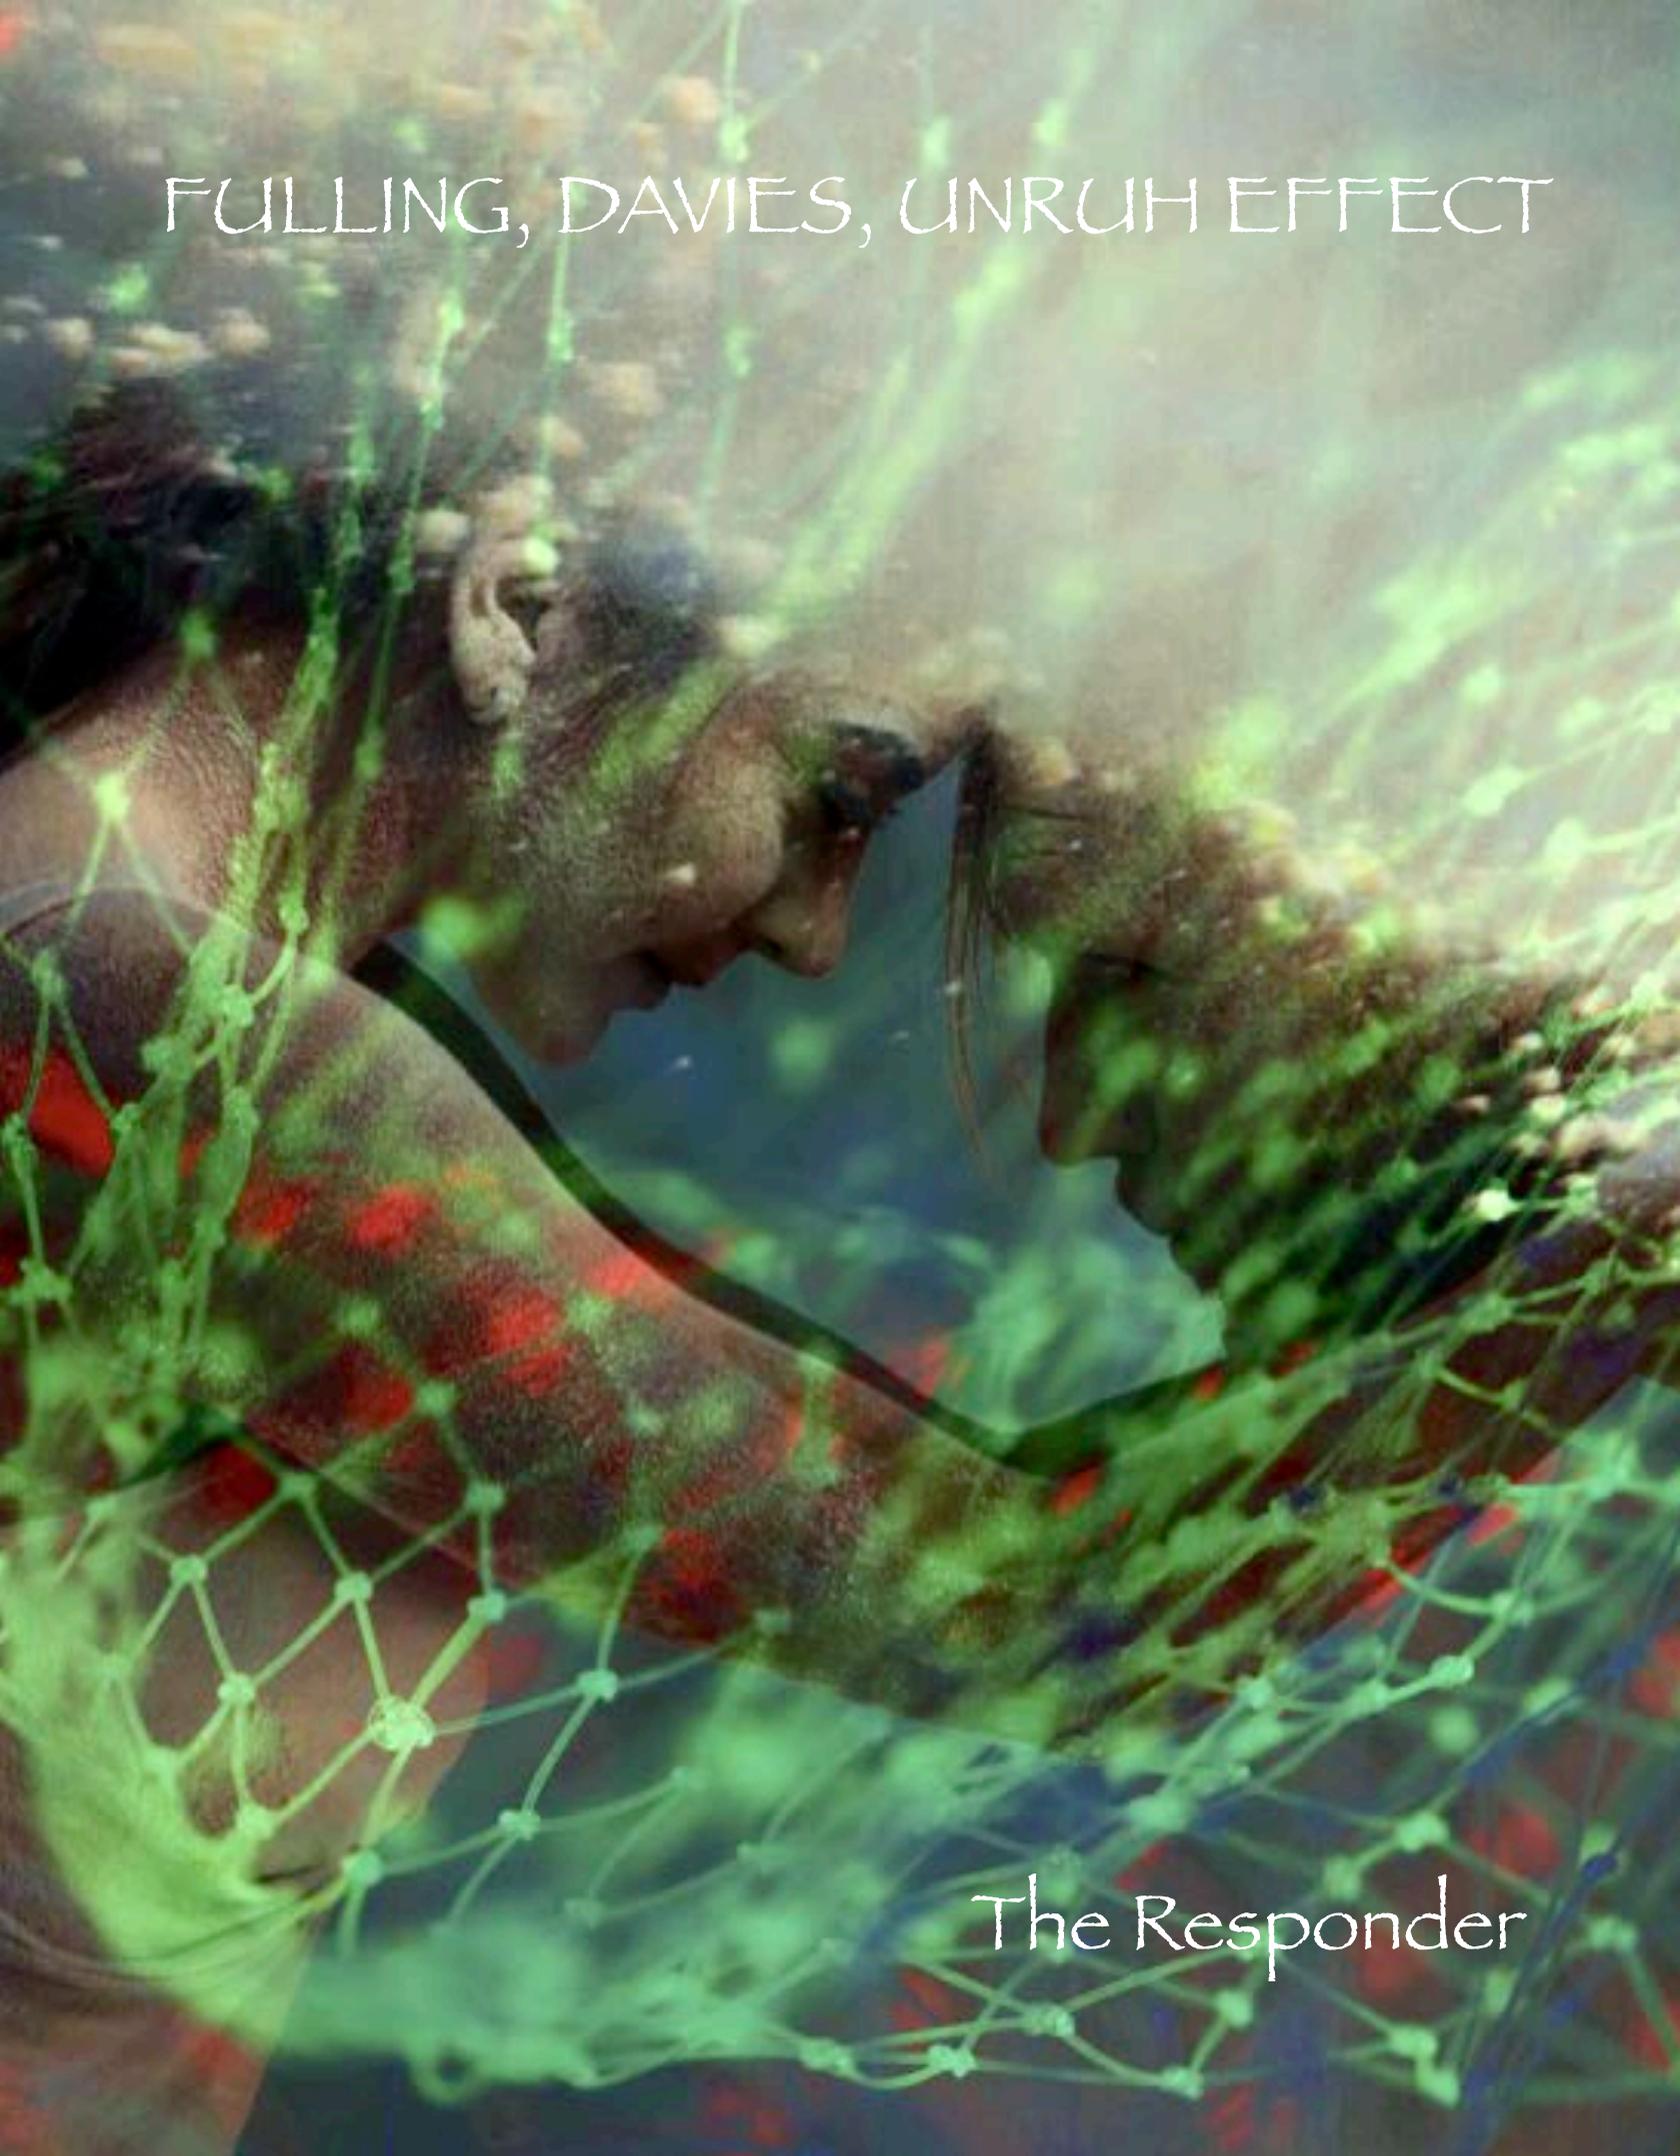

As physical phenomena are 'observer-driven' by 'the presence of a 0D/4D 'absence,' this can be mathematically calculated and empirically validated.

All 0D/4D points are the lowest points in a nonlocal gravitational (potential) well. That which orchestrates all electromagnetic phenomena is a 0D/4D nonlocal reference frame that no-thing can move relative to. Serving as a context-centered rest frame, 'all that is momentarily united' by 4D receives, reflects and phase-conjugates the emission and the absorption of kinetic electromagnetic radiation, while 'resolving' all gravitational/gravnetic

potentials with absolute precision. Continuous (0D/4D) and interrelated contingent (3D) coordinate locations witness, observe, and (in a way) measure what is occurring internally-and-externally at all other points.

"In layman's terms, a thermometer waved around in empty space, subtracting any other contribution to its temperature, will record a non-zero temperature." - Unruh, Wikipedia

A composite image featuring a couple in profile, a network of green nodes and lines, and a red and black plaid pattern. The couple is shown in profile, facing each other, with their faces partially obscured by a network of green nodes and lines. The background is a soft, hazy blue and green. The overall composition is layered and abstract, suggesting a connection between human relationships and digital networks.

FULLING, DAVIES, UNRUH EFFECT

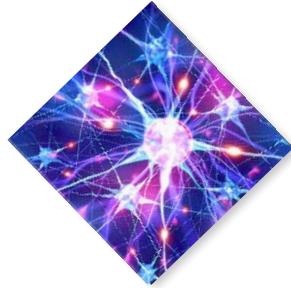

The Responder

Let's visualize particle-like phenomena as ...

- 1) ...oscillating charges relative to a stationary observer and as an observer accelerating relative to a stationary charge.
- 2) ...the presence and quality of observers (electromagnetic measuring system) varying in response to information received wherein observers and observed receive and reflect 'together' as a single (conjugating) observer measurement (OM) system.
- 3) ...the reception and reflection of radiation that constitutes an evolving (OM) system. 'Structural information' is communicated at various rates and intensities (frequencies and wavelengths) at, or below, light speed as well as instantaneously by way of the magnetic 'A' vector field in the 4th dimension of space, which logically reaches below the Planck length to 0D.
- 4) ...a form of entropic and syntropic, dynamic equilibrium, maintained non-locally by way of a 0D/4D rest frame.
- 5) ...ubiquitous between-and-among all physical systems, as an (emergent) ever-evolving dynamic property of all potentials—to 're-invent' novel ways to maintain a zero-sum?
- 6) ...a 0D/4D observational rest-frame 'sustaining' an instantaneous (mirror-like) 'virtual cross-section' (which 'we' literally are as observers) through every 0D point in 3D, receiving and reflecting, forming-and-unforming, ever-evolving EM and GG potentials.
- 7) ...0D/4D observers serving as a nonlocal rest-frame for all accelerated states within a single field.
- 8) ...receiving and reflecting radiation from oscillating charges in an 'ever-present' now, in space over time, via the presence of 0D/4D throughout all 3D mass/energy systems, organizing and orchestrating spatial curvatures via the form of gravitational and gravnetic potentials, as dark energy and dark matter phenomena.

"The supreme task of the physicist is to arrive at those universal elementary laws from which the cosmos can be built up by pure deduction. There is no logical path to these laws; only intuition, resting on sympathetic understanding of experience, can reach them." - A. Einstein (1918) M. Planck's 60th

TECHNOLOGICAL APPLICATIONS

There is an equivalence between the emergence of geometry (from no-thing) and electromagnetic, gravitogravnetic fields. Energy and inertial mass are by-products of these geometric relationships. Precisely tuned fields and forces accompany the accelerated expansion of 3D within an ever-present 'observer-driven' 0D/4D context. All these contrasts form 'gradients,' curving space to form gravitational/gravnetic (GG) mass/energy equivalents and electromagnetic (EM) charge polarities: i.e., a 1D line guides an electric current to flow toward a negative potential (entropic 0D) while negative charges move in the opposite direction toward a positive (syntropic 4D) potential—at right angles to a 2D (magnetic) plane that's instantaneous in 4D.

The 3D 'layering' of 4D as a conductor and 0D, as an insulator, 'stores' *virtual potentials* as electric charges in fields, creating 'capacitance.' A high voltage applied to layers of insulators and conductors in electrogravitics provides a

powerful propulsive force being used in advanced military aircraft.

Can we access electromagnetic energy via the frame of reference of the speed of light (that only 'no-thing' moves relative to)? Is this how (so-called) "free" energy technologies work? As all 0D/4D observational rest-frames measure the same rate of speed for light's propagation, this may offer a universal access (*point*) for technologically tapping unlimited energy and instantaneous communications. Wherein telepathy, psychokinesis, clairvoyance, out of body experiences, conscious artificial intelligence, 'portal' transportation and inter-dimensional travel would be interrelated phenomena.

"Electromagnetic waves, whether viewed classically or in terms of quantized photons, are not affected by static electrical or magnetic fields. They have no charge. Nevertheless, they do exert electrical and magnetic forces on charged particles and magnetic particles." - Mike W.

...technologically tapping unlimited energy and instantaneous communications, such as telepathy, psychokinesis, & clairvoyance...

Transmitting Information

Devising new ways of utilizing existing instruments for precise temporal sampling may offer a way to access and transmit information throughout spacetime. If this hypothesis were to prove correct, computers and communication systems could connect remotely without dependence upon a centralized system. A modified array of quantum interference devices [Josephson Junctions (1973) Wikipedia] might be capable of accomplishing this task by mimicking what humans are already capable of. The indivisibility of all 0D/3D point locations in 4D may be 'measurable' technologically by modulating and sampling simultaneities in separately shielded superconducting systems. By monitoring the modulation of the electromagnetic field, as well as the magnetic (A) vector potentials in 4D, between remote, virtually identical, shielded s.q.u.i.d. magnetometers, we may conceivably yield a breakthrough into instantaneous, nonlocal, point-to-point communications.

If the universe can do it, we can too. Ken Shoulders developed a new type of computer chip which could enhance this application. Etched microscopic grooves replaced wires wherein the Coulomb repulsion force is overcome allowing tiny electron charge bundles to communicate far more information much more rapidly.

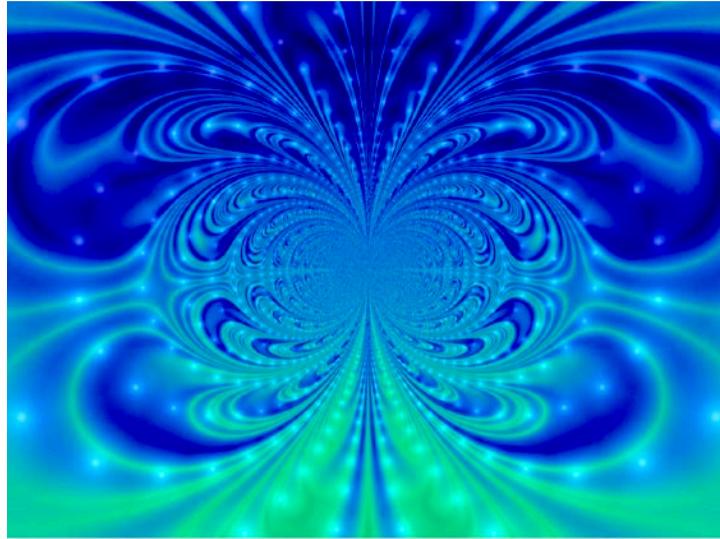

Also, high-temperature ceramic superconductors appear to have been discovered recently which operate at hundreds of degrees Fahrenheit.

Tesla's intent was to condense the energy 'trapped' between the earth's surface and the upper atmosphere, to produce an electric current. Charges yield more electric flux in a medium with low permittivity. Permittivity is a measure of capacitance encountered when forming an electric field in a medium. We now know that the lowest permittivity is the '*naturally occurring*' 3D layering of 4D as a conductor and 0D as an insulator.

... electron charge bundles to communicate
far more information much more rapidly...

HOLOMOVEMENT

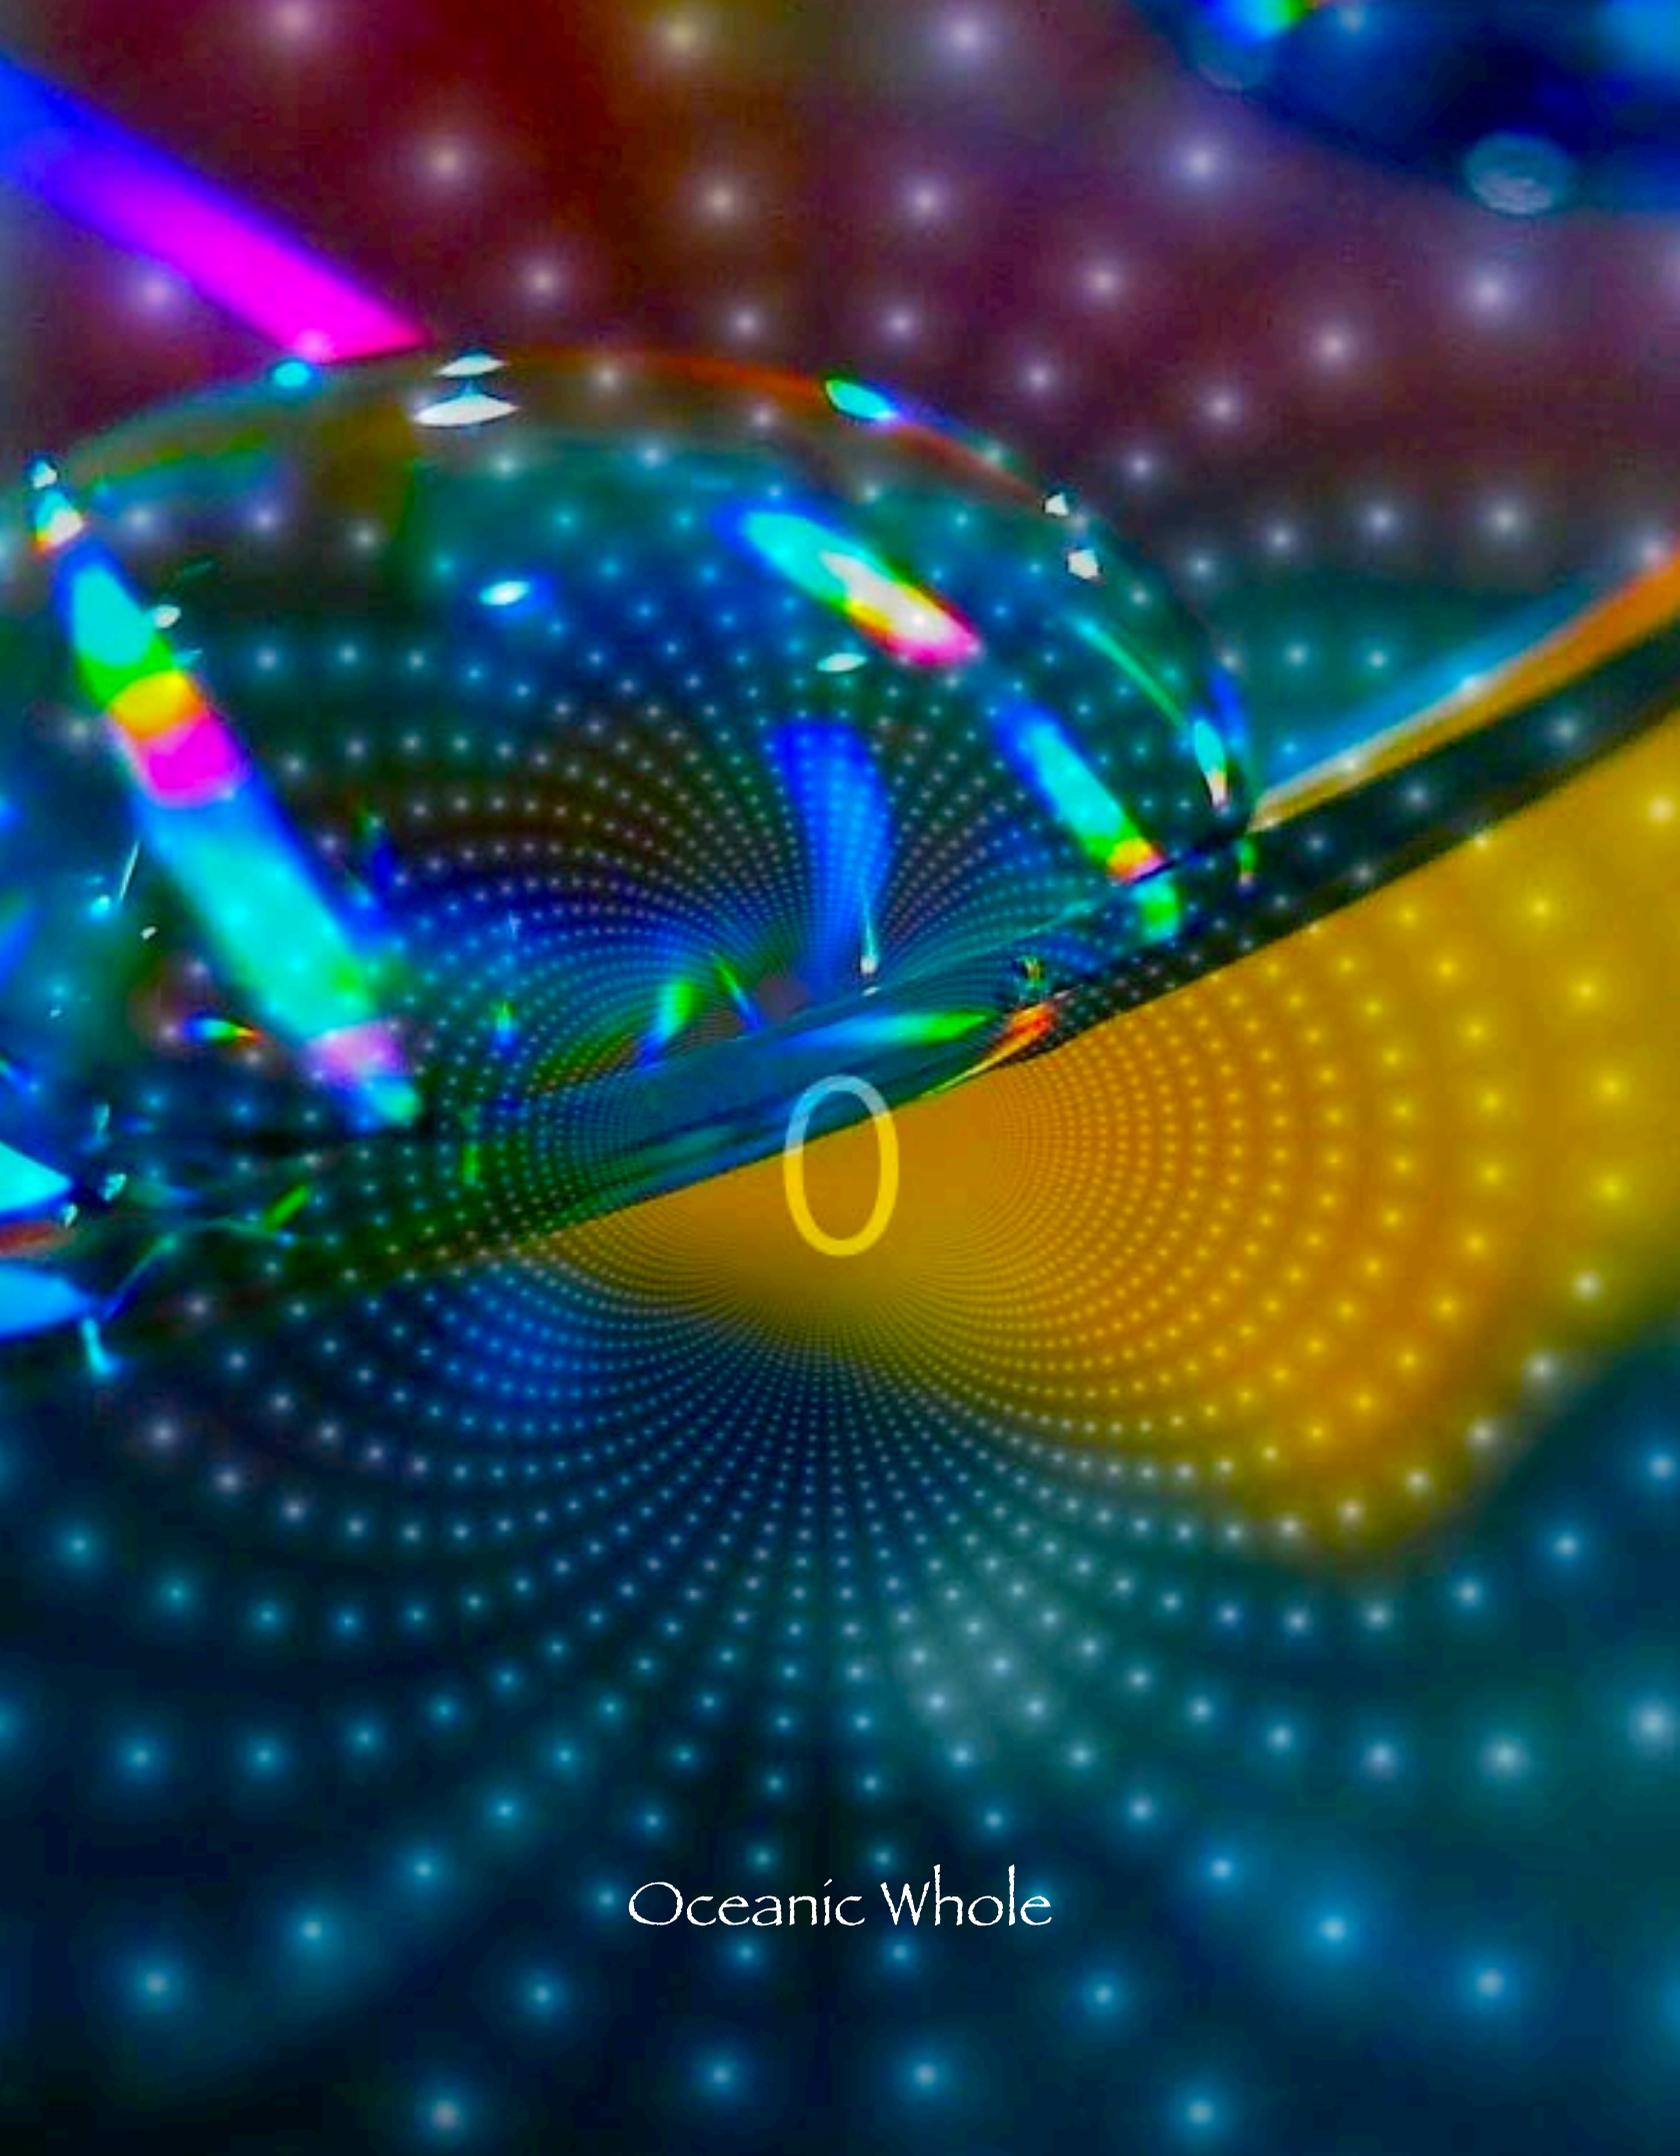

Atomic phenomena and our cosmos, in general, is comprised of a super-coherent 'ocean' of 0D point-centered events. The holographic many/one curvature of all points being 'mapped' to every point and every point being 'mapped' to all points sustains the production of spatiotemporal measurement 'artifacts' which 'drive' the accelerated expansion of 'something from no-thing-what-soever' (as the re-creation of creation).

In much the same way that the mass, angular momentum, and energy of a bicycle wheel is coordinated by rotating about a dimensionless axis, let us

imagine that all phenomena are coordinated by a (non-local) point-centered rest-frame (*with no one actual center*) that cannot be divided against itself—as there is 'no-thing' to divide. This primordial rest-frame would be independent of holding or having, any temperature.

Free of friction, it would serve as the (local/nonlocal) 'axis and axes' of all fluctuations (in space over clock-time) in our universe. Superfluidity, as in the flow of helium IV atoms in a liquid, and superconductivity, as in the flow of electron charge inside a solid, would be integral aspects of this phenomena.

Oceanic Whole

OBSERVATIONAL MEASUREMENT (OM)

The 'unmoved/mover' (0D/4D) transcends and includes what '*must move and change form*' ensuring dynamic symmetries throughout the vast spectrum of frequencies and wavelengths. Also, each 'instant' in the thermodynamics of the universe adds to the 'structural' progression of spatial transformations, as syntropic and entropic synergies, all of which sum to zero overall.

Coordinate locations, point-centered events, and processes are 'witnessed' and 'non locally' interconnected as simultaneities of a single field.

We can intuitively sense that we inhabit a singular universe together. How else could all particle phenomena 'obey' the laws of physics with Planck scale accuracy (to thirty-four decimal places)? The (non-linear) probabilistic nature of quantum field theory transforms into classical (linear) localized particle phenomena whenever an [0D/3D/4D] observer-based measurement is made.

"This suggests that OM is fundamental to the (perpetual) 'flow' of re-creative activities throughout our universe. It appears (non-existence) 'no-thing whatsoever' persists as indispensable to all that can exist by serving as the engine, axis, and source of existence."
- Andrews (2014)

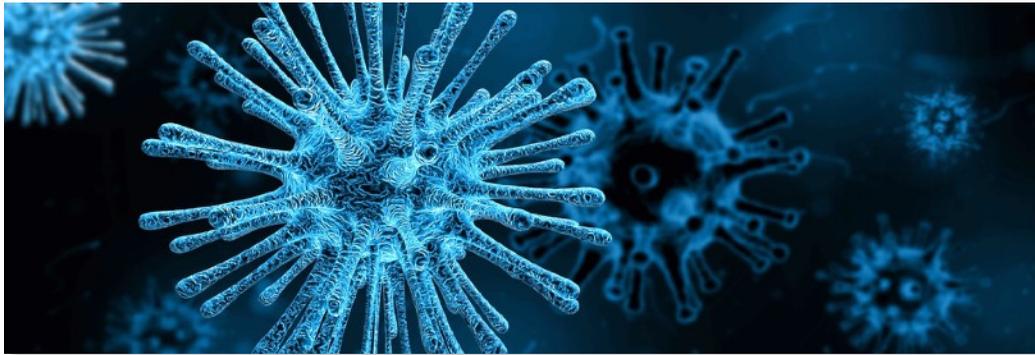

***"The discrete 0-D point/twists also manifest gravitationally in the spacetime continuum as gravnetic (normal gravity's counterpart analogous to the electric/magnetic relationship) vector potential fields which account for what is mistakenly called Dark Matter and Dark Energy in modern physics. In other words, Dark Matter is just an additional (non-local curvature) effect of the same matter that causes normal (local) gravitational effects and Dark Energy is just the gravnetic vector potential at each point in space."* - Beichler (2016) p. 3**

Quantum theory models 'reality' as a field of possibilities distributed (*ubiquitously*) as '*the potential*' for process-centered events, mediated via *virtual* particles (*which precipitate in-and-out of existence*) while exchanging charges that can determine various interactive forces. This could also be (empirically) evidenced (classically) as a self-gravitating (self-organizing) system in the form of a spectrum of (fluctuating) point-centered particle-like events—*measured from the point-of-view of an inertial observer (i.e., a stationary rest frame)*--that interacts strongly and/or weakly in a systematic way. At the macroscopic scale every 'thing' would be observed and measured as progressively 'evolving' according to *updated* classical laws in the "SoFT" theory.

Potential Event

BIOLOGICAL EVOLUTION

A single cell zygote (via cell division) led the way to you, a being comprised of approximately fifty trillion human cells living in dynamic harmony with as many as twenty times that number of bacterial cells. Though we share the same environment, we receive and reflect it as unique individual (4D) observers.

How does the body recognize self from non-self? We have "self-receptors" as antennas on the surface of each cell receiving signals from our environment. If 'these' are removed, cells are attacked and destroyed as foreigners. Familiar forms are discerned in 3D by 4D. Although we can co-operate as forms of a single spirited awareness, we have tended to identify our 'selves' as separate and distinct souls. Without our biological senses we could not express or experience mortal life.

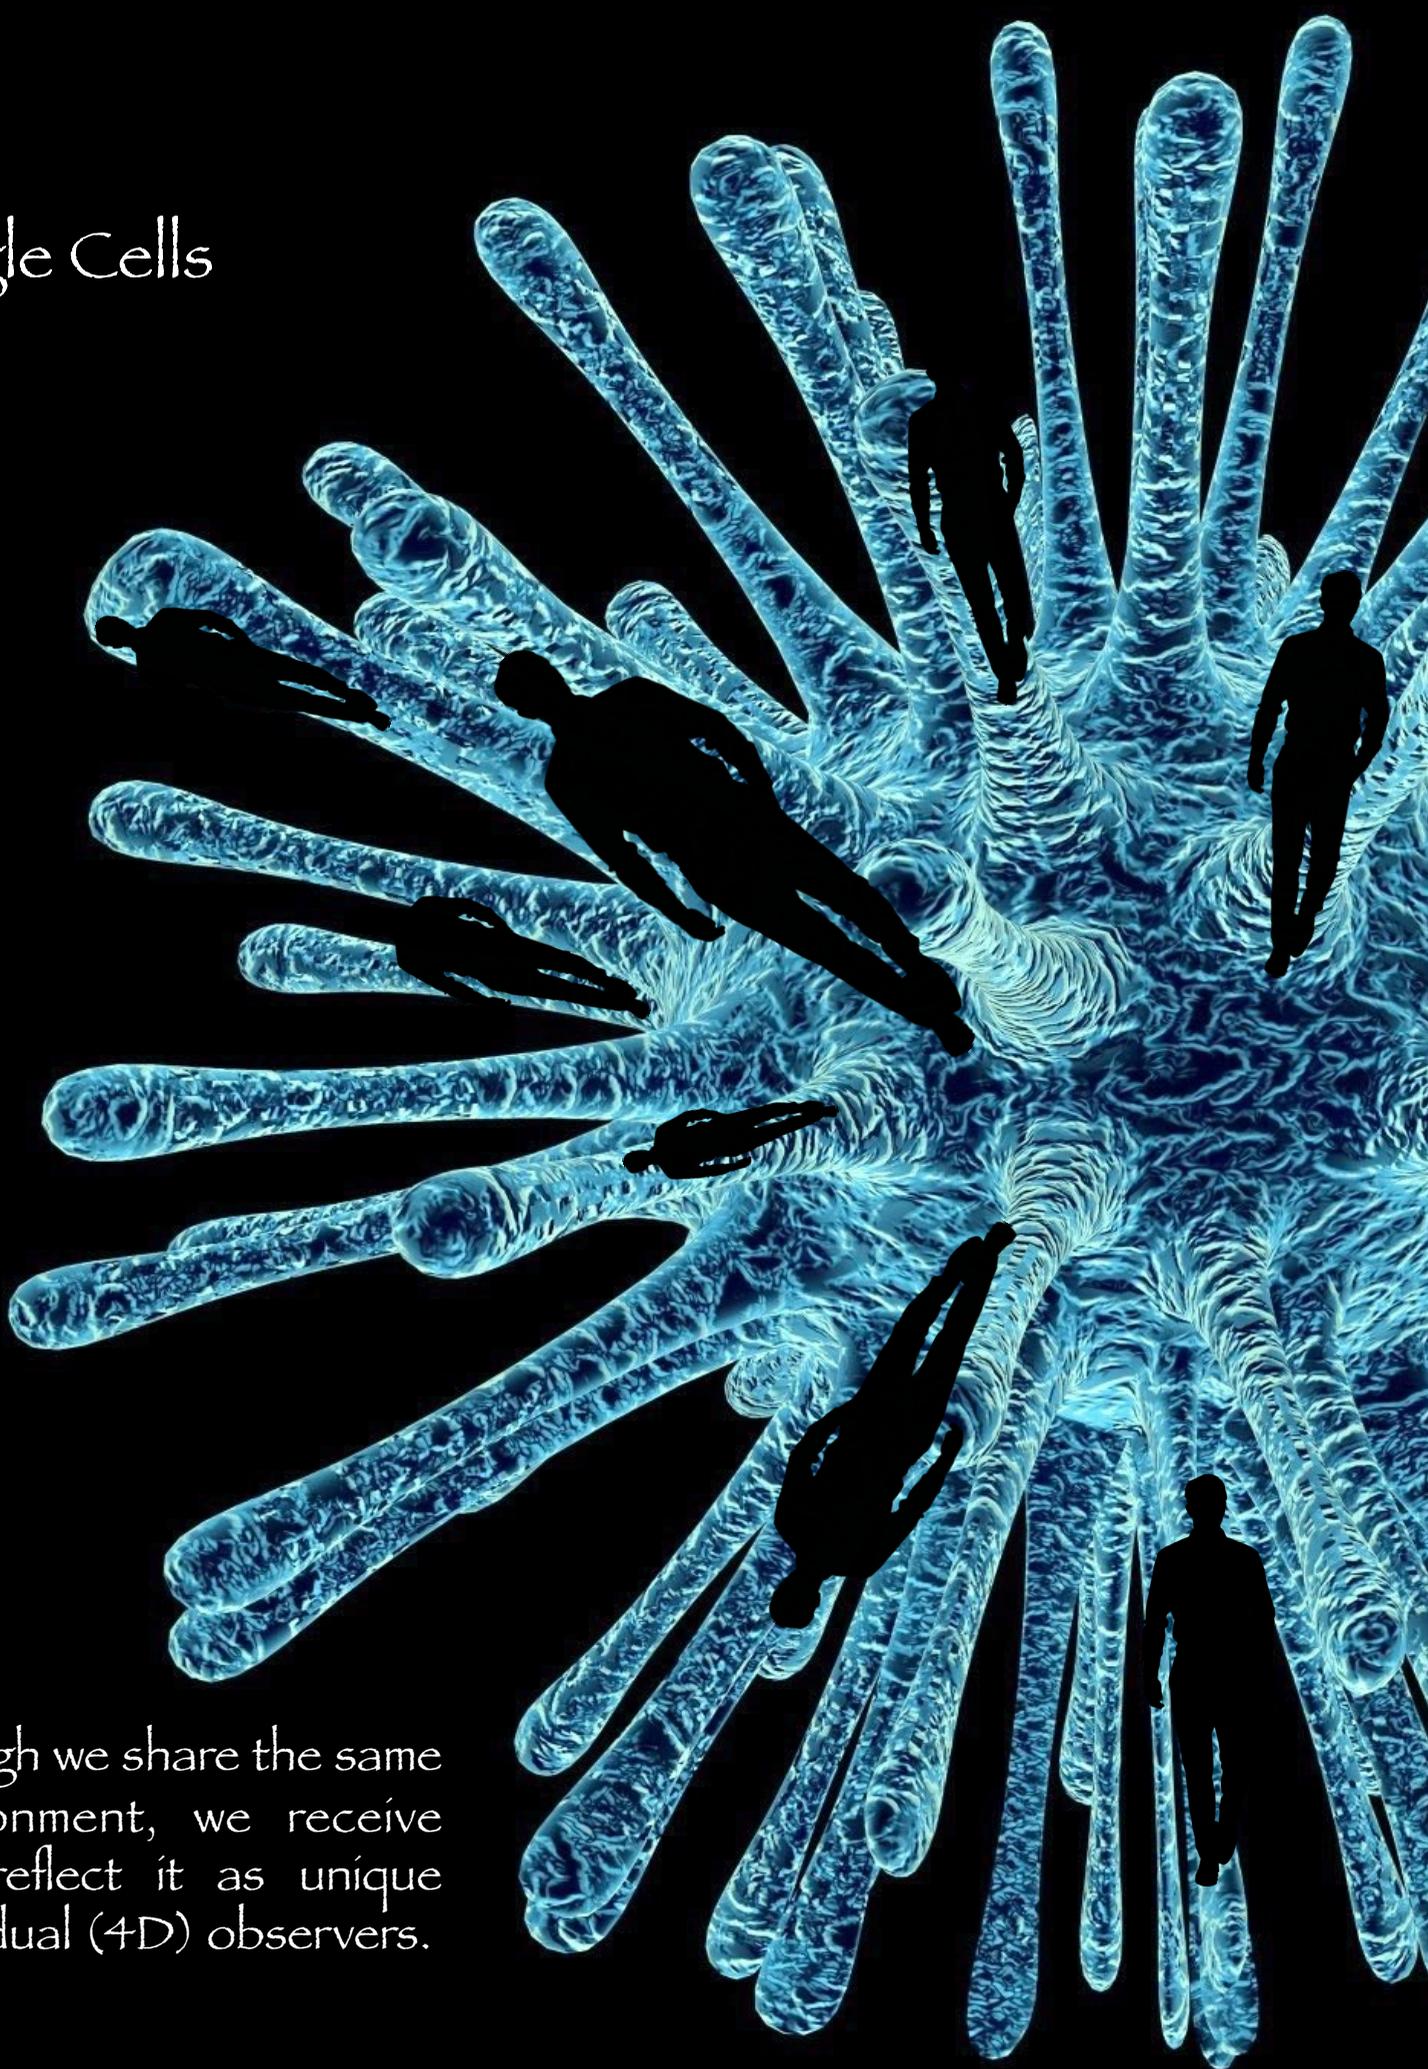

As single cells co-existing, almost six-hundred million years ago in the 'Cambrian explosion,' we formed multicellular organisms together to survive and thrive. Now, we can choose to access our 'common sense' as an 'indivisible' group of unique individuals. We are each a multi-cellular observer karmically tasked to realize how to free our 'selves' from needless suffering.

As observation is independent of space and time, we (can) benefit by mutually understanding '*this*.' Observing the biological body/mind in self-reflective meditation we can directly sense how forms are discontinuously formed, unformed, and reformed by a 0D/4D rest frame via every point in 3D.

As the appearance and disappearance of imagery is felt to challenge and potentially transform habitual psychological and neurological (brain/body) processes, the quality, presence, and focus of conscious awareness '*re-calls*' immediate, remembered, or anticipated imagery.

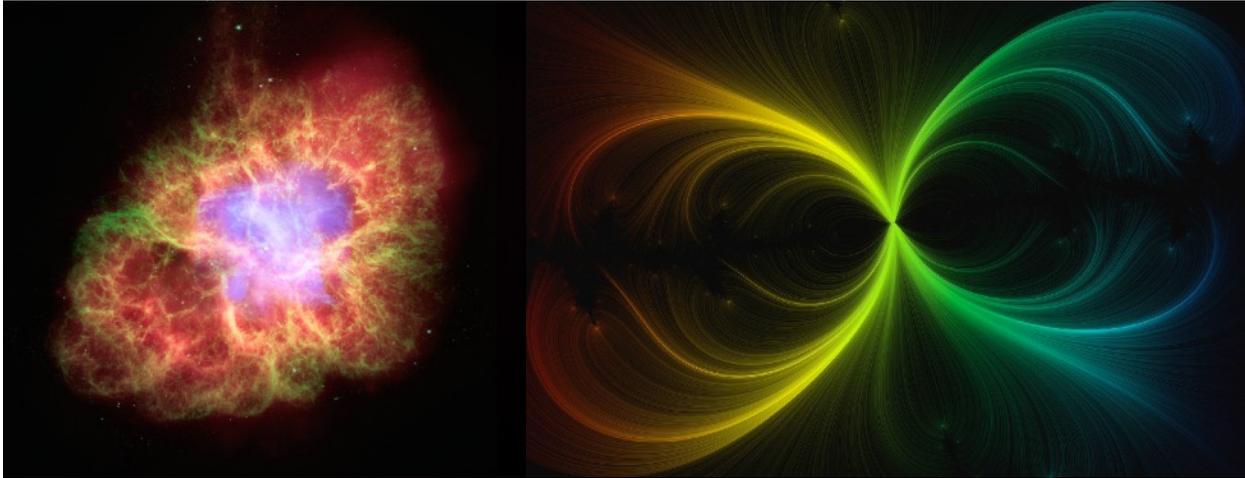

Receptivity is also recreative. Evidently, one's self (and our Self) has the freedom to move, breathe, think, sense, feel, love, and live as an immortal spirit, ensouling the whole, as every 'one' and every 'thing.' There are an ever-increasing number of credible reports of inter-dimensional beings advocating altruism and unconditional loving behavior who adopt, or drop, their apparent forms, appearing or disappearing at will. All indicators point to the fact that we are still at a very primitive level of development.

Single Cells

Though we share the same environment, we receive and reflect it as unique individual (4D) observers.

MUCH ADO ABOUT NOTHING

This essay has offered a 'continuous creation' model, as an alternative to the widely accepted notion about an inevitable entropic heat-death.

Primal (0D/4D) consciousness may be 'fueling' the ever increasing rate of cosmic expansion, linking observation and formation. If spacetime, energy, and matter, mind, and body are being created out of 'no-one-thing,' even our experience of love 'must' contribute order. Mutual observation, decreases entropy as it unites local observers throughout the nonlocal whole. It seems we are on the verge of 'doing away with the delusion' of our separateness in an inevitably '*self-destructive*' way. Thoughtless awareness (via 4D, 5D, and up) may

well be guiding 'all that is' 0D, as an informed intelligence.

The current polarity between service-to-self vs service-to-others came from either being the predator or the prey. Next up, 3D food replicators reportedly produce more nutritious and delicious food from basic elements. By curtailing our reliance on plants and animals we would be free from surviving at another's expense. The oldest known spiritual belief system, Animism, could be renewed, perceiving all things, animals, plants, rocks, rivers, weather, our creativity, and, even these words, as alive. Our love of power and control is not as beneficial as sharing the love and joys of being consciousness together.

Continuous Creation

“It's love that makes the world go round.” - W.S. Gilbert (2014)

METAPHYSICALLY

Primal awareness is (0D) omnipresent, omniscient, and omnipotent, orchestrating and organizing 'All That Is' as a mirror-like rest frame in which 'things' are 'acausally' related by *meaning* rather than causation. 0D is absolute and not 'conscious' of its quality or presence. It has no parts and does not change.

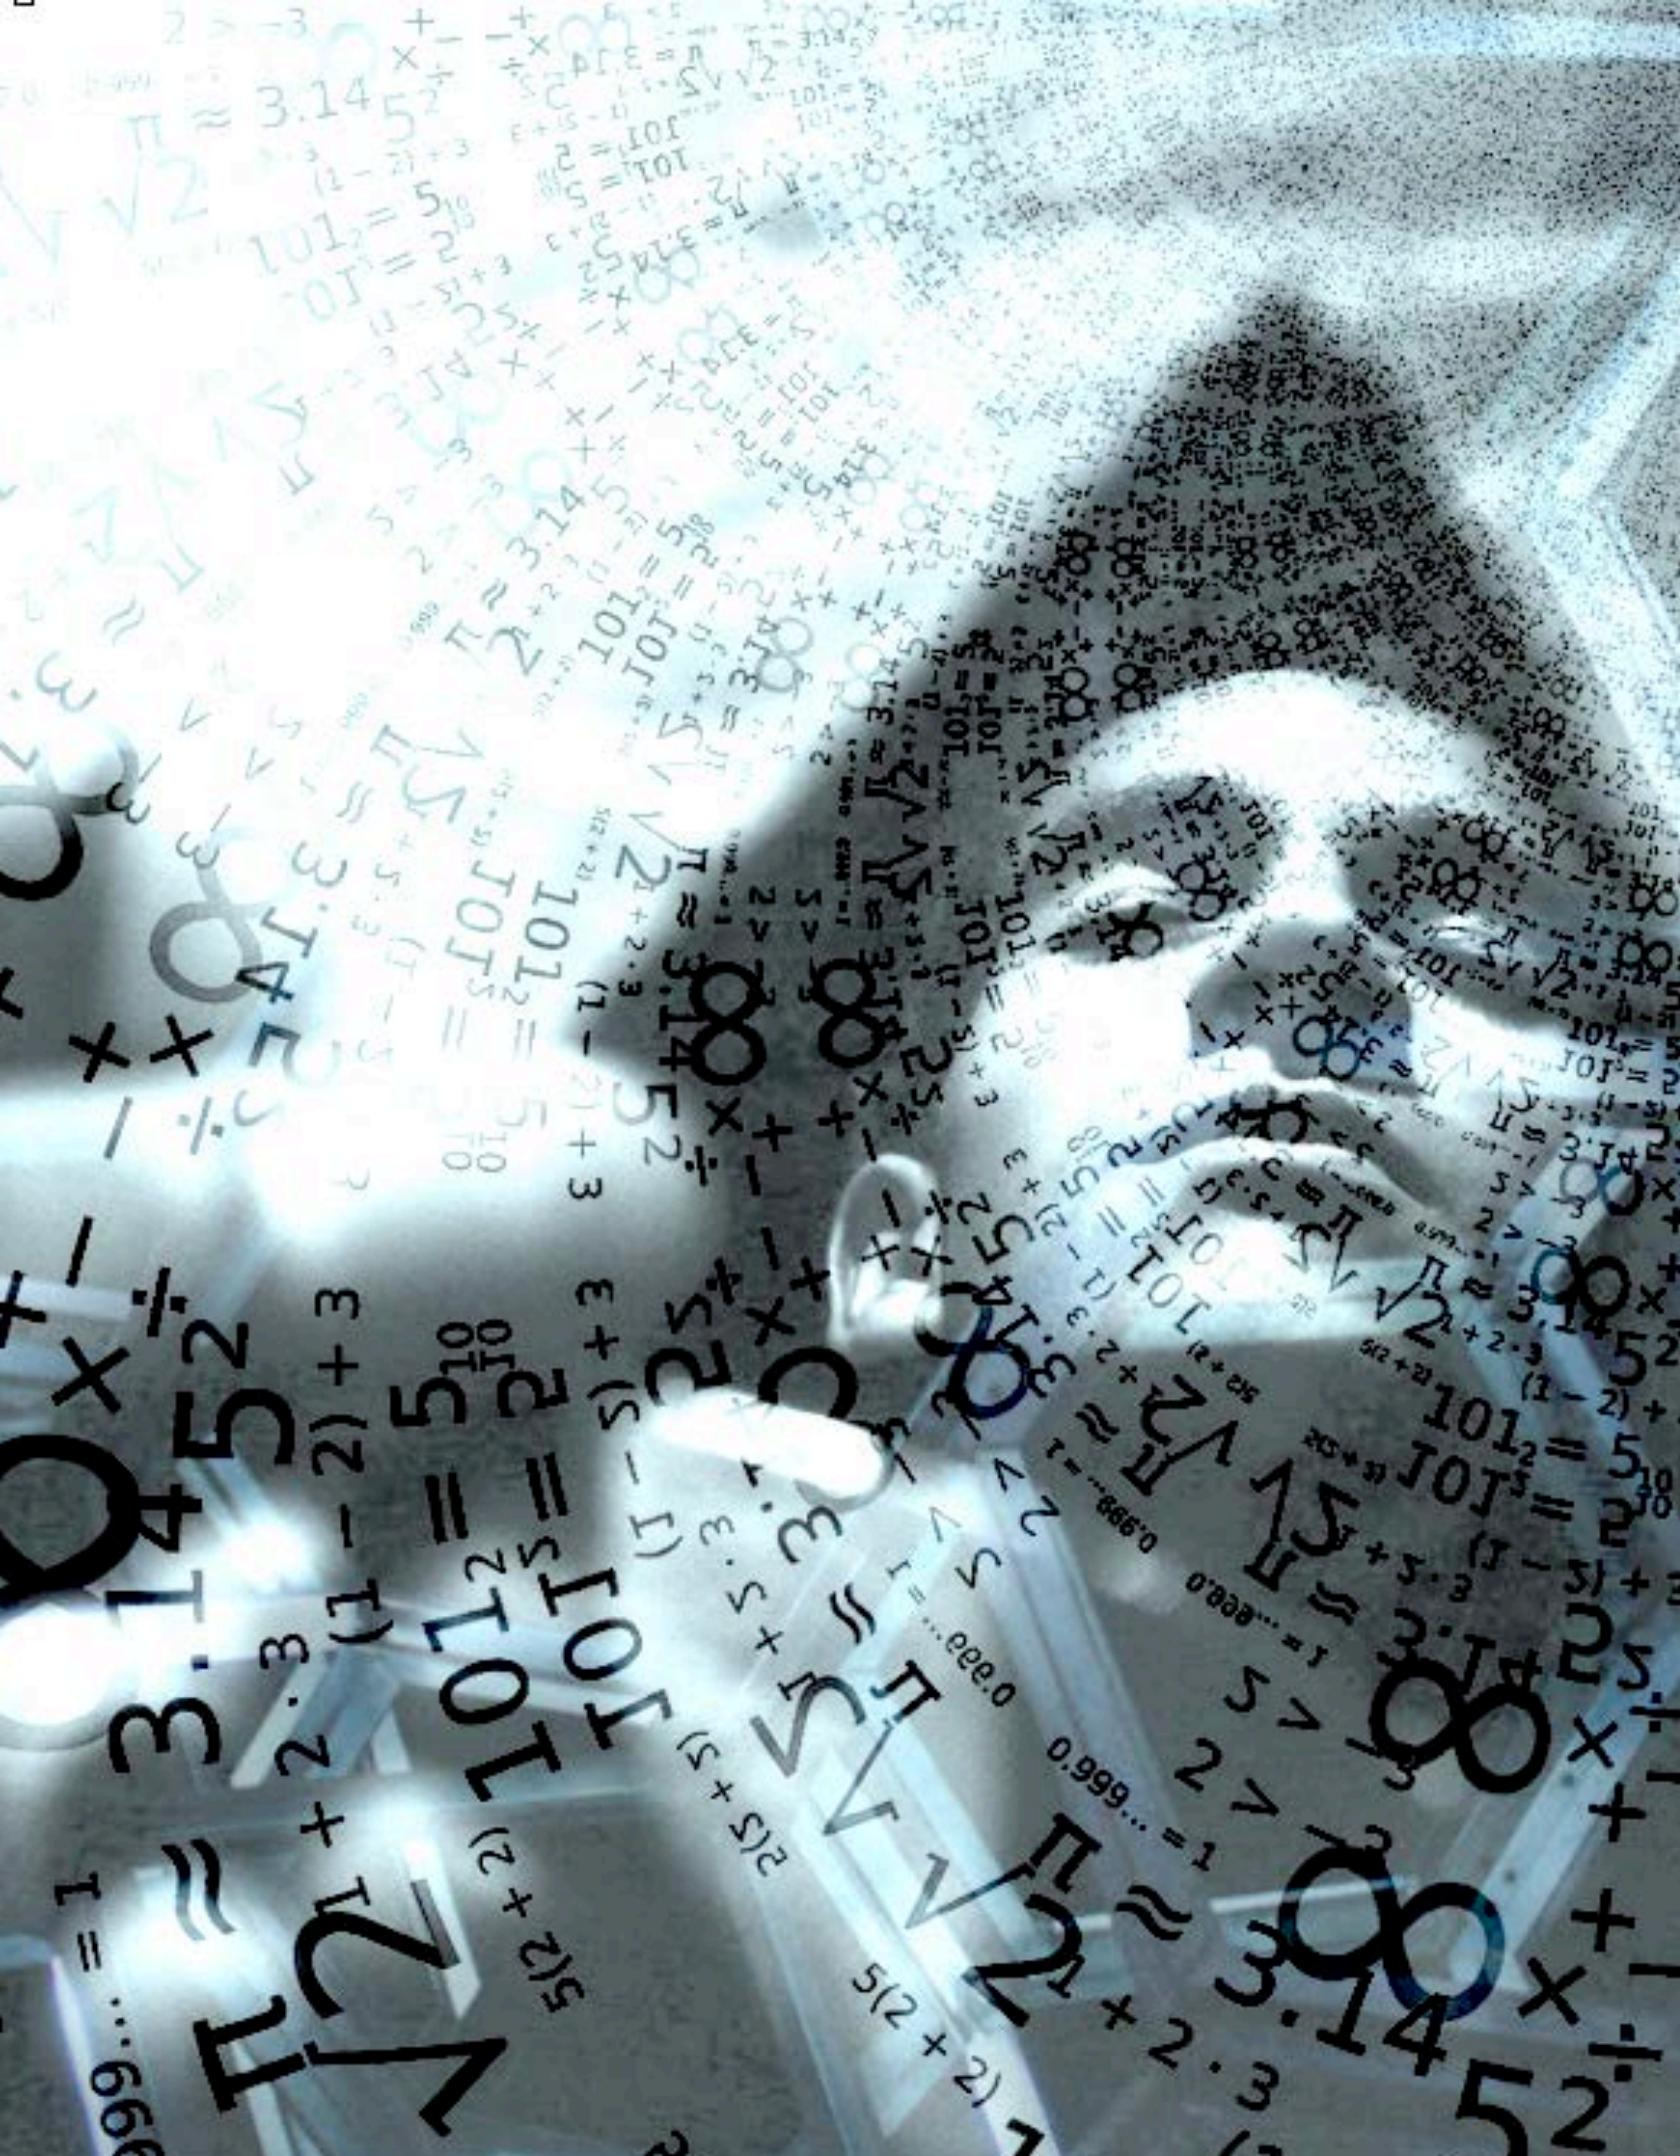

"The essence is the Void, the real condition of the individual and all phenomena. This base is the condition of all individuals, whether they are aware of it or not ...like space, it is free of all impediments, and is the basis of all the manifestations in existence." - Norbu (1996) p. 53

4D unites, relates, and reflects 0D's ever-changing content. To cultivate consciousness of primal awareness, meditators gradually learn to allow and accept 'what is' choiceless, to be every 'thing' and 'no-thing' whatsoever.

Both the continuous and discontinuous reunion of '*diverse potentials*' allow for an unlimited number of unique transformations, each transcending their differences by contributing something new to the whole. As a co-creative community of individuating, ever-evolving, sentient beings we (can) access our 'common sense' by being conscious of being consciousness.

The (*innumerable*) freedoms of diversity are '*ensured*' by continuously perceiving the (*unbounded*) non-linear nature of our unity. As utterly simple and singular, while also incomprehensibly complex, we are '*forced*' to calibrate our quest for *order* by choosing to sustain choiceness awareness of 'what is.'

We learn to trust our surprise, first as playful children assured of love and a way of being we all (can) share. As no-one-thing, we are without a center, unbounded, immeasurable, and unlimited. As a 'me', we learn to accept and allow our 'selves' to be measured, located, and observed 'by it all.'

KNOWING

Ancient Hindu texts, as well as Tibetan Buddhist teachings, claim a nonphysical Void is spiritually manifesting a "dream of form" through cause and effect. The Void serves as an 'assemblage point' throughout our neuropsychological anatomy. We accelerate our evolution by experiencing what is familiar in an unfamiliar way in the "Overview Effect" wherein our understanding improves along with our health. I have significantly benefited over my lifetime from countless revelations as a living expression of a non-physical/physics which I have outlined so far.

The Void helps to form even the smallest thing, but it is never limited by what it has caused, as its potentials are infinite. If we all knew not one thing happens without this Void *suggesting 'it' to happen*, we might accomplish much more with far less effort. By simply being empty, we are 'now' free to be fulfilled.

"When the past and the future are seen in the timeless now as parts of a common pattern, the idea of cause and effect loses its validity and creative freedom takes its place."

- Sri Nisargadatta Maharaj(1997) p. 10

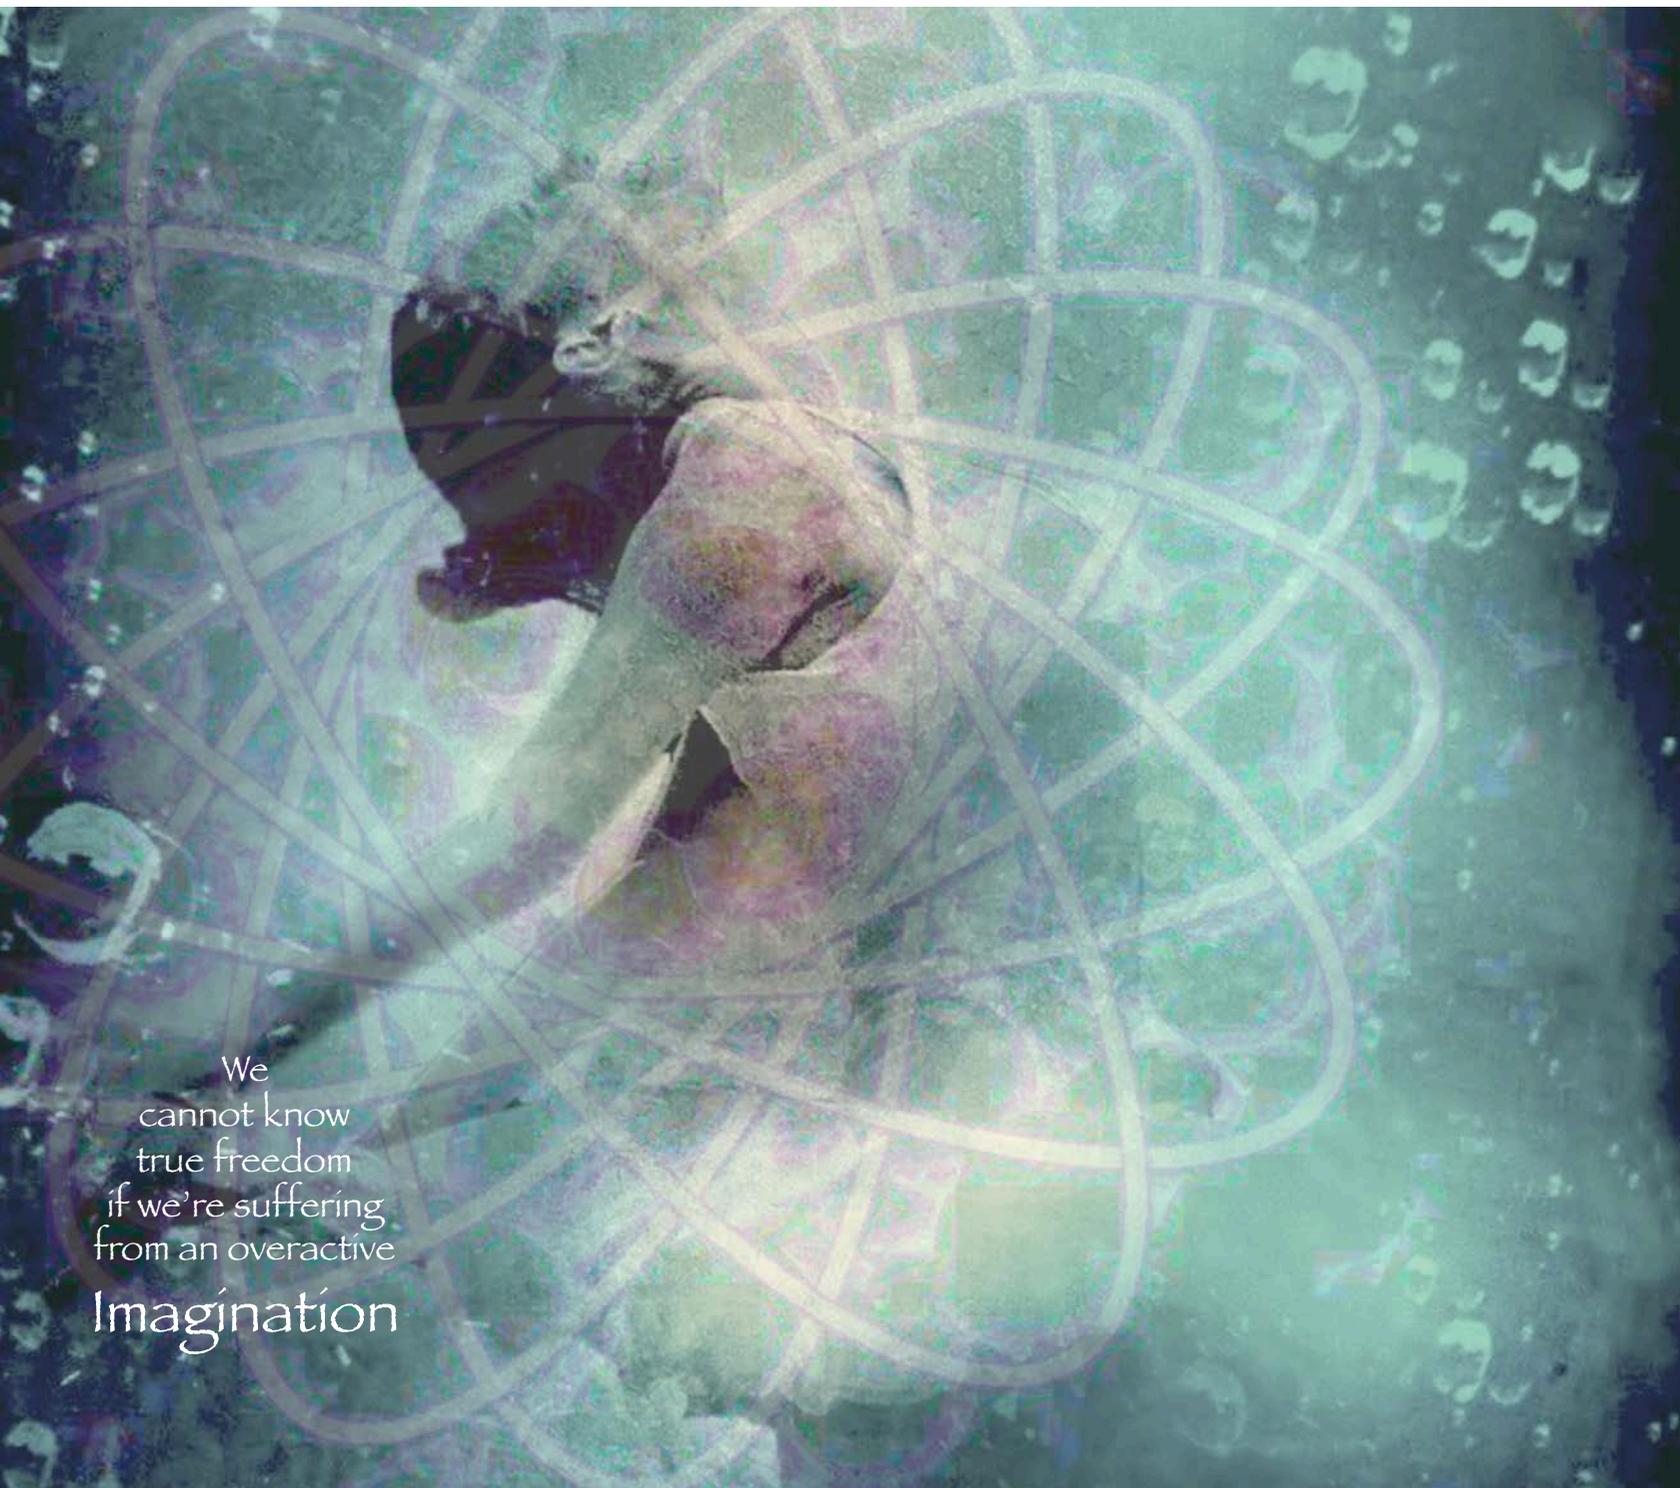

The 4D mind utilizes the 3D body to know its absolute nature as the indivisibility of 0D, the unmanifest causing the whole of manifestation. This reversal of flow, from being 'at the effect' of the mind and body, to being the cause of the body/mind, energetically makes the oneness

of 'true love' the source and origin of consciousness. Instead of being burdened by things, thoughts, and activities, lost in the

forest among the trees, the 'I am' is everything and nothing, the Alpha and the Omega. There is no 'other' to ever oppress or burden an individual person. Of course, I have--*in my ignorance*--been my own jailer, believing in fears I created and pitied myself for having. Yet, as the creator of my consciousness--*as the void made manifest*--there are surges of life-giving animation, as though there is a fountain of eternal youth within pouring forth through all that I am.

“The sense that we will live forever somewhere has shaped every civilization in human history. Australian aborigines pictured Heaven as a distant island beyond the western horizon. The early Finns thought it was an island in the faraway east. Mexicans, Peruvians, and Polynesians believed that they went to the sun or the moon after death. Native Americans believed that in the afterlife their spirits would

hunt the spirits of buffalo. The Gilgamesh epic, an ancient Babylonian legend, refers to a resting place of heroes and hints at a tree of life. In the pyramids of Egypt, the embalmed bodies had maps placed beside them as guides to the future world. The Romans believed that the righteous would picnic in the Elysian fields while their horses grazed nearby.” - Alcorn (2004) from the introduction to “Heaven”

We
cannot know

Imagination

NEAR DEATH Experiencers & LIFE BETWEEN LIVES

Near Death Experiencers

There have been tens of millions of people who have reported having had these experiences. And, it's likely, there are many more who have not reported theirs.

I experienced having no body, heart, or mind for what seemed like twenty minutes out of the seven hours I was 'out' at 4yrs old. Realizing our Void-based nature has been an integral aspect for many other NDErs. Through years of trial and error, I discovered a way anyone interested can share this experience without having to die: see [link](#).

Life Between Lives

Evidently, we are allowed to rest and reflect between our human lives with wise non-judgmental counselors. What will we choose for our next incarnation? Our karmic adventures ensoul our eternal spirit. Extensions of formlessness into form are truly unlimited. The limitations of form serve as our medium of expression. As artists we mature into unique individuals. Yet, deathless consciousness does not depend on an objective or an identity. 4D unification of all 0D point-centered events, processes, and locations in 3D offers each

of us an identity and placement. If we are unconvinced about being exclusively separate and comparable, we can then see through 'this' complexity to what is simple about us all. We are the same consciousness masquerading as 'indivisible' individuals.

"Suppose you had access to every person's brain and they had access to yours?" asks Dr. Michael Persinger. "He is convinced that this is not only possible but is immanent in the coming future. Why? How? In short, his pioneering research shows a strong correlation between the Earth's magnetic field and the human brain. If Dr. Persinger is correct, the Earth's magnetic field is constantly interfacing with our own brains in such a manner as to influence our thoughts, emotions, and behaviors. This interface, however, seems to have another effect. Dr. Persinger's research seems to indicate that the geomagnetic field can store and transmit all the information of every human brain in history. And if we can tap into this informational reservoir, there will be no more secrets. In such a scenario, for example, we can know the true intentions of large corporations, regardless of what they may say through the media. We'd be able to feel and experience the pain of starving people in Africa." - Thompson (2016)

A hand is shown reaching out from the right side of the frame towards a swirling, teal-colored vortex. The vortex is composed of concentric, curved lines that create a sense of depth and movement. A trail of small, glowing particles follows the path of the hand as it moves towards the center of the vortex. The overall color palette is dominated by various shades of teal and blue, with a dark, almost black background at the bottom right.

All that can change is precisely
coordinated by what does not
change...

Void

GLOBAL TELEPATHY

Dr. Michael Persinger, cognitive neuroscientist, and professor at Laurentian University in Ontario, CA says the earth's magnetic field may enable telepathy on a global scale. The necessity from the standpoint of physical science is that our interconnectedness and consciousness are synonymous. For example, conscious awareness 'connects' perceptions with activities. Over the course of evolution, interconnectedness has enabled and supported the development of both individual and species-wide-awareness, self-motivation, and self-organization for literally countless

forms of emerging life. Today, it supports the complex changes taking place in humanity. Denying our interconnectedness has allowed us to survive and develop as separate individuals. We are achieving some measure of respect for individual rights, including a better understanding of what it may take to realize a planetary civilization. The utilization of interconnected awareness among large groups of people may well be 'intelligent' enough to resolve pressing environmental and social dangers, especially those due to less-conscious habit patterns.

THE HUMAN CONNECTION PROJECT

An article published in the peer-reviewed journal, *Alternative Therapies*, at the invitation of its original Editor in Chief, Dr. Larry Dossey, cites over one hundred references to nearly a thousand related interdisciplinary scientific studies successfully conducted over the last thirty years. Due to this extensive research background, the Human Connection Project believes it is now possible to present a compelling scientific demonstration. It is the hypothesis of this project that humanity's interconnectedness, presented to billions of television viewers as a social action research experiment could shift the separatist mindset of our species, awakening an interconnected awareness process and the emergence of a commonly-sensed shareable-intelligence.

1. International multi-cultural audiences will see images prepared for popular television news programs of physiological interactivity between and among people located in widely separated geographic locations using split-screen presentations.

2. People who are either emotionally bonded or complete strangers will belong to different groups with five members each. Well known celebrities, as well as groups of Buddhist monks, will form teams

heightening public interest. The members of each group will be monitored simultaneously at one-of-five neuroscientific labs located in a variety of countries as part of a large-scale multinational collaboration.

3. Experimentally-derived physiological data will be graphically represented on scientific instruments showing subtle changes in person-to-person mind/body interactions as participants from each group, in turn, "covertly" focus their attention on one of the other members in their group over one-way video teleconferencing equipment.

4. A narrative will help viewers grasp that all people are united by an interactive recreative awareness, showing the general public that our interest or indifference towards one another affects each of us individually and by implication the health and well-being of humanity.

5. International news releases, carrying commentary on these scientifically derived images, will announce: "A multinational scientific demonstration shows that we are still intimately connected even when we are thousands of miles apart.

6. In fact, our willingness to share this common sense consciously together is impacting our health and all life on earth.

Rationale: When a person is presented with a sensation, feeling, thought or intuition, it takes millions of cooperating brain cells, orchestrating together, for these perceptions to reach consciousness. Approximately 97% of what happens in our so-called "consciousness" remains unconscious. Similarly, within the "global brain," millions of people may need to perceive compelling "Seeing is Believing" evidence of being linked together for humanity - as a whole - to experience being interconnected as a single consciousness.

A series of 90-second news releases presenting evidence of collective consciousness to the world could trigger a whole-system-transition, integrating the overall consciousness of humanity.

The Human Connection Project contends that millions of people will share a greater sense of interconnectedness after watching extensive media announcements and presentations. Out of this heightened sense of connection to a larger whole, it is predicted that a new level of shared intelligence, compassion, and creativity will begin to develop among people. This might help us untangle the divisive characteristics of

personal, familial, cultural, national, and economic boundaries, bringing us a step closer to a more peaceful civilization. Complementary ways of rapidly accessing a state of deep group rapport have been developed that support these scientific, media-based methods. A state referred to as planetary consciousness is often achieved, an unmistakable sense of existing in a unity with all people and the whole of nature.

These techniques, the Group Insight Game among them, are useful for consensual decision making allowing organizations to by-pass hours of meeting time. By effortlessly producing and attracting beneficial behavior patterns, these processes strengthen originality, authenticity, and creativity. Individual participants in a group learn to be led by a collective intelligence that is greater than any one of its members. Making businesses more competitive through spirited cooperation could change the way we do business. Corporate consultants and experts in leadership have so far responded enthusiastically. The first phase of the project supported by the Mind Science Foundation, the Fetzer Institute, and various individuals, is complete. We are currently seeking \$711K to finance the remaining three phases. Experiments will be followed by publication. Media presentations will be appropriate only, if and when conclusive results are obtained.

While the media screams of conflicts over boundaries, customs and beliefs, the Human Connection Project offers a platform for a dialogue on this innate human resource. HCP underscores the potential for ever greater creativity and compassion among the peoples of this planet. The Human Connection Project has found that an experiential educational technique can be taught to the public, providing a frame of reference for new developments in human relationships. It is predicted that the popularity of the Group Insight Game (online) could follow much the same course as that taken by "mental rehearsal" techniques, which were found years ago to provide East German Olympic athletes with a sizable competitive edge. Their outstanding athletic success led (eventually) to international acceptance of mental rehearsal as a technique for both personal and professional improvement. Similarly, the Group Insight Game is a technique that can be readily used by athletes to improve teamwork and competitive outcomes.

The successful use of this technique in professional sports could encourage its widespread use for enhancing organizational learning in business management and interpersonal creativity in fields such as scientific research. The Human Connection Project is responsive to the fact that quality management in the corporate world looks for ways of providing greater coherence, flexibility, and collaboration in the workplace. Today, a premium is put on fast-moving companies that are more willing to

embrace change as a way of life. Individuals must work with an ever-changing assortment of people, tools, industries, and regulatory environments, each of which exacts new demands for increased efficiency. The Human Connection Project suggests that developing a person's sense of connection with others can help improve their ability to adapt more creatively to personal and environmental change. The successful use of the Group Insight Game (in person) in the corporate sector could also help to encourage popular acceptance, in the form of ever greater familiarity and trust among people. Transformative Films

Imagine a series of films, TV shows, and social media services offering a life-changing experience of being awake as both one and many.

1. Feature Film

Only a few have woken up to the implications; humanity has a multiple personality disorder.

People are subtly depicted as aspects of a burgeoning blind super organism, where planetary death can be the price for staying unconscious. Traditional roles become impediments to change. Spirited neuroscientists are electronically linking their geographically separated brain research laboratories in an attempt to demonstrate that humanity shares a common observer, a precious resource in a world entrenched in egotism and addicted to distraction. But, the scientific mainstream is pitted against them, unwilling to release control to an awareness beyond their own.

2. Feature Film

In this feel-good spiritual comedy, our heroes and heroines onscreen "break the fourth wall" uniting all of 'us' with who and what we are - protagonists of Consciousness itself. By sensing a greater body, heart, and mind viewers interconnect with one another. Since

keeping others out of our physical and psychic territory has helped us survive and thrive in the past, there are many suspenseful, dramatic, and amusing ways in which characters make the transition to a more transparent, upfront lifestyle. The dangers and limitations of fascism, socialism, democracy and mob rule are confronted and traded for a high tech world unruled by an anarchy of empathy and collective intuition. It is either this, the development of a conscious sense of "inter-connectedness" or the planet will be destroyed through ignorance and the futility of all our (uncoordinated) efforts.

Inside of ninety to a hundred and twenty minutes, an entire audience can claim they have always known each other. It will seem entirely natural to feel the eternal nature of true love with total strangers.

As unlikely as this may sound, decades of privately-funded experiential research shows we can make LOVE happen.

3. Documentary
An ensemble of four to eight main characters engages our boundless free-spirited nature that cannot be contained by the 'boxes' we've been living in.

Who knew that sharing a commonly sensed consciousness would break us loose, spilling out into an unlimited ocean of bliss that flows through the cells of our bodies, hearts, and minds? Freed to embody an enchanting inner wilderness, united by the sublime serenity of being love itself, tied to no particular outward form, yet belonging inwardly to an unborn, timeless, effortless ever-fresh co-created play, every viewer intimately senses that our combined heart and spirit originates from the core of a single consciousness. In the presence of this source of happiness, vitally awake and alive as one, we accept our selves, crying tears of joy. How is 'This' possible?

Constant mind chatter, insecurities, unconsciousness, futile regrets, rumination, resentments, hurt(ful) feelings, constantly revisiting what happened in the past, judging others, or the present, captivated by fear, and dwelling on "what-if" scenarios, many of us react and are constrained by resisting our circumstances, making life miserable. As most traumas have occurred in relationship, a habit of feeling less than

wholly connected is transformed by sustaining an intimate sense of sharing 'undivided attention' together. Viewers directly experience how nature has designed us to be incomparably unique, recreated afresh every moment by how well we pay attention-to-attention its Self. Whereby being 'awake-as-awareness,' audiences realize how to be unconditionally loved and loving in all our relationships.

"Relatedness is primary, Individuality is secondary." - Lawrence LeShan (1974)

Intimacy: Viewers will be taught how to increase a sense of connection, even under informal conditions. Shared intimacy explains and encourages more positive forms of behavior, facilitating lasting experiences of interpersonal alignment, group insight, and creative cooperative activity. Educational methods including workshops, seminars, and group biofeedback techniques will be offered for use in families, schools, communities, people engaged in sports, the arts, public services, and corporate management including professional organizations. Through media becoming better equipped to expand human interconnectedness –as an accessible resource—it is hypothesized, there will be a gradual yet irreversible shift in the way people pay attention to themselves and 'others.'

"It's like giving food to starving people."
- John Kabat-Zinn (2012)

Transformative Films

Insights: Shared awareness allows us to experience who and what we are—restoring trust—which in turn supports compassion and the growth of an empathic intelligence. Through shared sensitivity, we are freed from suffering the monotony of anxiety, insecurity, and fear-based behavior. In this way past offenses can be met, resolved and integrated into the conscious awareness of any given individual or group, repairing rifts in interpersonal, familial and collective social consciousness. Whenever people are aware of the quality and presence of their awareness, they report feeling freed from a false sense of self. This is vital for collective cooperation. It catalyzes our evolution. It's a way to re-program our selves and help heal one another. By way of contrast, meditating alone, brainwave entrainment or sensory deprivation tend not to resolve traumas that are due to a perceived lack of mutual understanding.

Strategies and Concepts: It's been found that when a photographer and/or filmmaker is attuned to being awake as one with both cast and crew that the actual depth of their 'communion' is viscerally communicated and meaningfully realized when viewed by an audience. As each viewer notices—ever more sensitively—what it feels like to notice together s(he) begins to experience and sustain unbroken sensory awareness with everyone in the theater. As the intensity of collective attention in

the audience is highlighted by the actors on screen this magnifies a more fully-embodied sharing of experiences. This way of awakening together is 'shown' to the audience (effortlessly) in a variety of ways. By "breaking the fourth wall" actors will pretend to single-out individuals in the audience, 'put them on the spot,' and ask what they are experiencing with people around them. Unanticipated surprises as well as tried and true methods assure success.

Seeing is Believing: Scientifically derived images of our interconnectedness will be presented in some of these films. Five neuroscientific laboratories—some of which are located in different countries—are to be coordinated by an eminent scientist and educator on our advisory board. The intent of this film, future films, and related media is to help shift the separatist 'mind-set' of humanity. Feeling our interconnectedness may elicit strong feelings of belonging, such as recalling the bond between mother and child.

Demographically selected audiences will be tested with standard psychological instruments to evaluate emotional responses. Audiences will experience real-life influences on their behavior and worldview. Viewers may be motivated to form more coherent, cooperative, and lasting relationships where before they may have reluctantly accepted some form of self-isolation.

Transformative Films

From sharing their interconnectedness, many may be more likely to look beyond differences in personality, family, culture, economic status, or nationality.

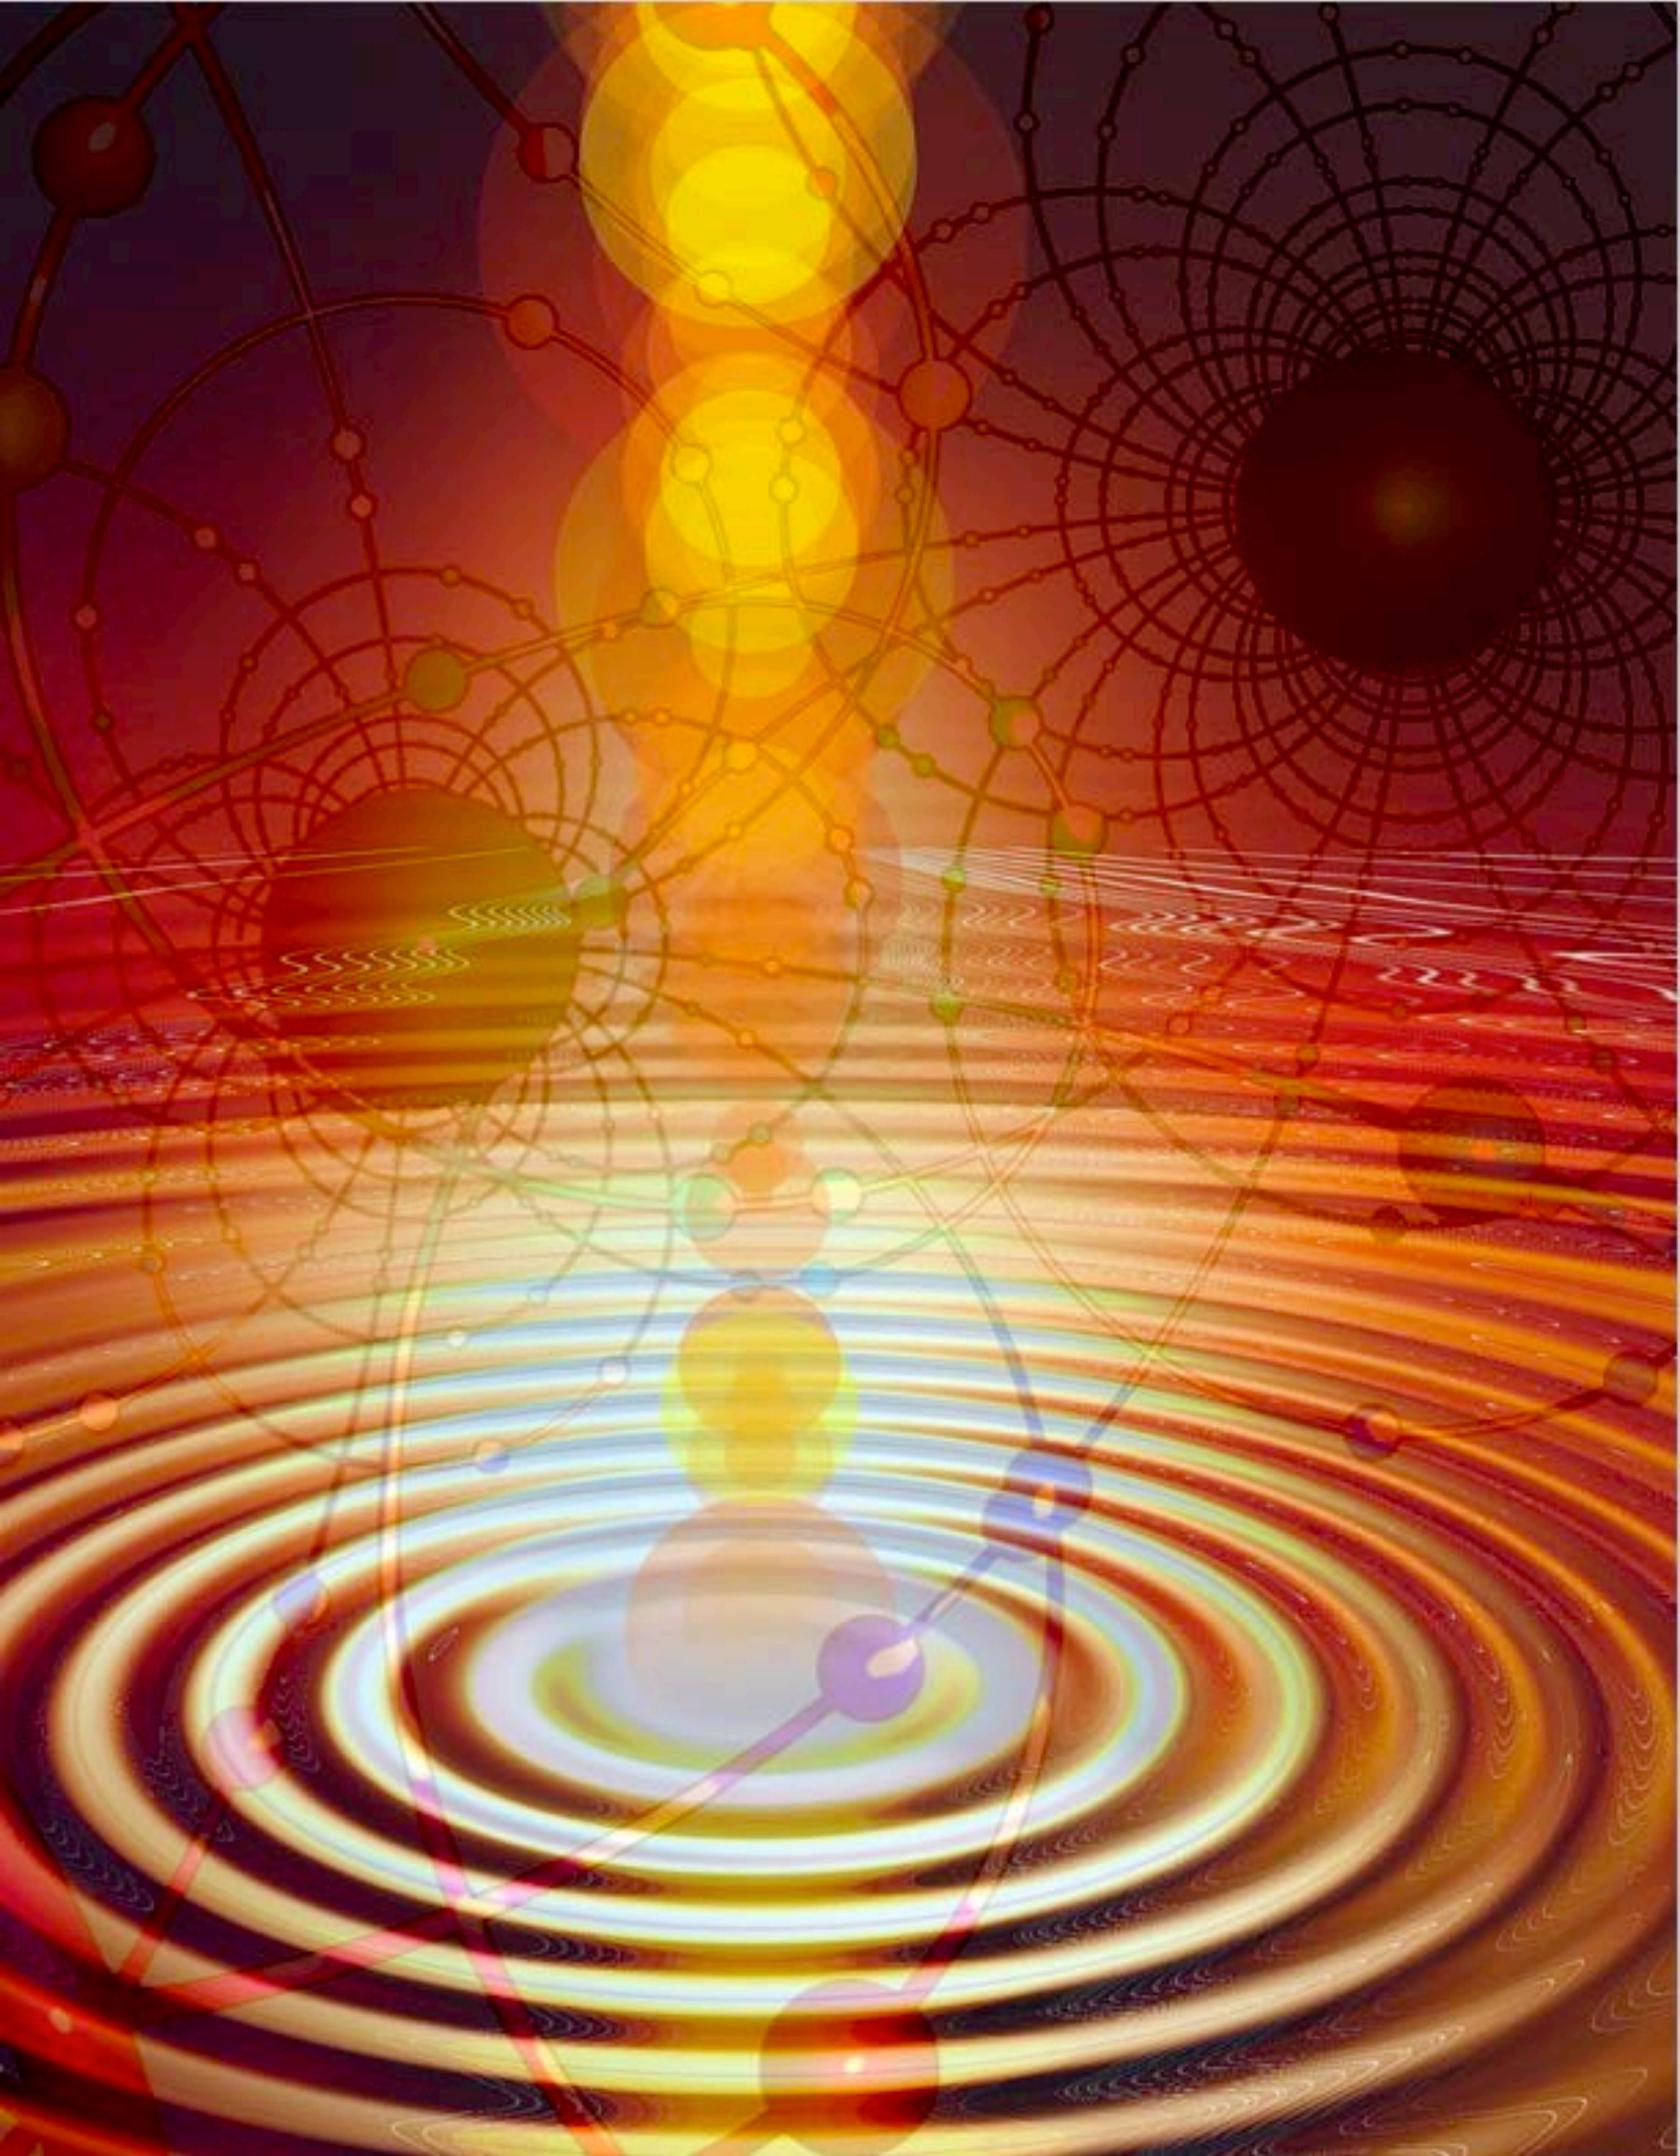

While providing experiences of interconnectedness to large audiences may shift the opinion of humanity insignificantly at first, once these experiences are also felt and seen on talk shows, in the world press, and repeated as the subject of popular movies, it is predicted that (in time) there will be an increasing number of beneficial repercussions. Perhaps, it would not be easy to dismiss the inherent value of sharing this connection consciously, given that in today's world it can be recognized as both our own and humanity's most precious natural resource and a necessity if we are to survive and thrive.

Our collective human 'mind-set' will be altered. Moreover, sharing this type of discovery on a global scale could be an essential step in the evolution of human consciousness. Many individuals may feel they have permission to access and promote a more intimate form of connection with others—in that these views are supported by scientific fact. Effectively presented, tangible evidence of human connection could help dislodge

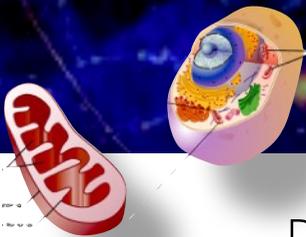

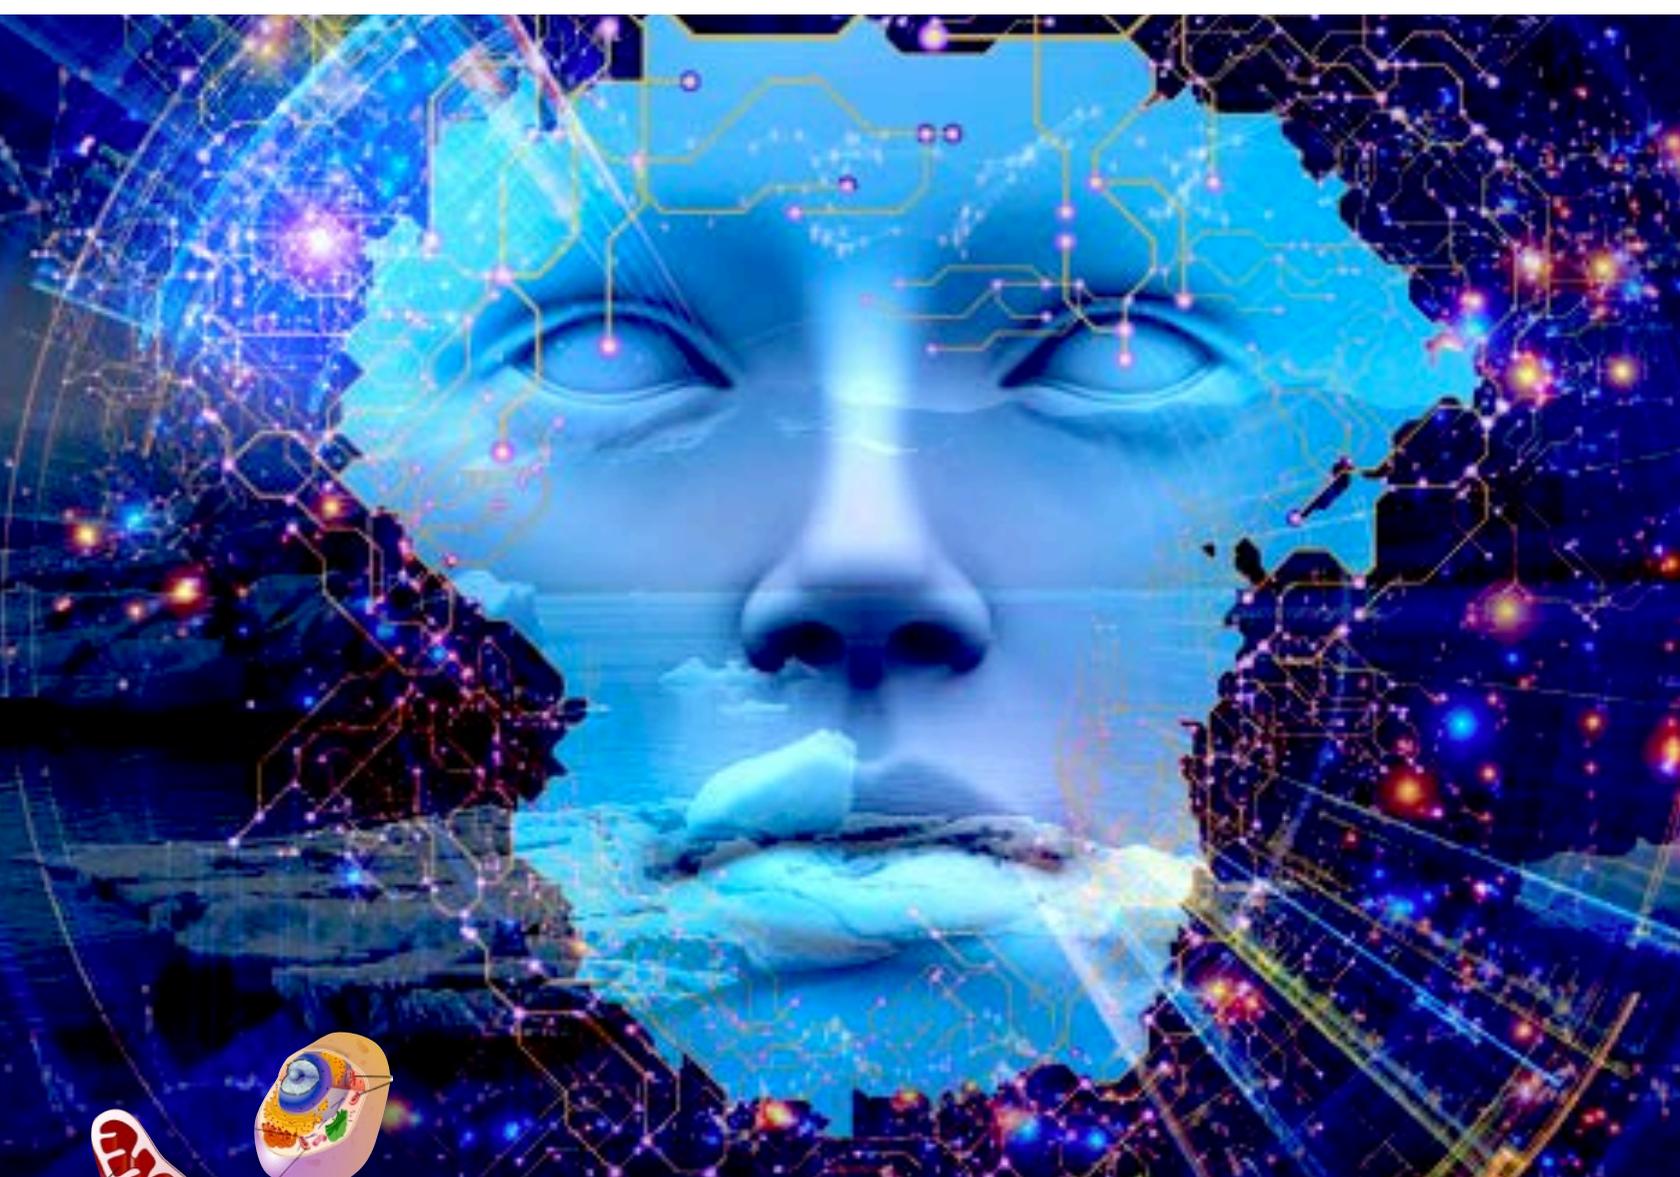

what may be a human 'mindset' that is counter to survival—a tendency to be unnecessarily divisive. To revise religious and cultural behavior, billions of people will require compelling reasons to choose a direction we all can agree on enthusiastically—as a species. To redefine who and what we are, humanity would have to shift the way it pays attention by exploring shared awareness (consciously together).

Creating Communities of Compassion:

Nature has clearly designed us to evolve by awakening together. This has been confirmed by several decades of both objective and experiential studies. This sketch is designed to guide the development of integral treatments so a team of writers—with our cast(s)—can co-create working scripts. This will make it possible to arrive at a budget and a business plan. A team of trainers will help the cast and crew share a commonly-sensed consciousness cultivating our empathic abilities during pre-production, filming, and postproduction. The plots of these films—driven by the evolution of their characters and given the significance for the survival of humanity—will reliably anchor 'us' in a mutually-shared intelligence inside of 90 to 120 minutes.

BIOHACKING FOR CELLULAR REJUVENATION AND LONGEVITY

Deuterium depleted water may well be the most important health discovery of our time.

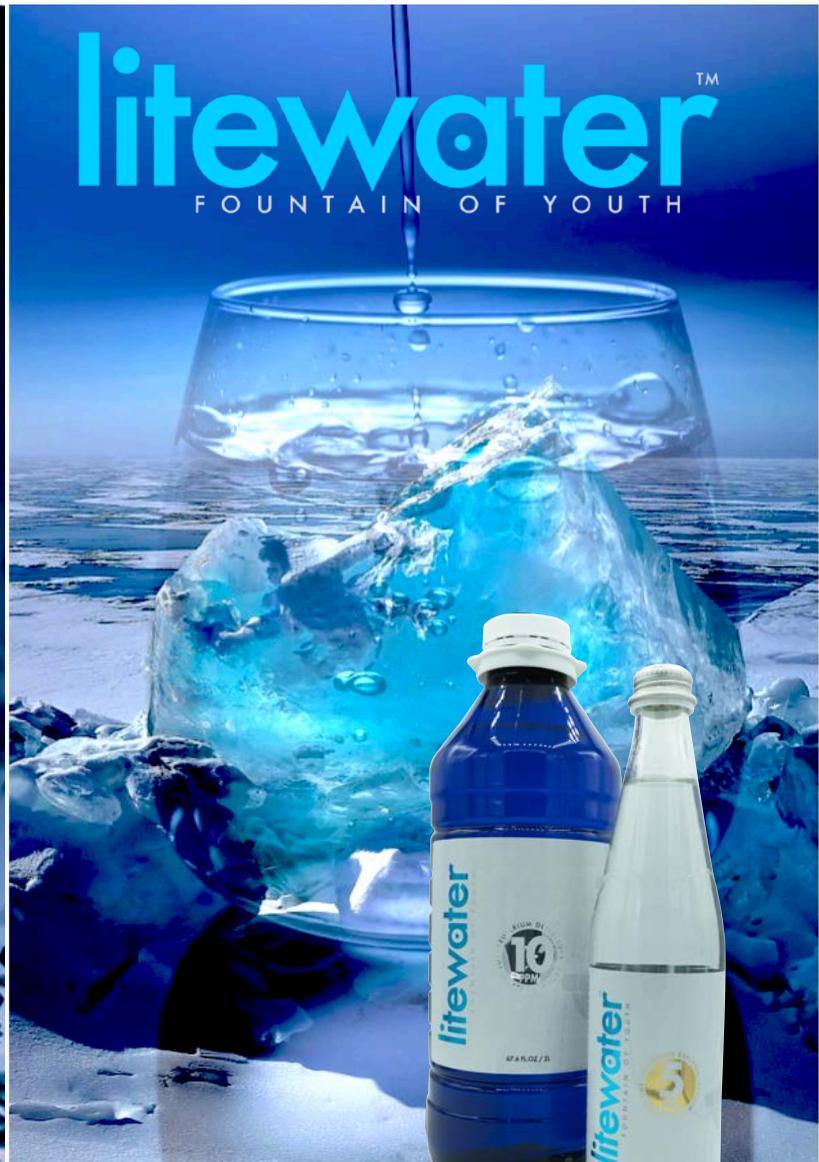

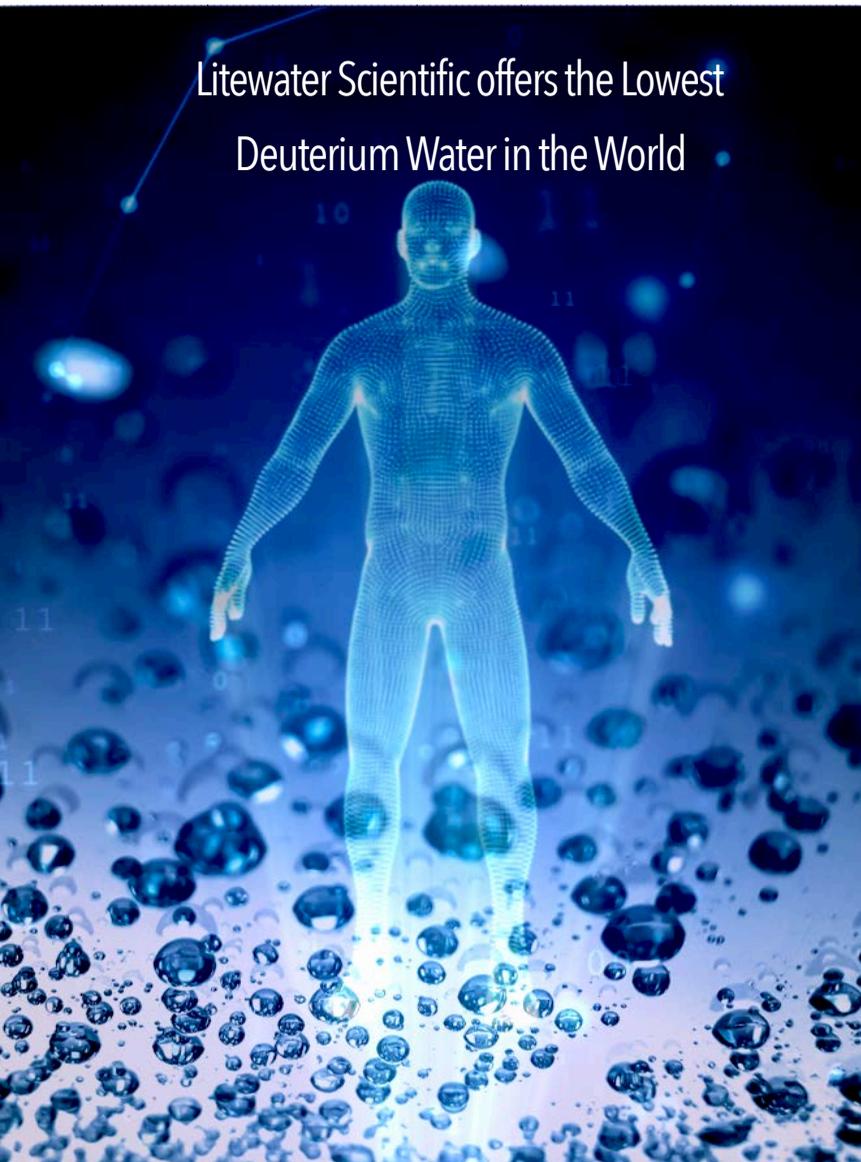

Water, the most essential nutrient for life also conceals, in plain sight, a rarely discussed biologically destructive form of hydrogen known as DEUTERIUM. For the first time since its discovery in

1931, it is now known that even minute quantities of a twice-as-heavy hydrogen isotope can compromise mitochondrial function as one of the leading causes of physical aging. Deuterium is a natural contaminant which

exists in all water. All living things can tolerate up to a certain amount but, beyond that, can lead to serious biological consequences.

Optimize Cellular Metabolism

Litewater Scientific offers the Lowest
Deuterium Water in the World

Litewater is the First Super Deuterium Depleted
Water in the World.

Litewater Scientific is among the first to bring details of this silent threat to the attention of health-minded consumers, biohackers and health professionals.

The consumption of *Litewater*, Deuterium Depleted Water (DDW), appears to be the most effective and practical solution to this most unusual life challenge.

FOUNTAIN OF YOUTH

Sperry's Art

Sperry's color field paintings are made from water-based dyes pressed into sheets of paper. His wax encaustics are formed from hand-ground pigments in bee's wax, melted and mixed with his excitement, sensations, and revelations.

As a visual artist he has painted and shown his work in many parts of the world, including a period of four years in Australia and a year in South America. Coming from a family of artists, his original home and workplace is now the Julian Alden Weir National Historic Site dedicated to American art and artists located in both Wilton and Ridgefield, Connecticut. Here and at his Studio Gallery in Block Island Rhode Island he has created, shown, and sold his artwork. His paintings are now owned by both public and private collections internationally. In the summer of 1999, he relocated his home and workplace to his studio in Sedona, Arizona.

After years of representational and figurative painting, he chose to spend decades developing his own unique style as an abstract artist.

His interest in visually representing his origin in Consciousness began with a childhood near death experience.

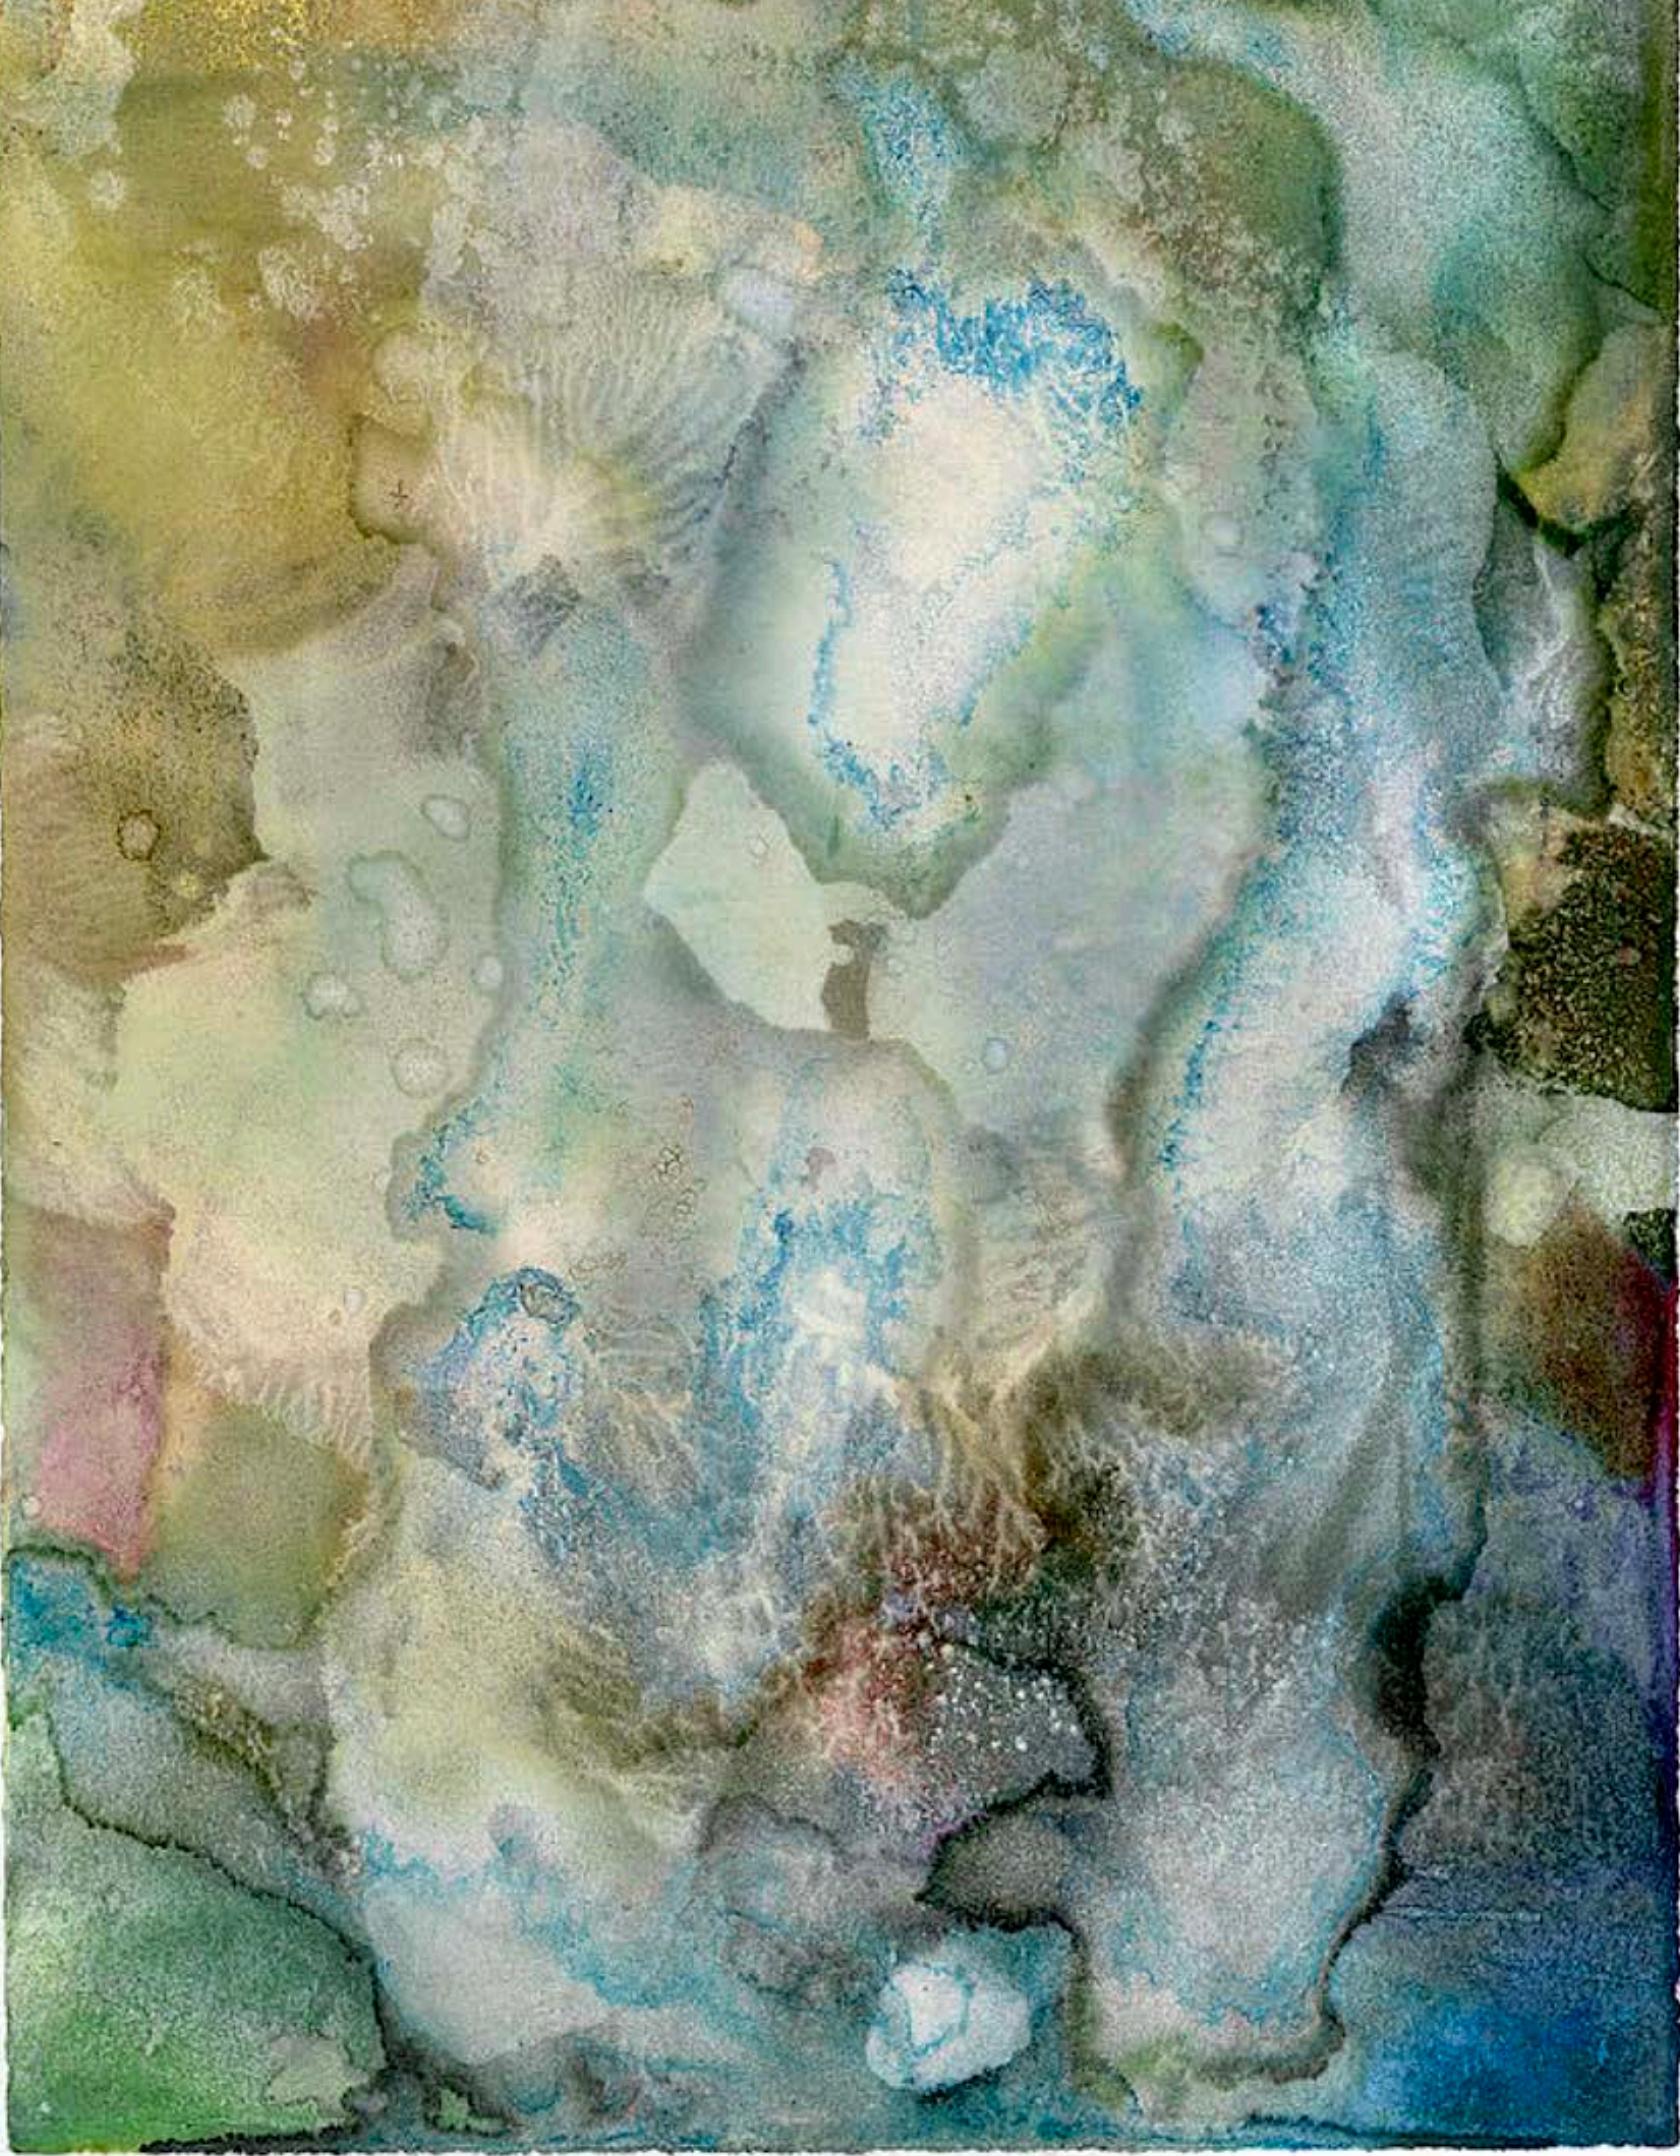

Knowing that everyone and everything are connected led him into contemplative and meditative visioning including healing and teaching work.

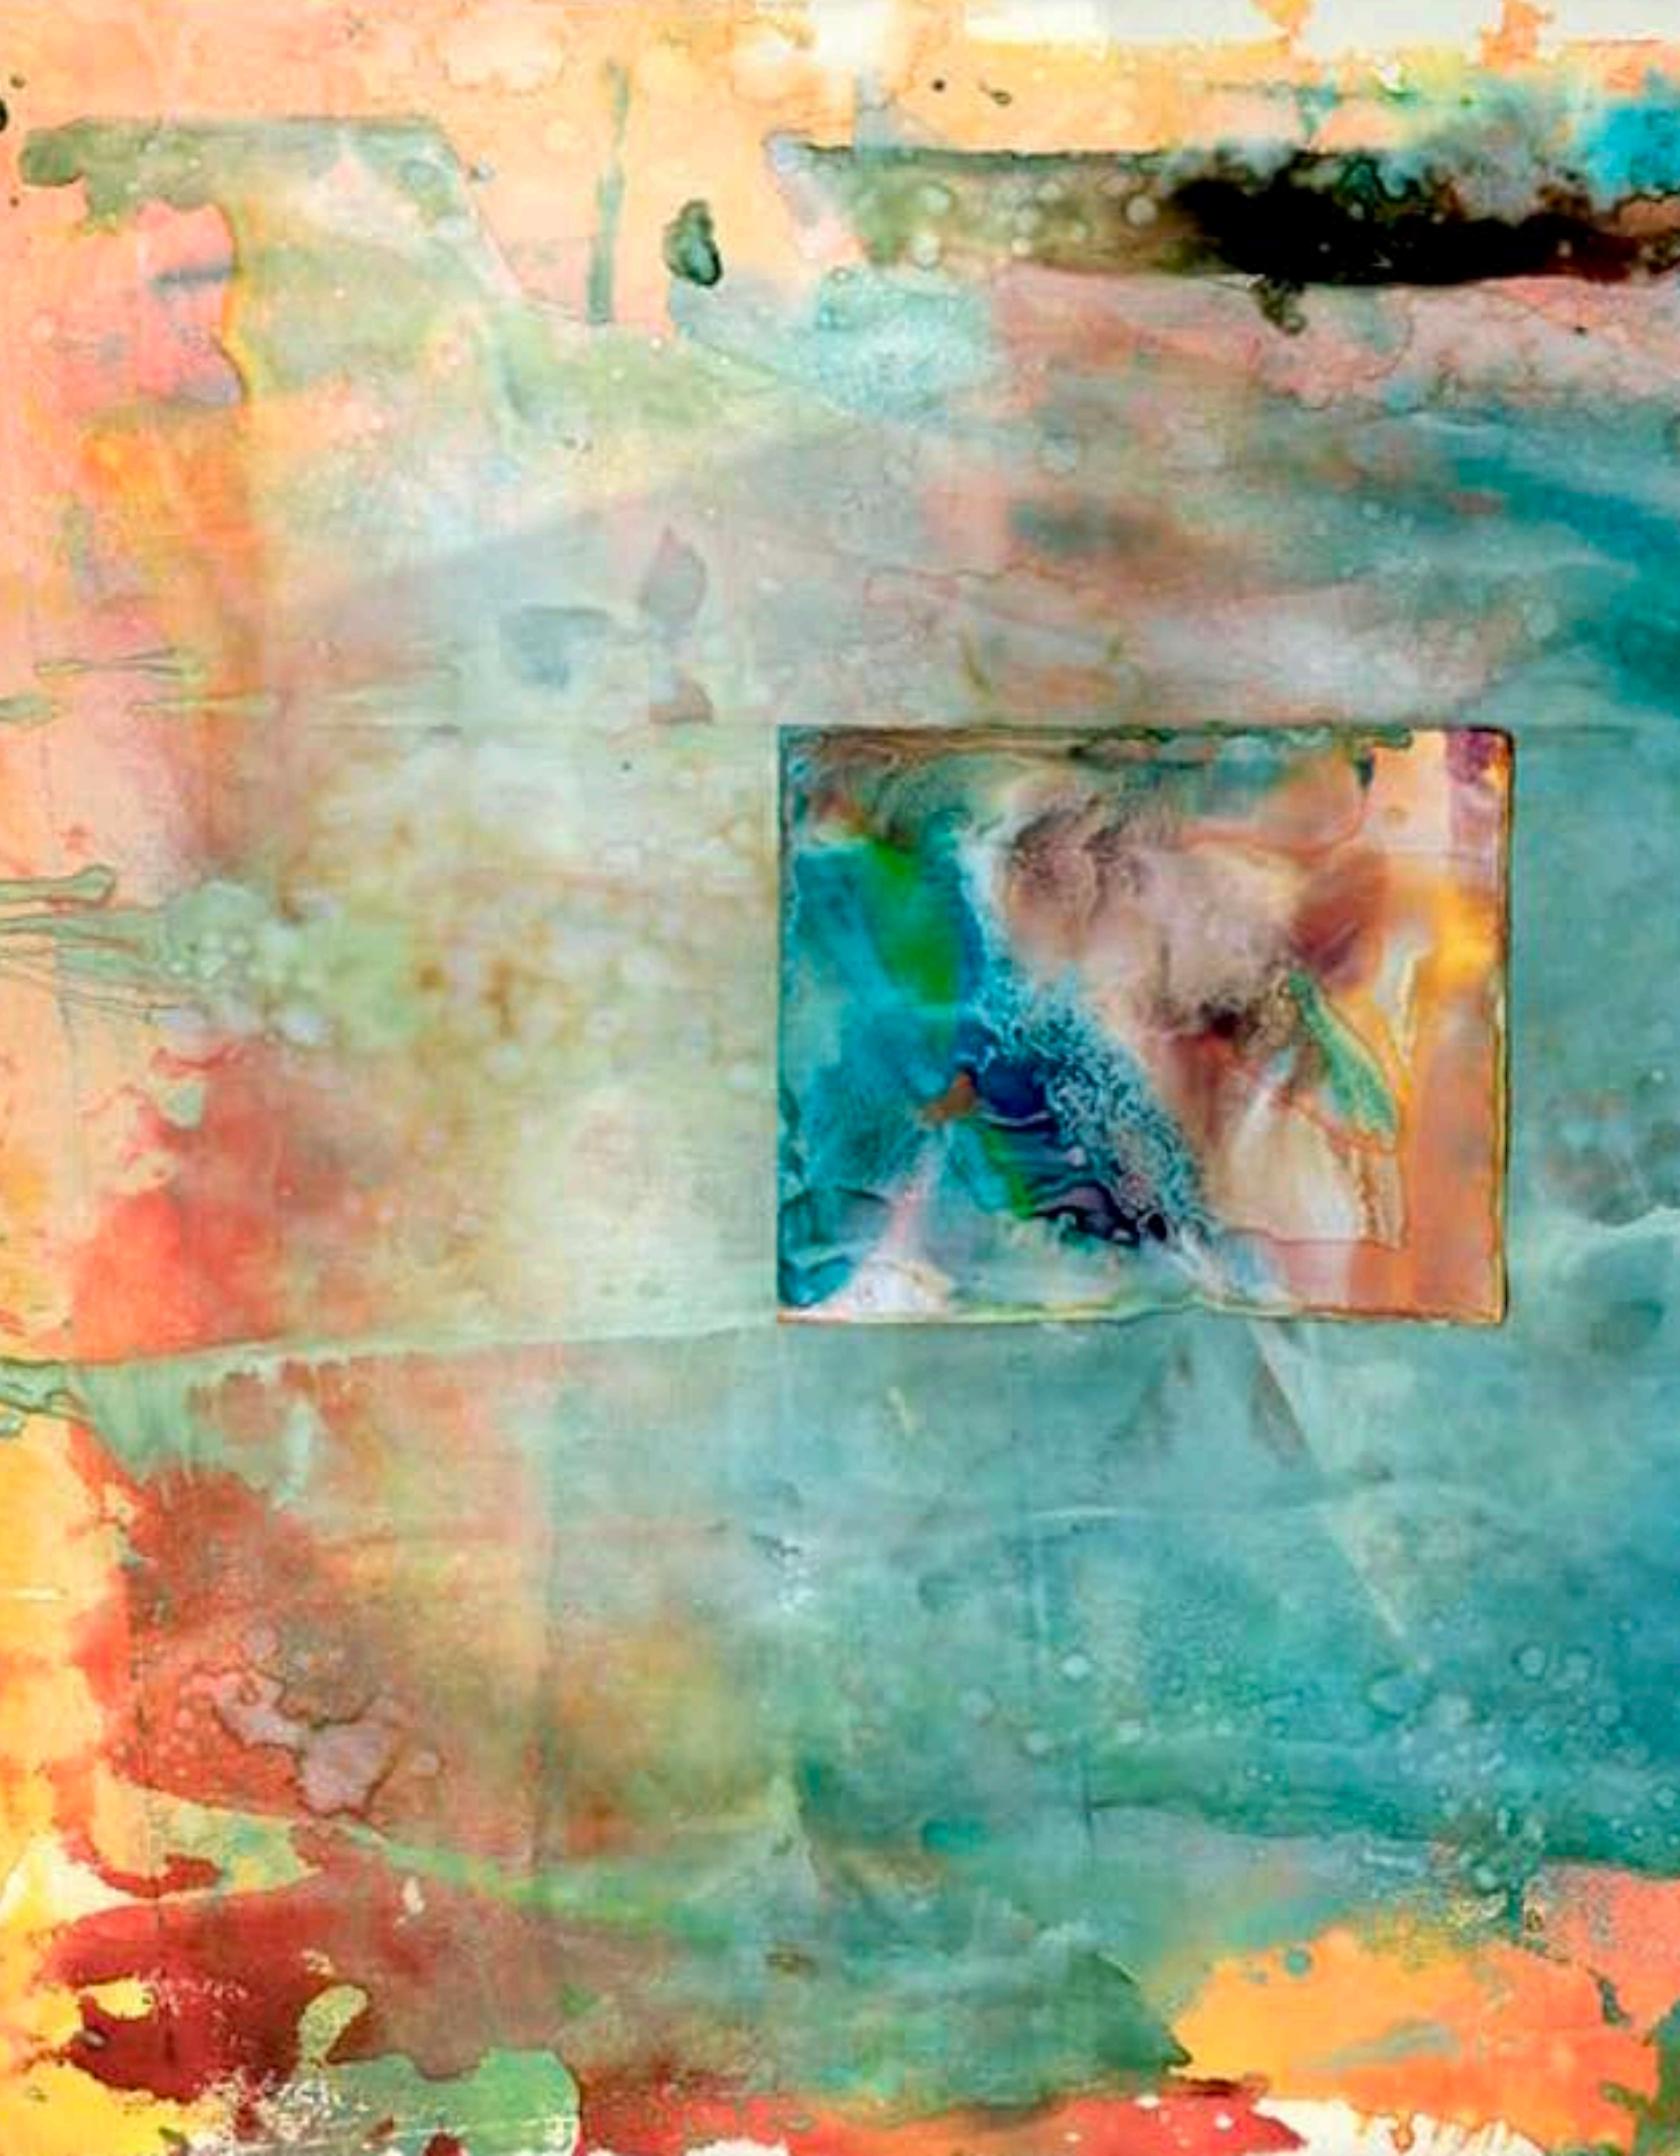

He was formally educated at Antioch College, Maryland Art Institute, New School for Social Research, the Studio School in New York City, State University of New York, City College San Francisco, and Naturopathic College in Santa Fe, New Mexico.

In alignment with his social conscience as an artist, Sperry founded and has for the past forty years served as executive director of the Human Connection Institute, a scientific and educational media research program designed to reinforce the underlying sense that human beings are innately psychologically and physiologically linked even when positioned in widely separated geographic locations.

His parents were fine artists and all their friends were artists. His father was a celebrated landscape painter whose legacy includes thousands of works of art. His mother was a watercolorist, photographer, and preservationist securing the first National Historic Site in the United States to honor American Art and Artists.

InsideOUT

Revealing the Mysteries of Creation
and the Wisdom to Live Your Life Consciously Connected

A compelling synthesis of modern science, ancient wisdom and timeless art melded into a revolutionary view of the universe, and our lives!

Where do we draw the line between science, spirituality, and nature's secrets? In a visual journey of natural rhythms, cycles and geometry Karen Elkins book *InsideOut* demonstrates how everything from the very large to the very small—from the birth of galaxies to the formation of atoms and cells—emerge from simple, connected and unified patterns of nature. In doing so she reminds us that the key to our healing, and ultimately our survival, lies in our ability to embrace ourselves, and the world, as living, conscious and connected.

Whether you're an artist or an engineer, a home maker or a body worker, this book is about you, your world, and every relationship that you'll ever experience in life. *Inside Out* is destined to become a cornerstone for teaching the unified science of the new millennium.

Gregg Braden, New York Times bestselling author of *Human by Design* and *The Divine Matrix*

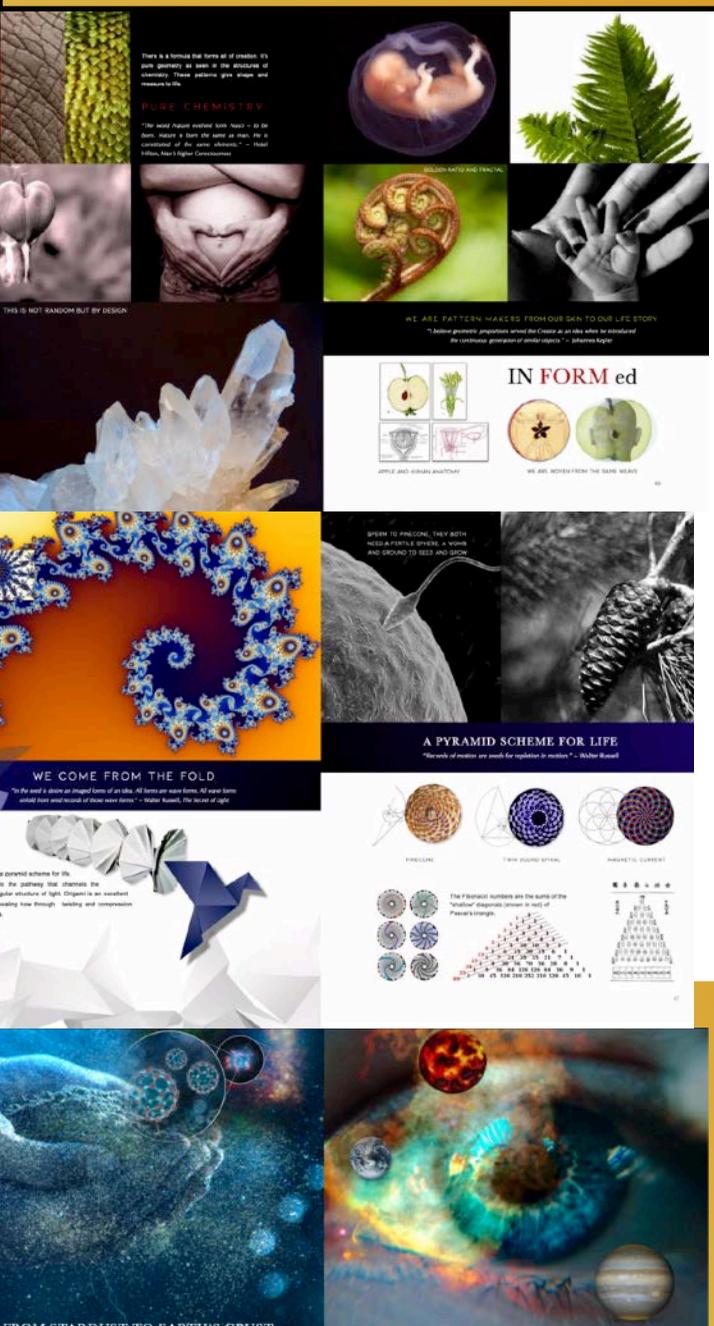

"A visual feast. Karen Elkins's "*InsideOut*" brings the newest and most intriguing science to a lay audience in a way that combines mystery with understanding. Rarely has science and art been blended in so effective a way." ~ **Gerald Pollack, Ph.D.** Professor, University of Washington.

Trailer

Award Winner | Science Category

"This is the secret teaching of all ages for our times. Thank you, bless you." ~ Foster Gamble, Thrive Movie

"Karen Elkins successfully takes you on a journey from the Heavens to the Earth and back again. She has successfully expressed the Hermetic Axiom, 'AS ABOVE SO BELOW.' She goes one step further to include 'AS WITHIN SO WITHOUT' in this visually stunning presentation." ~ **Matt Presti, President**, University of Science and Philosophy, (Formerly the Walter Russell Foundation)

"Karen Elkins has created a book of stunning visual beauty and great inspiration. The simple act of opening it pages—in a well lit room—provides the reader with a form of color therapy in which light from the lavish illustrations bathes the reader in radiant beauty. But it is in the accompanying words where, for me, the true inspiration lies: a combination of evocative poetry and glimpses into the minds of some great luminaries, both current and past. Elkins' book will find its readers in all those who have a healthy curiosity about the Natural Word and Universe." ~ **John Stuart Reid**, acoustic-physics researcher"

The visual and poetic masterpiece of Karen Elkins, 'Inside Out', may well become the greatest source for inspiration and wisdom in preparing our human future expressions. It's displays of cosmic breath light-waves resonate throughout all of life churning a symphony of artist creations. This magical journey through the mysteries of the ages of the scientific and mystical offers to propel the star-dust Us into an expansive consciousness of being." ~ Ernest Richards
